Document

Version	Date	What changed
1.1	October 2026	Visual edition: colour system, numbered pointers and tooltips, lens zoom-ins, sticky notes, missions and badges, barcodes on every page, contents with page numbers, credits.
1.0	October 2026	First edition: five parts, 42 chapters, 90 screenshots, diagrams, reference tables.

How the page furniture works

- **Barcode** at the foot of every page encodes the handbook version and page (for example `CLUBPRO-HB-1.1-P007`), so a photographed or printed page can always be traced to its edition.
- **Progress bar and XP** in each chapter head show how far you are through the book; **missions** at the end of chapters are things to try in the app; **badges** mark what you can do once a part is finished.
- **Pointers** on screenshots are numbered and explained under the picture; **lenses** zoom into one control; **sticky notes** carry the advice an experienced secretary would give you.
- Highlighted text is the thing to remember from a paragraph.

ClubPro is a product of Bpro Consulting & Technologies. Screens shown are from a demonstration club; names are fictitious. © 2026 Bpro Consulting & Technologies.

PART A

Welcome

ClubPro runs a club's whole life in one place and in two languages. This book shows every screen, step by step.

- ★ Who this book is for and how it is arranged
- ★ What the symbols mean
- ★ Phones, computers and the installed app

0 **Level 0 · Welcome**
read the map

PART A · WELCOME

How to use this book

01

Three readers, one product

Chapter 1 of 42

+10 XP

ClubPro is used by three kinds of people, and this book has a part for each. You do not need to read it all : members need Part B, office bearers Parts B and C, the operator Part D.

Members

Apply, sign in, keep the e-card, register for events, borrow books, pay dues, vote. Mostly on a phone. **Part B**

Office bearers

Secretary, president, treasurer, librarian and the administrator: approvals, publishing, minutes, the library desk, accounts, broadcasts, settings. Usually on a laptop. **Part C**

The operator

Team Bpro, or whoever runs the server: installing, creating clubs, pricing, billing, channels, backups. **Part D**

Each chapter opens with *At a glance*, then numbered steps with the screen beside them. Symbols:

💡 **Tip** — a shortcut or a good habit.

⚠️ **Careful** — something that cannot be undone, or that members will notice.

ℹ️ **Note** — background that explains why the screen behaves as it does.

Malayalam — the Malayalam name of the screen or button, as members see it.

Level 1 · Member | Level 2 · Office bearer | Level 3 · Operator | Reference

WHY LEVELS?

Each part is a level. Finish a level's missions in the app and you have earned its badge. No account on earth is checking; it is a way to make sure you tried every screen once.

PART A · WELCOME

Three kinds of reader

02

What each person sees

Chapter 2 of 42

+10 XP

Everyone opens the same web address. What appears depends on who signs in:

Who	Signs in with	Sees	Typical device
A visitor	nothing	the front page, the public website, news that is public, the application form	phone
A member	phone number + password	everything in Part B: profile, e-card, events, library, payments, polls	phone
A committee member	phone number + password	the above, plus their committee's meetings, agenda and minutes	phone / laptop
An office bearer	e-mail or phone + password	the **Office** section of the menu for their role (Part C)	laptop
The administrator	e-mail + password	everything, including Settings, Users and Backups	laptop
The operator	the master key	the platform console at /_platform (Part D)	laptop

PART A · WELCOME

Languages, phones and the installed app

03

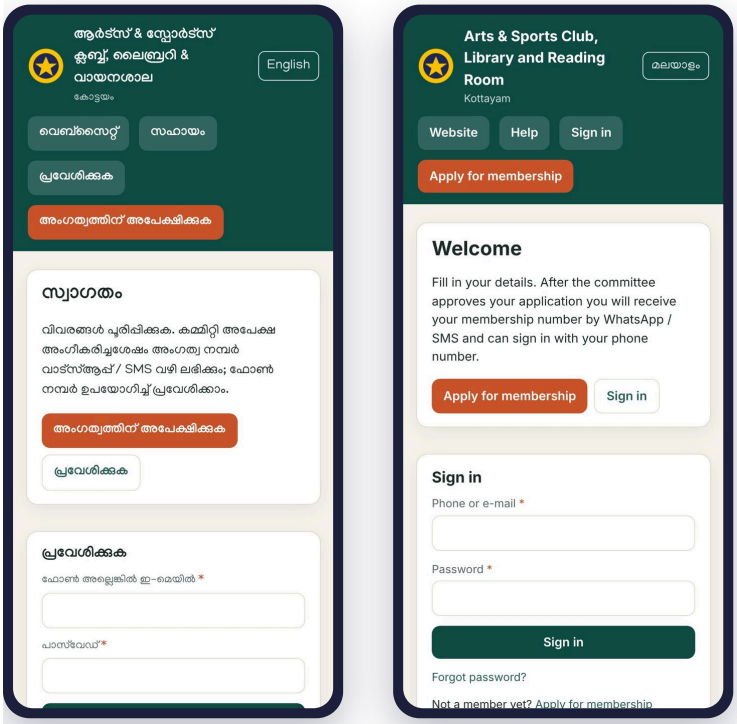
Malayalam and English everywhere

Chapter 3 of 42

+10 XP

AT A GLANCE

- Every screen, button and message exists in English and Malayalam.
- The language button sits at the top of every page; a member's choice is remembered and used for the messages the club sends them.
- On a phone the app installs to the home screen and opens full-screen, with notifications.



The front page on a phone in Malayalam and in English. The button at the top switches at any time.

1. **Open the club's web address** in Chrome (Android) or Safari (iPhone).
2. **Tap the browser menu** and choose *Add to Home screen* (Android) or *Share → Add to Home Screen* (iPhone).
3. **Open it from the home screen** it now runs full-screen like an app, with the club's own icon.
4. **Allow notifications** when asked under *My profile → Notification preferences*, so event reminders and receipts arrive even when the app is closed.

ℹ️ The app keeps working on a weak connection: screens you have opened before load instantly, and a clear *You are offline* page appears instead of an error.

MISSION +10 XP

Mission 1 · Get set up

- [ ] Open the club's address on your phone and add it to the home screen
- [ ] Switch the language once each way
- [ ] Allow notifications when asked

PART B

Members' guide

Everything a member does, from the first application to voting in the election, on a phone.

- ★ Apply in six short steps, with a selfie
- ★ Keep the membership e-card on the phone
- ★ Register the family for events, borrow books, pay by UPI

1 **Level 1 · Member**
apply, e-card, events, library, pay

PART B · MEMBERS

Getting started

04

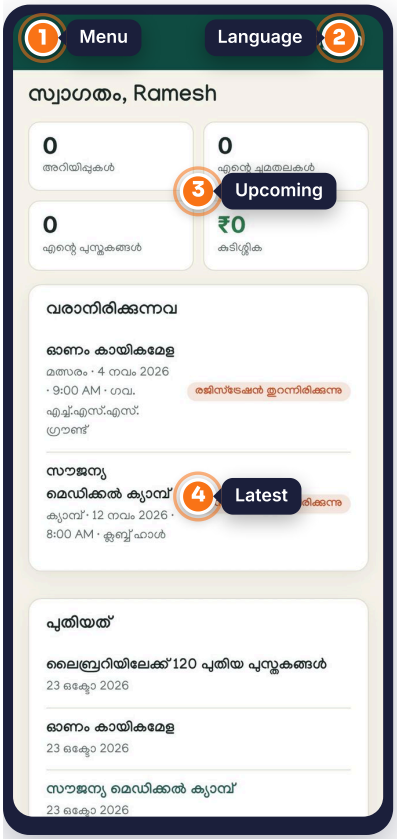
From the front page to your first sign-in

Chapter 4 of 42

+10 XP

AT A GLANCE

- Your phone number is your login once you are a member.
- Not a member yet? Apply from the front page; the committee approves and you receive your number by WhatsApp or SMS.
- Lost the password? One-time code to your phone.



The member's home page after signing in.

1. The menu (☰): every screen is one tap away; office bearers see an extra Office group at the bottom.
2. English / മലയാളം switch; also sets the language of the messages you receive.
3. Events you can register for, with Registration open pills.
4. The newest news items; tap to read.

Malayalam: Home = ഹോം · Sign in = പ്രവേശിക്കുക · Apply for membership = അംഗത്വത്തിന് അപേക്ഷിക്കുക

PART B · MEMBERS

Applying for membership

05

Six steps, two minutes

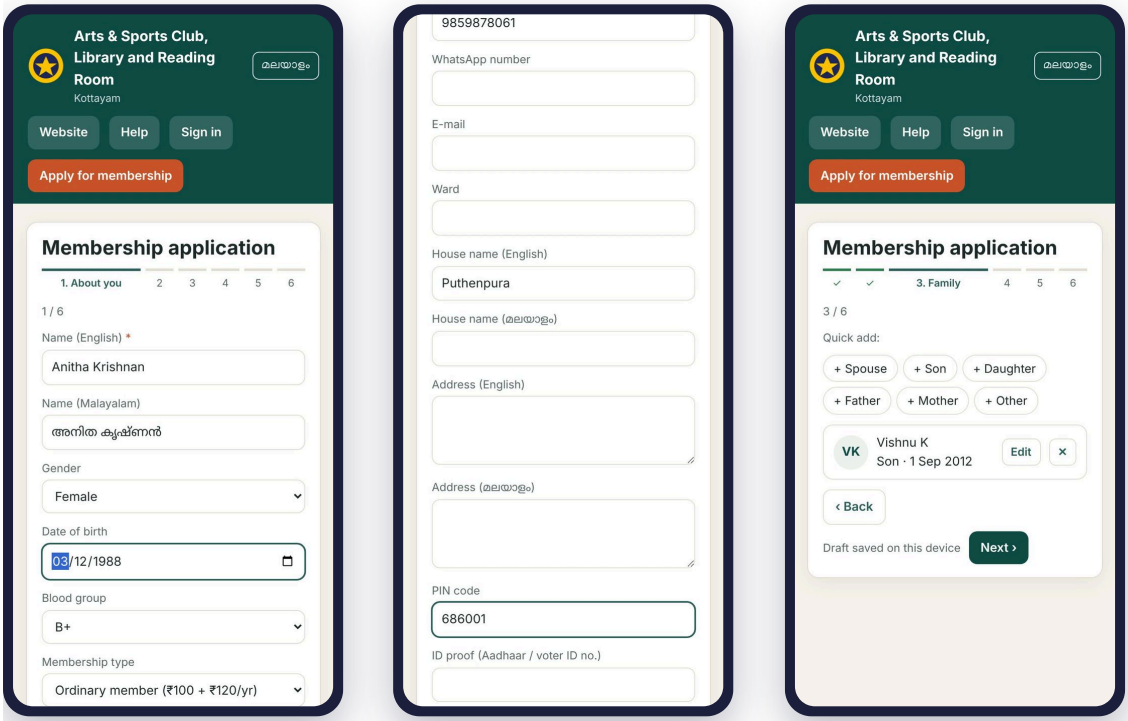
Chapter 5 of 42

+10 XP

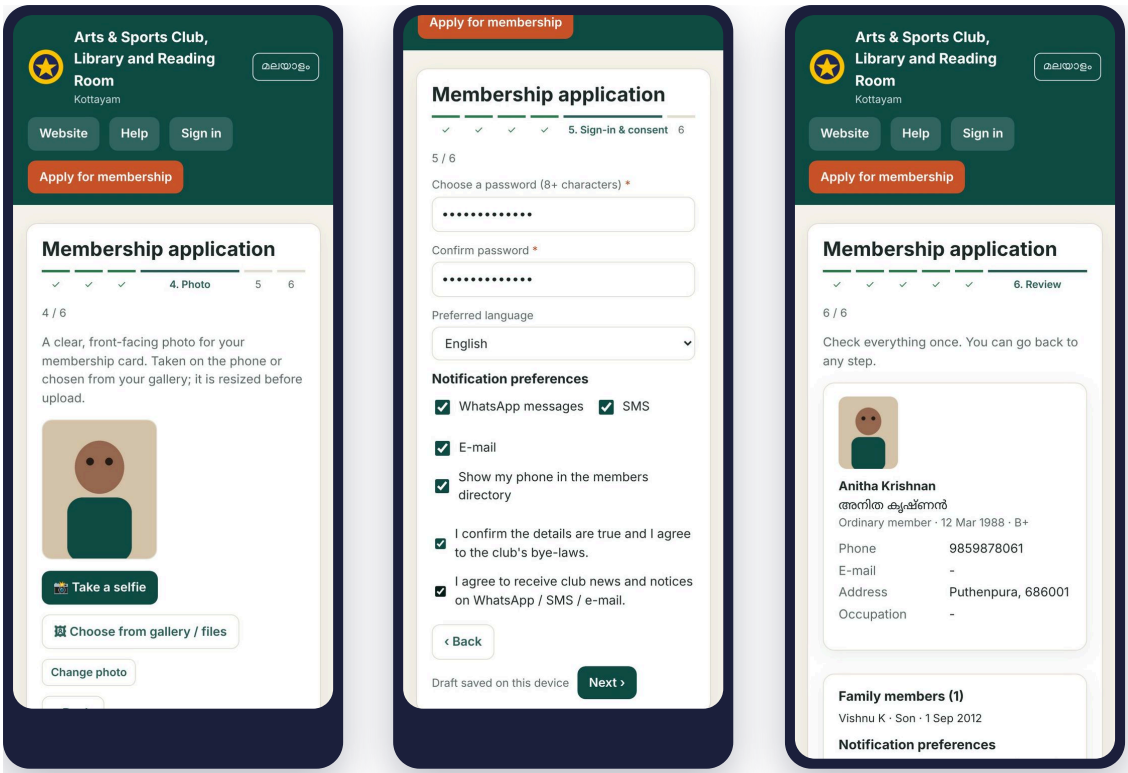
AT A GLANCE

- The form saves itself as you go; a refresh loses nothing.
- Family members can be added now or later from your profile.
- The photo can be a selfie or a picture from the gallery; it becomes your e-card photo.

Apply 6-step form → **Review** office checks details → **Approve** number issued → **Message** WhatsApp / SMS → **Sign in** phone + password

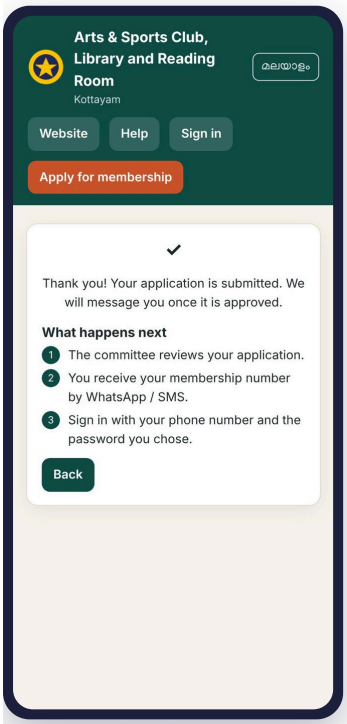


Steps 1 to 3: about you · contact and address · family (quick-add chips for spouse, son, daughter, parents).

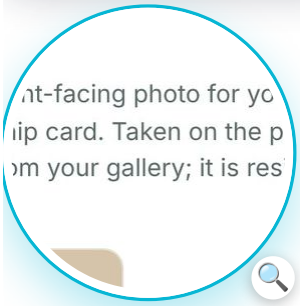


Steps 4 to 6: photo (selfie or gallery, resized on the phone) · password and consent · review before sending.

1. **Tap Apply for membership** on the front page.
2. **About you** name in English and, if you like, Malayalam; gender, date of birth, blood group. The blood group lets the club find donors in an emergency.
3. **Contact and address** your mobile becomes your login. WhatsApp number if different, e-mail, house name, ward, pincode.
4. **Family** tap a chip (spouse, son, daughter, father, mother) and fill the name and date of birth. Family members can be registered for events and competitions.
5. **Photo** *Take a selfie* opens the camera; *Choose from gallery* picks a file. It is resized on the phone before upload.
6. **Password and consent** 8 characters or more; confirm that the details are true and that the club may message you.
7. **Review and send** check everything, then *Send application*. A *What happens next* page confirms it.



After sending: what happens next, and a reminder that the number arrives by WhatsApp or SMS once approved.



Selfie or gallery

Step 4 offers both: *Take a selfie* opens the camera; *Choose from gallery* picks any picture. The photo is shrunk on the phone before it is sent, so it works on slow connections.

DID YOU KNOW?

The form keeps a draft in the phone's browser. Close the browser, come back tomorrow, and the steps you filled are still there until you send or clear them.

SECRETARY'S TIP

Ask the applicant to write the name in English exactly as on their ID. It goes on the e-card and the receipts.

MISSION +20 XP

Mission 2 · Apply

- [ ] Fill all six steps on a phone, including one family member
- [ ] Take a selfie for the photo
- [ ] Send the application and read the What happens next page

ℹ️ If the office rejects an application the applicant is told why by message and can apply again with corrections.

PART B · MEMBERS

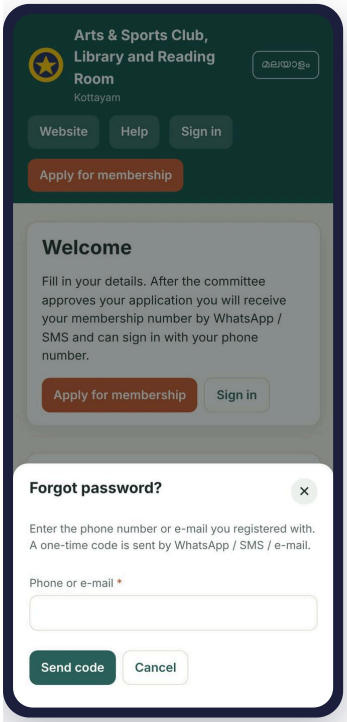
Signing in and forgotten passwords

06

Chapter 6 of 42

+10 XP

1. **Sign in** with the phone number used in the application (or the e-mail the office gave you) and your password.
2. **Forgot password?** tap the link under the sign-in form, enter your phone or e-mail, and a 6-digit code arrives by WhatsApp, SMS or e-mail.
3. **Set a new password** enter the code and the new password. The code works for 10 minutes and once only.



Forgot password: the one-time code goes to the phone or e-mail on record.

⚠ The sign-in page allows ten attempts a minute from one connection; after that it asks you to wait. This protects every member's account.

PART B · MEMBERS

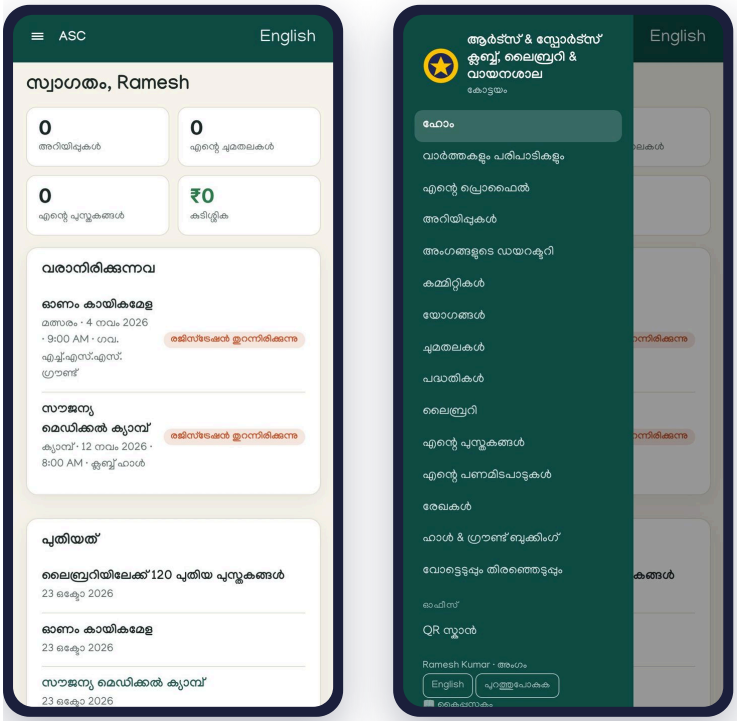
Home and the menu

07

Where everything is

Chapter 7 of 42

+10 XP



Home, and the menu opened with ☰. Office bearers see an extra *Office* group at the bottom.

Menu item	Malayalam	What it is for
Home	ഹോം	upcoming events and the latest news
News & events	വാർത്തകളും പരിപാടികളും	everything the club publishes; register from here
My profile	എന്റെ പ്രൊഫൈൽ	your details, e-card, family, notification preferences, password
Notifications	അറിയിപ്പുകൾ	every message the club sent you, in the app
Members directory	അംഗങ്ങളുടെ ഡയറക്ടറി	members who chose to show their phone
Committees · Meetings	കമ്മിറ്റികൾ · യോഗങ്ങൾ	office bearers, your committees, agenda and minutes
Library · My books	ലൈബ്രറി · എന്റെ പുസ്തകങ്ങൾ	search the catalogue, reserve, see loans and due dates
My payments	എന്റെ പണമിടപാടുകൾ	dues, UPI / online payment, receipts
Documents	രേഖകൾ	bye-laws, circulars, certificates you may see
Hall & ground booking	ഹാൾ & ഗ്രൗണ്ട് ബുക്കിംഗ്	calendar and booking requests
Polls & elections	വോട്ടെടുപ്പും തിരഞ്ഞെടുപ്പും	open votes and results

PART B · MEMBERS

Profile, family and the e-card

08

Your membership in your pocket

Chapter 8 of 42

+10 XP

AT A GLANCE

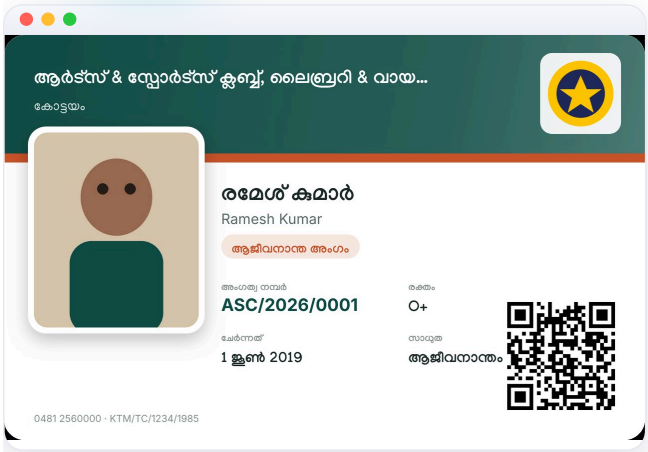
- The e-card carries your photo, number, blood group, validity and a QR code the office scans.
- Save it as a picture or share it on WhatsApp; it is also printable.
- Add family with dates of birth and blood groups; the office verifies them.

My profile: the e-card at the top, then your details.

1. Profile · Family · Preferences · Password.
2. Your electronic membership card with the QR the office scans.
3. Renders the card as a picture in your gallery.
4. Send it on WhatsApp, or print a credit-card-size version.
5. Update phone, address, occupation or photo; the office verifies big changes.

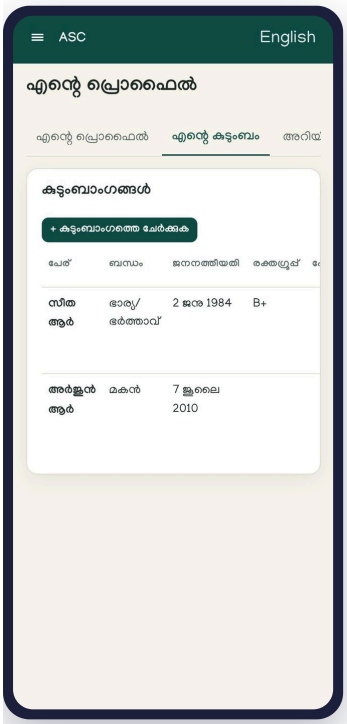
The QR on the e-card

Encodes your membership number. At a meeting, an event or the reading room the office scans it with *Scan QR* and you are marked present or signed in without typing anything.



The e-card as saved to the phone: the club's colours and logo, both scripts, membership type, number, blood group, joined date, validity and the QR.

1. **Save to phone** renders the card as a picture in your gallery.
2. **Share** sends the picture through WhatsApp or any app.
3. **Print** opens a credit-card-sized printable version.
4. **My family** add spouse, children, parents; relation, date of birth, blood group, phone. The office marks each one *verified*.
5. **Change password** under the profile tabs; a strong password is 8 characters or more.



My family: the people you can register for events, and the blood groups the club's donor search uses.

MISSION
+20 XP

Mission 3 · Your card

- [ ] Save the e-card to your phone and share it with yourself on WhatsApp
- [ ] Add one family member with a blood group
- [ ] Change your password

PART B · MEMBERS

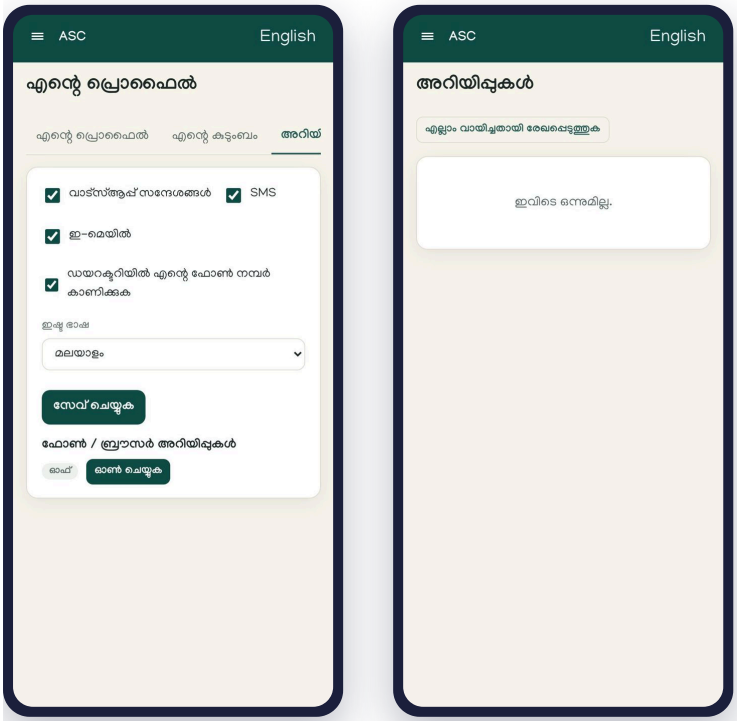
Notifications and preferences

09

Choose how the club reaches you

Chapter 9 of 42

+10 XP



Notification preferences, and the in-app list of everything the club has sent you.

1. **Channels** tick WhatsApp, SMS and e-mail as you like; the app notification is always kept.
2. **Phone notifications** turn on to get reminders and receipts on the lock screen (needs the installed app and HTTPS).
3. **Directory** choose whether other members may see your phone number.
4. **Language** English or Malayalam for every message the club sends you.

PART B · MEMBERS

News, events and competitions

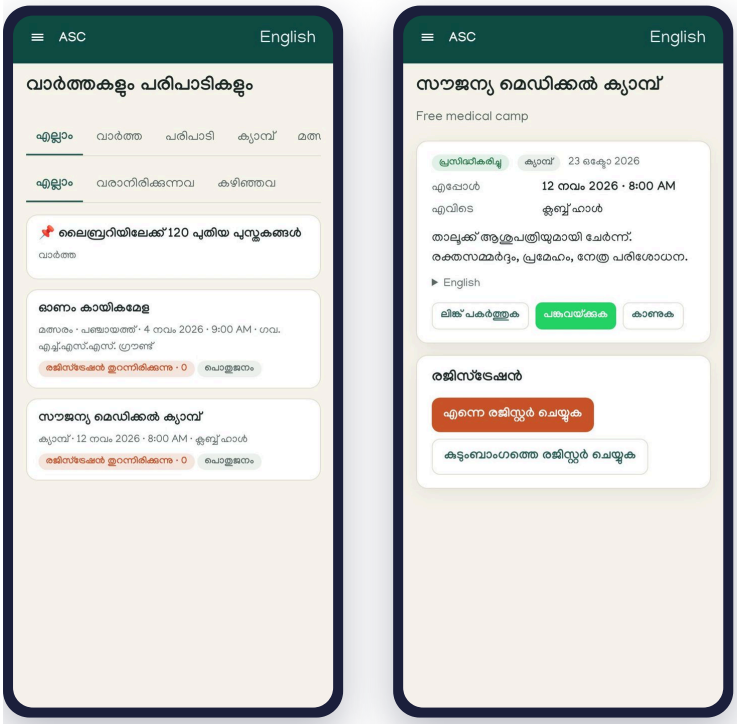
10

Register yourself or the family

Chapter 10 of 42 +10 XP

AT A GLANCE

- Open an event and tap Register; choose a family member if the event is for them.
- Competitions have items (100 m, essay, chess…); pick the item and, for team events, the team.
- You get a confirmation at once and a reminder the day before; results and points tables appear on the same page.



News & events, and an event page with the Register button, the venue and the fee if any.

Public events have a *Share* button that sends a link to a WhatsApp group; people who are not members can read it and, if the club allows, register.

PART B · MEMBERS

Library and reading room

11

Search, reserve, renew

Chapter 11 of 42 +10 XP

The catalogue with search, and My books with due dates and the online renewal.

1. **Search** by title, author, subject or accession number; each card shows how many copies are in.
2. **Reserve** when every copy is out; you are messaged when it returns and it is held for you.
3. **My books** shows loans and due dates; *Renew* once online if nobody has reserved the book.
4. **Fines** appear here and under My payments; the librarian records the payment at the desk.

PART B · MEMBERS

Paying dues and fees

12

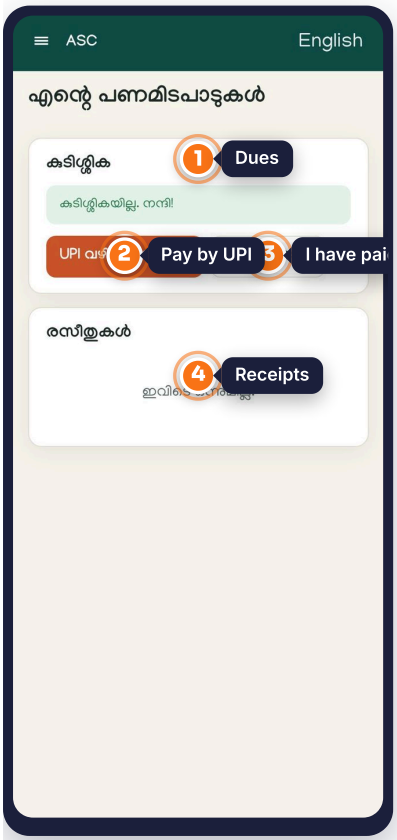
UPI, online, or at the desk

Chapter 12 of 42

+10 XP

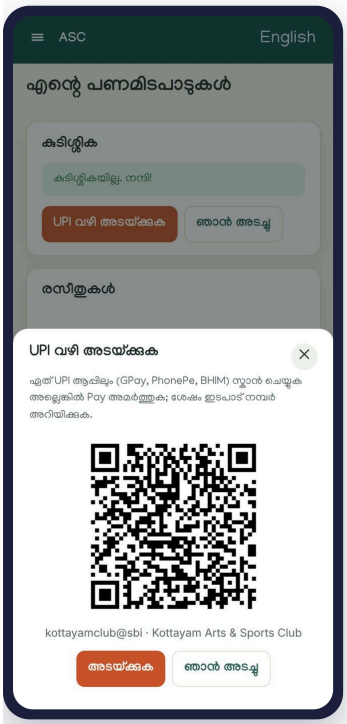
AT A GLANCE

- My payments shows what is due this year and every receipt the club has issued you.
- Pay by UPI: scan or tap, then tell the club the transaction number; the treasurer confirms and the receipt arrives.
- Where the club has online payment, Pay online settles it instantly with an automatic receipt.



My payments and the way to pay.

1. What you owe this year and what it covers; green when nothing is due.
2. Opens the UPI sheet: the club's UPI ID, a QR, and a button that opens your UPI app with the amount filled in.
3. Tell the treasurer the UTR / transaction ID; your receipt follows once confirmed.
4. Every receipt the club has issued you, with the number and the head.



The UPI sheet: the club's UPI ID, a QR for any UPI app and the *I have paid* form.

MEMBER'S TIP

Write the 12-digit UTR, not the amount. The treasurer matches it in the bank app in seconds.

1. **Open My payments** the amount due and the items it covers are at the top.
2. **Pay by UPI** scan the QR with Google Pay, PhonePe or any UPI app, or tap *Open UPI app*.
3. **I have paid** enter the 12-digit UTR or transaction ID from your UPI app.
4. **Receipt** the treasurer confirms the payment; your receipt arrives by WhatsApp or e-mail and stays under My payments.

ℹ️ Paying at the office works as before: the treasurer records it and the receipt is messaged to you.

DID YOU KNOW?

Receipts are never deleted. If one is wrong it is reversed with a voucher, so what you were messaged always matches the club's cash book.

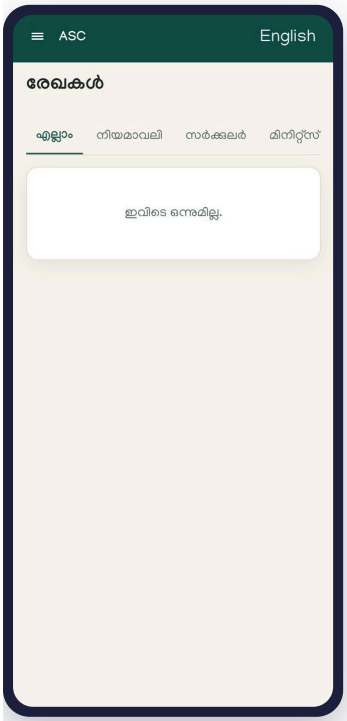
PART B · MEMBERS

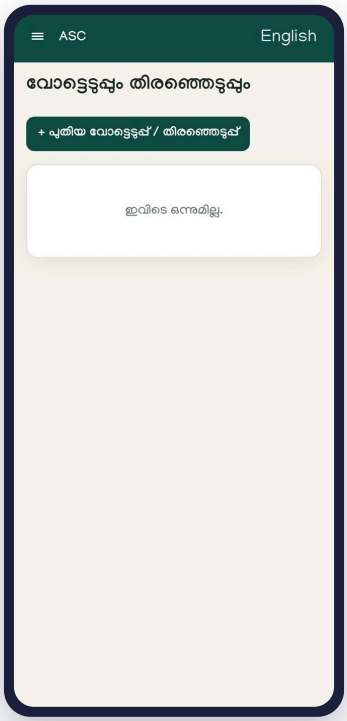
Documents, bookings, polls, meetings, directory

13

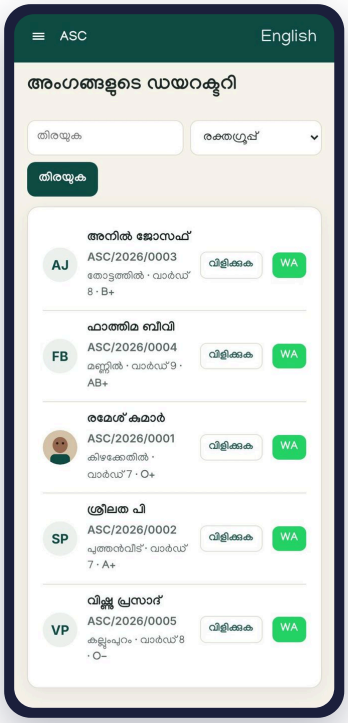
The rest of the menu

Chapter 13 of 42 +10 XP





Documents you may read, the hall and ground calendar with a booking request, and open polls.



Meetings of your committees (and the general body), and the members directory.

1. **Documents** bye-laws, circulars, certificates and minutes, each visible to the audience the office chose.
2. **Hall & ground booking** pick a date and slot and send a request; the office confirms, and any charge appears under My payments.

3. **Polls & elections** one vote per member; a secret ballot never records who chose what. Results appear when voting closes.
4. **Meetings** notices, agenda and, once published, the minutes and the action items assigned to you.
5. **Directory** members who allowed their phone to be shown; tap to call or WhatsApp.

MISSION +20 XP

Mission 4 · Around the club

- [ ] Register yourself or a family member for an event
- [ ] Reserve a book that is out
- [ ] Vote in a poll (or open the polls page)
- [ ] Read a document

Level 1 complete · Member

PART C

Office bearers' guide

Running the club from a laptop: approvals, publishing, minutes, the library desk, accounts and broadcasts.

- ★ Set the club up once: names, numbering, membership types, branding, channels
- ★ Approve applications and keep the register
- ★ Publish, broadcast, record minutes, close the accounts

2 **Level 2 · Office bearer**
approve, publish, minutes, accounts

PART C · OFFICE

Roles and who can do what

14

Five office roles, one administrator

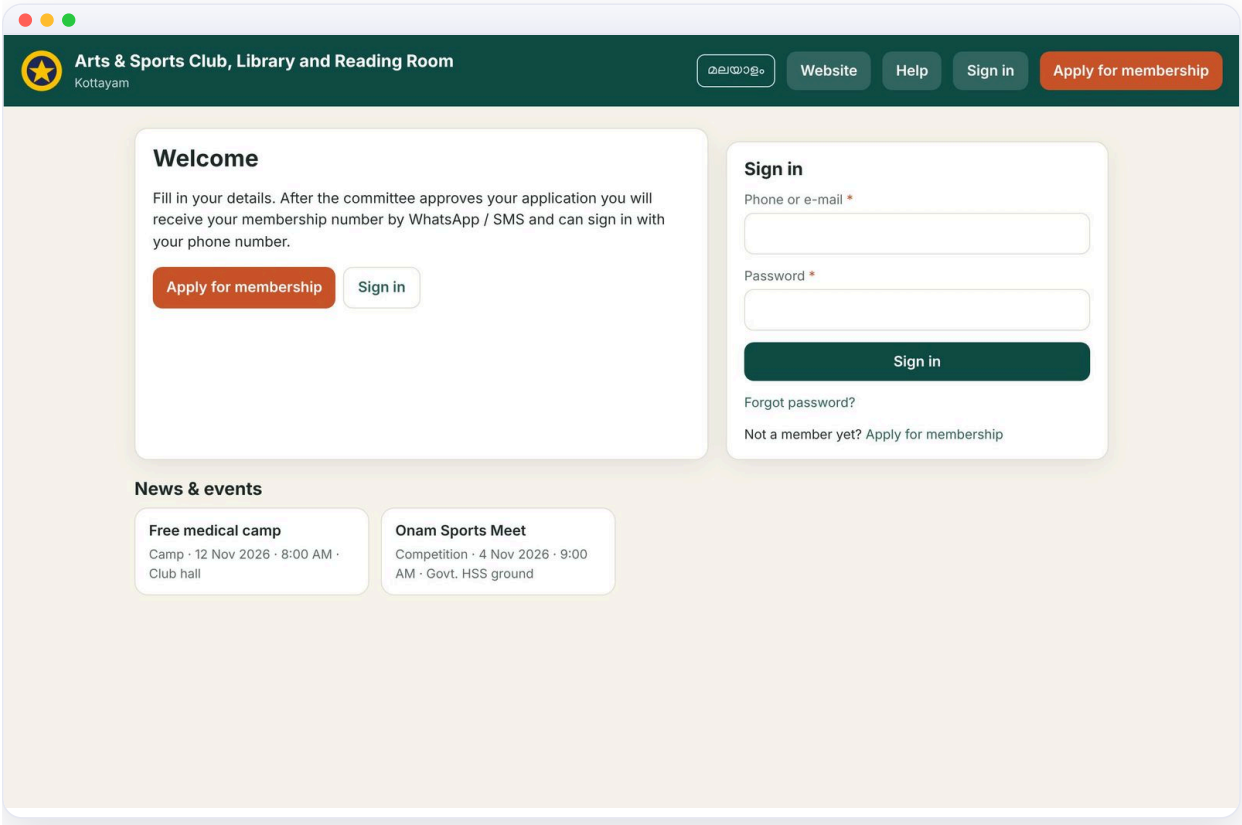
Chapter 14 of 42

+10 XP

AT A GLANCE

- Roles are given under Office → Users by the administrator or secretary.
- A committee convener additionally manages their own committee's meetings and minutes.
- The full permissions matrix is in Part E.

Role	Malayalam	Can
Administrator	അഡ്മിനിസ്ട്രേറ്റർ	everything, including Settings, Users, backups and the subscription
President	പ്രസിഡന്റ്	members and applications, publishing, broadcasts, committees and minutes, accounts (view), reports
Secretary	സെക്രട്ടറി	the same as the president, plus accounts entry, users and the library
Treasurer	ട്രഷറർ	receipts, vouchers, dues, UPI confirmations, bookings charges, members (view), reports
Librarian	ലൈബ്രേറിയൻ	catalogue, issue / return, reservations, reading room, periodicals, members (view)
Member	അംഗം	Part B



The front page on a laptop. Office bearers sign in here with the e-mail or phone the administrator gave them.

PART C · OFFICE

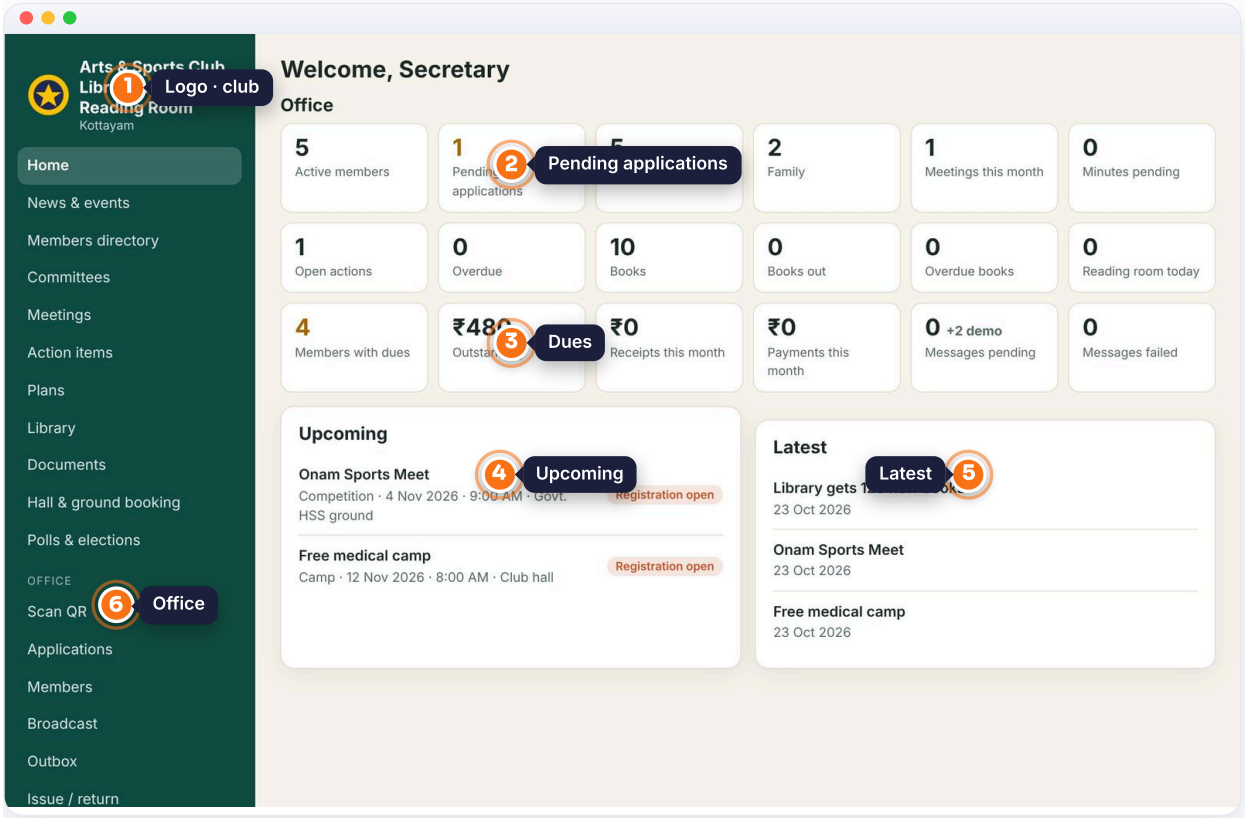
The dashboard

15

The club at a glance

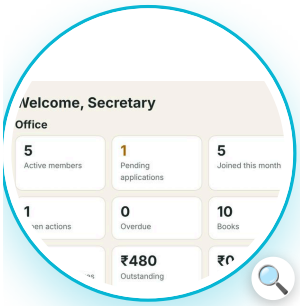
Chapter 15 of 42

+10 XP



Home for an office bearer: counters that need attention are coloured; each tile opens the matching screen.

1. The club's logo and name; set under Settings → Branding.
2. Coloured when something needs you; opens Applications.
3. Members with dues and the outstanding amount; opens Dues.
4. Events with registration state.
5. What was published last.
6. The office menu: your role decides what is listed.



A tile that needs you

Orange numbers are things waiting: applications to approve, overdue books, members with dues, failed messages. Green and black numbers are just facts.

Tile	Means
Pending applications	applications waiting for approval → Office → Applications
Minutes pending	meetings that happened without published minutes
Open actions · Overdue	action items from minutes, and those past their due date
Books out · Overdue books	loans, and loans past the due date (reminders go automatically)
Members with dues · Outstanding	who has not paid this year and how much → Office → Dues

Tile	Means
Messages pending · failed	the outbox; *demo* means a channel is not configured yet

PART C · OFFICE

First-time setup

16

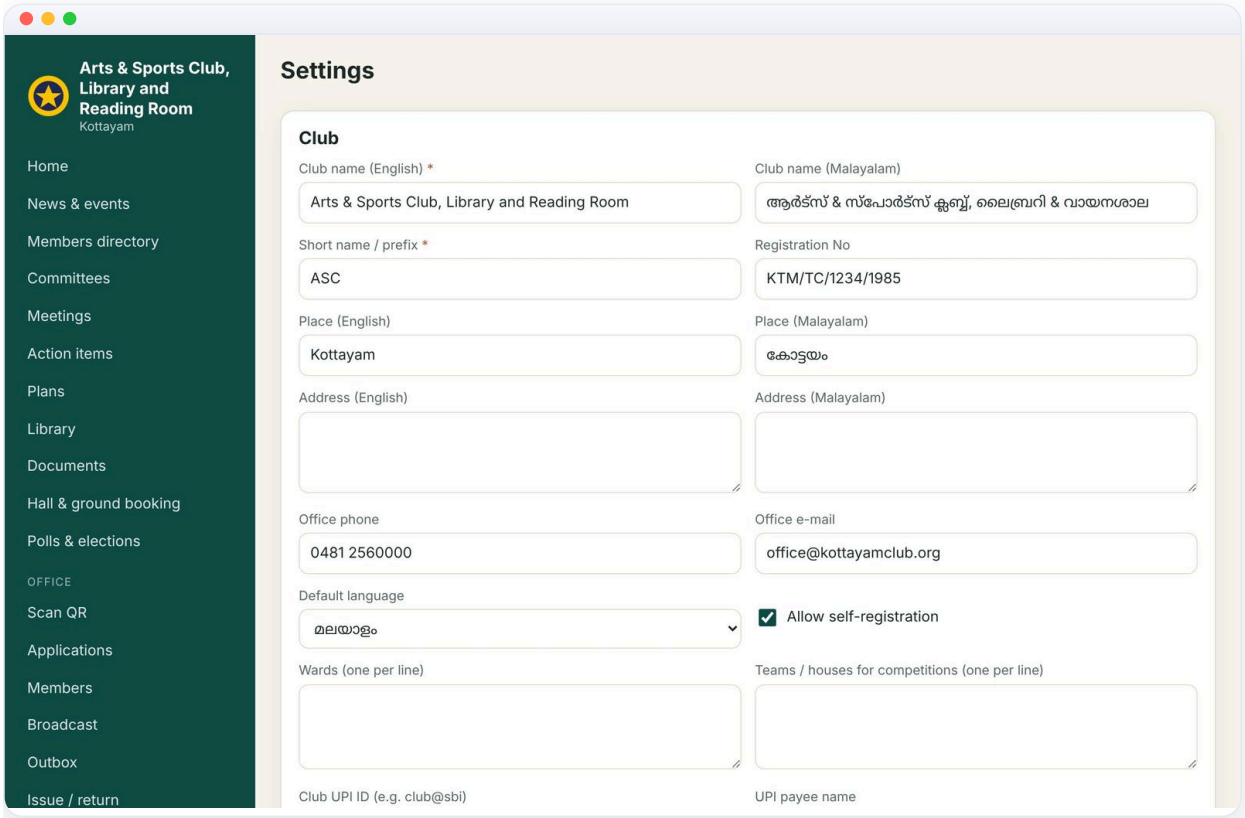
An hour, once

Chapter 16 of 42

+10 XP

AT A GLANCE

- Settings holds the club's identity, numbering, membership types, library rules, website, branding and channels.
- Users & roles gives office bearers their sign-in.
- Import the old register from Excel; members then sign in with their phone number.



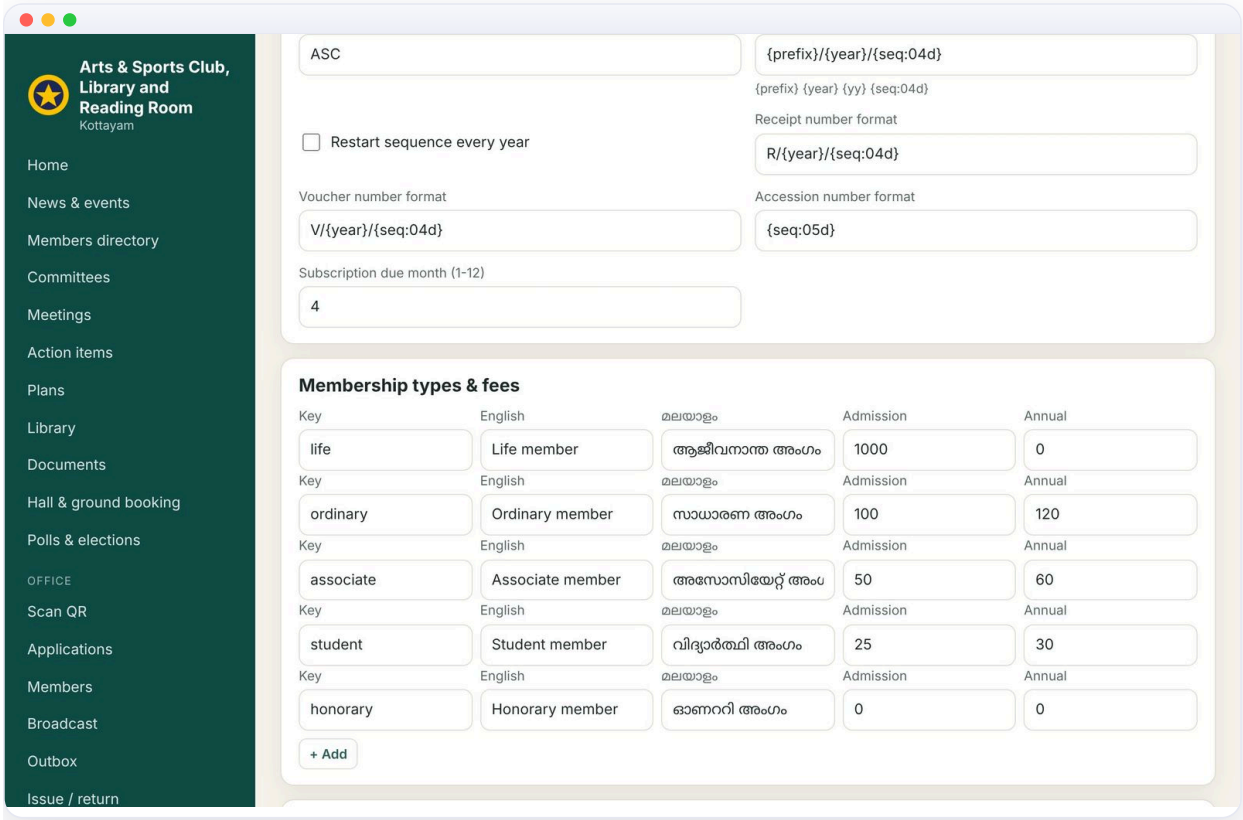
Settings → Club: names in both scripts, short name (used in membership numbers), registration number, place, address, phone, default language, self-registration, wards, UPI ID.

DO THIS FIRST

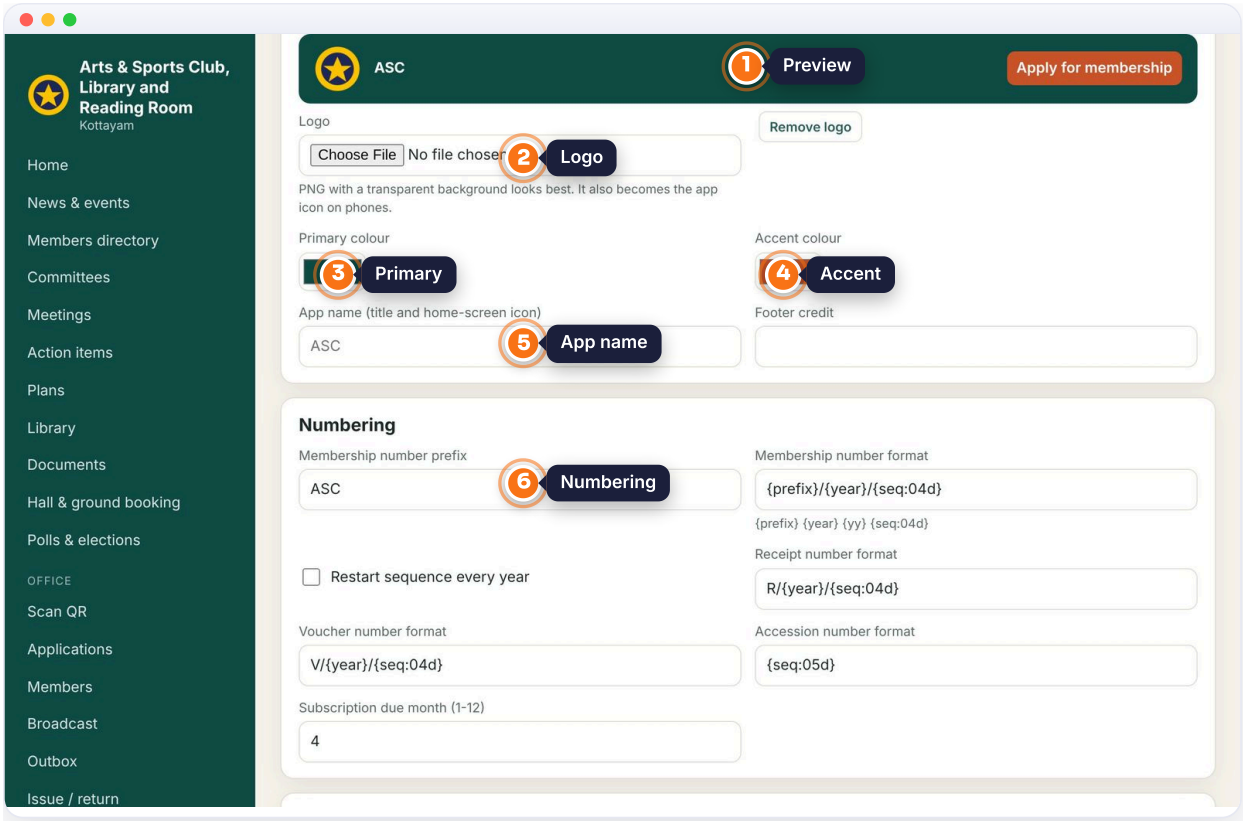
Do Settings before you import the register: the short name and the number format are baked into every membership number you issue.

1. **Club** names in both scripts, short name, registration number, address, phone, e-mail. Tick *Allow self-registration* if people may apply online. List the wards; enter the club's UPI ID so members can pay.
2. **Numbering** membership, receipt, voucher and accession number formats with placeholders ({prefix} {year} {yy} {seq:04d}); whether the sequence restarts each year; subscription due month.

3. **Membership types & fees** life, ordinary, associate, student, honorary — or your own, with admission and annual fees in rupees. These drive dues.
4. **Library** loan period, books per member, fine per day, online renewals; event reminder days.
5. **Website** about text in both languages, map link, social links and a cover photo for the public website.
6. **Branding** logo, primary and accent colour, app name, footer credit (chapter 37 explains).
7. **Communication** channel status and, if the club has its own WhatsApp / SMS / e-mail / Razorpay accounts, their keys.
8. **Save** the button at the bottom saves every card at once.

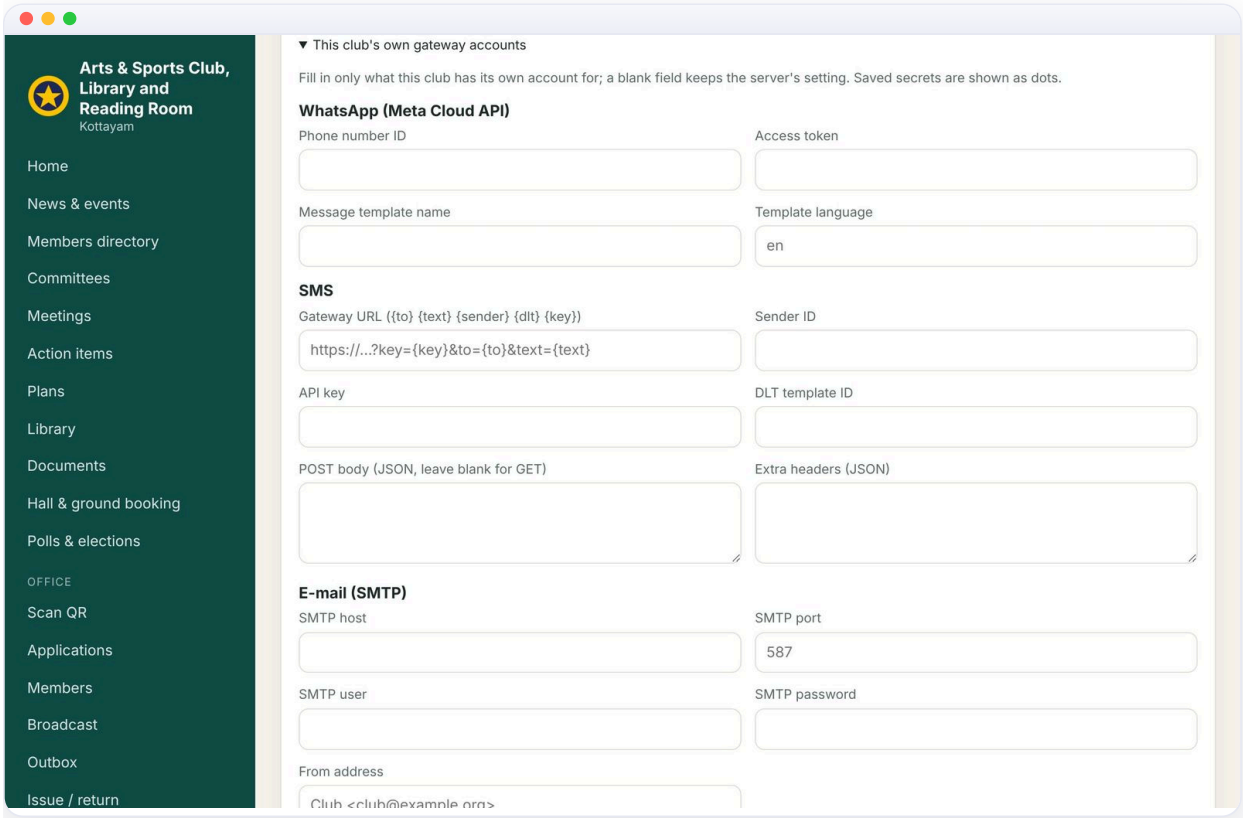


Numbering: the formats and the sequence rule.

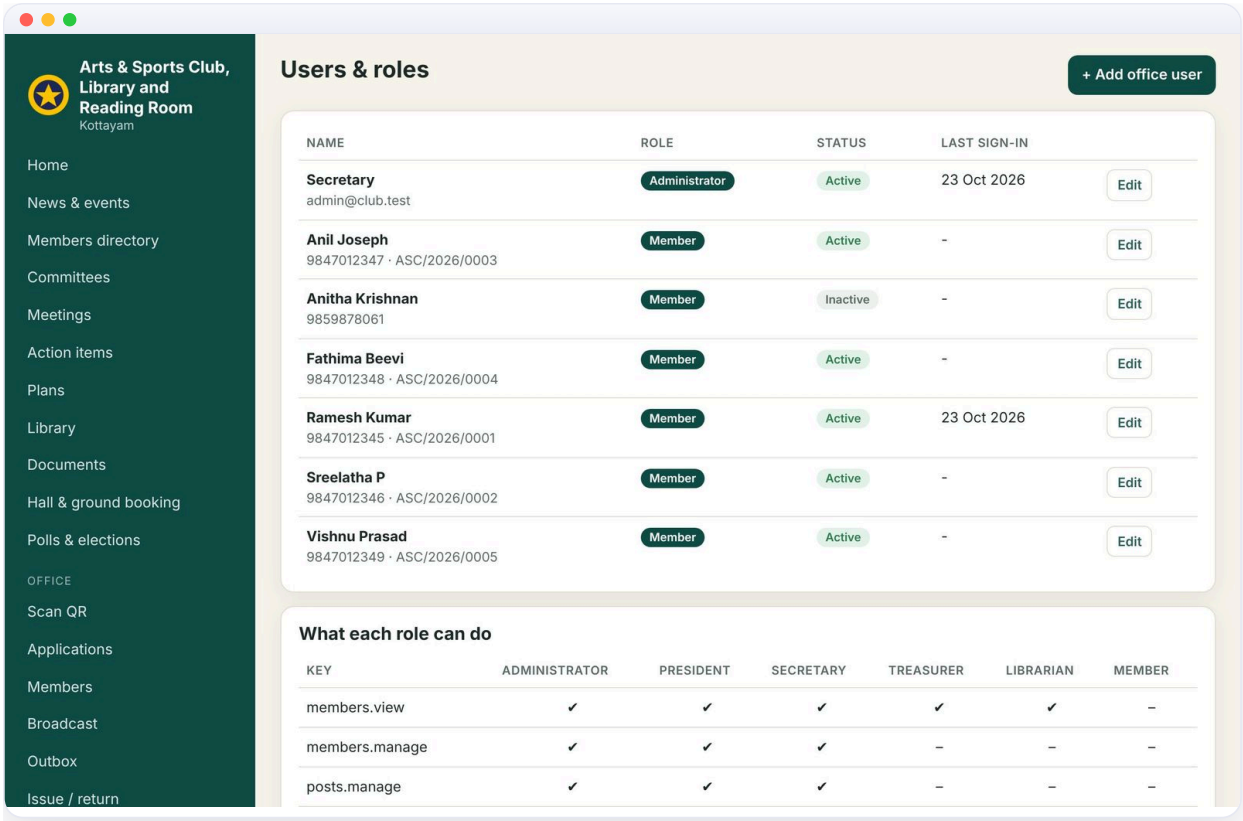


Branding and numbering as the administrator sees them.

1. Shows the primary colour, the logo and the accent button as members will see them.
2. PNG with a transparent background; becomes the phone icon and goes on the e-card.
3. The colour of the sidebar, buttons and the e-card band.
4. The colour of the Apply button, pills and the card stripe.
5. The title and the name on the home screen.
6. The formats that every membership, receipt and voucher number follows.



Communication: pills show which channels are on and whether the club's own account or the server's is in use.



Office → Users: add an office bearer with login, role and, optionally, their member record; reset passwords; deactivate.

Give every office bearer their own login. The audit log then shows who approved, published or recorded what.

PART C · OFFICE

Applications and the members register

17

Approve, number, maintain

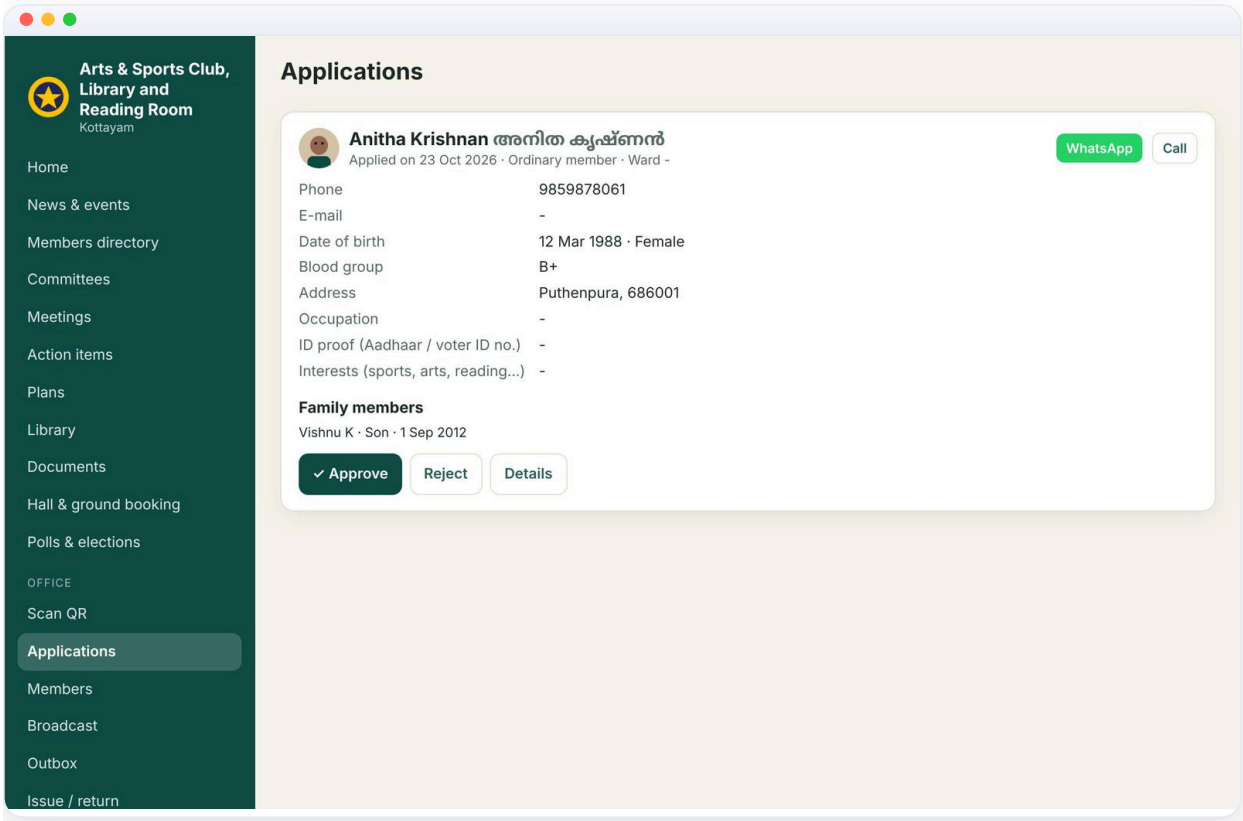
Chapter 17 of 42

+10 XP

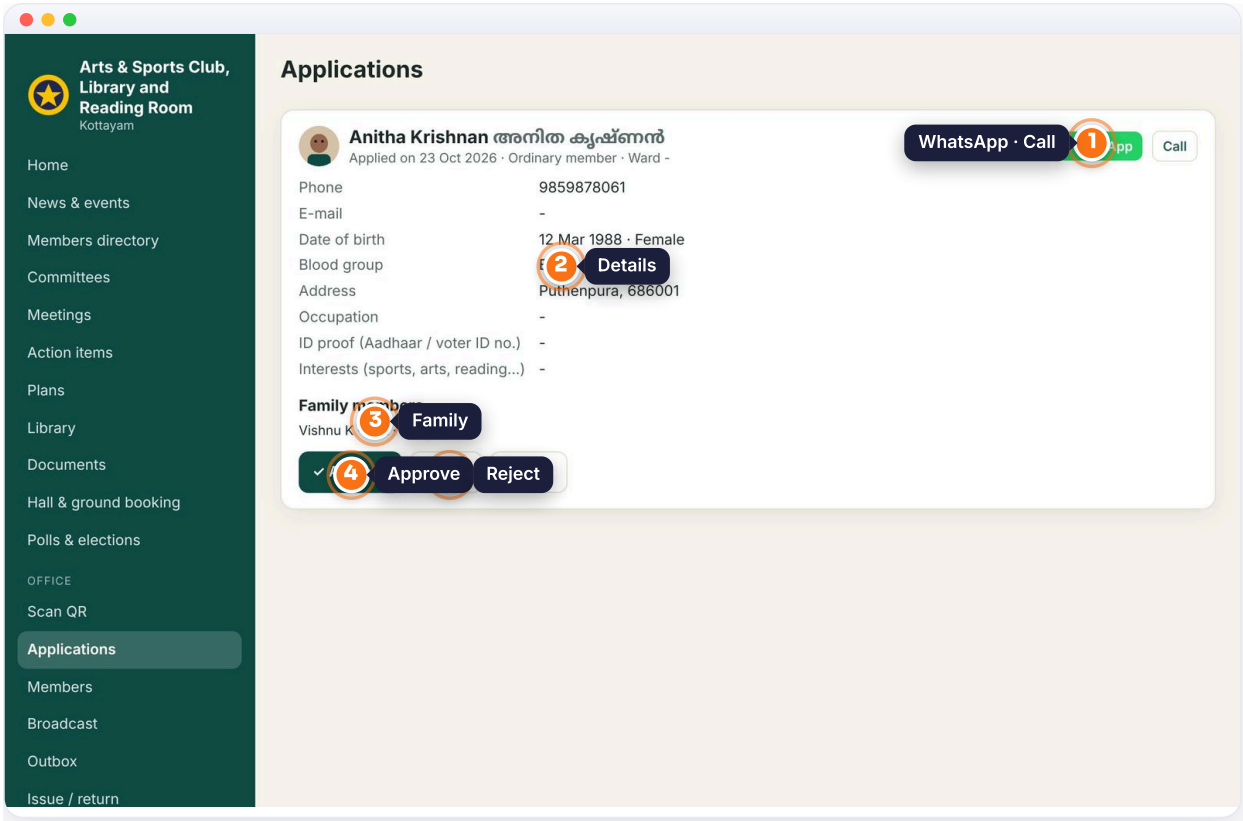
AT A GLANCE

- Approving issues the next membership number and messages the member their number and sign-in.
- The member page holds everything: details, family, payments, books, timeline, e-card.
- The old register can be imported from Excel in one go.

Applied from the phone → **Approve / reject** Office → Applications → **Number issued** format from Settings → **Member messaged** number + sign-in → **Active** on the register

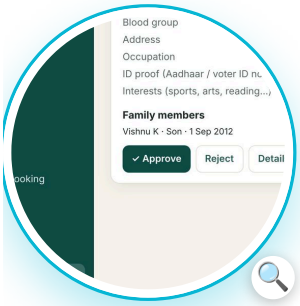


Applications: every pending application with the details it was sent with.



An application waiting for a decision.

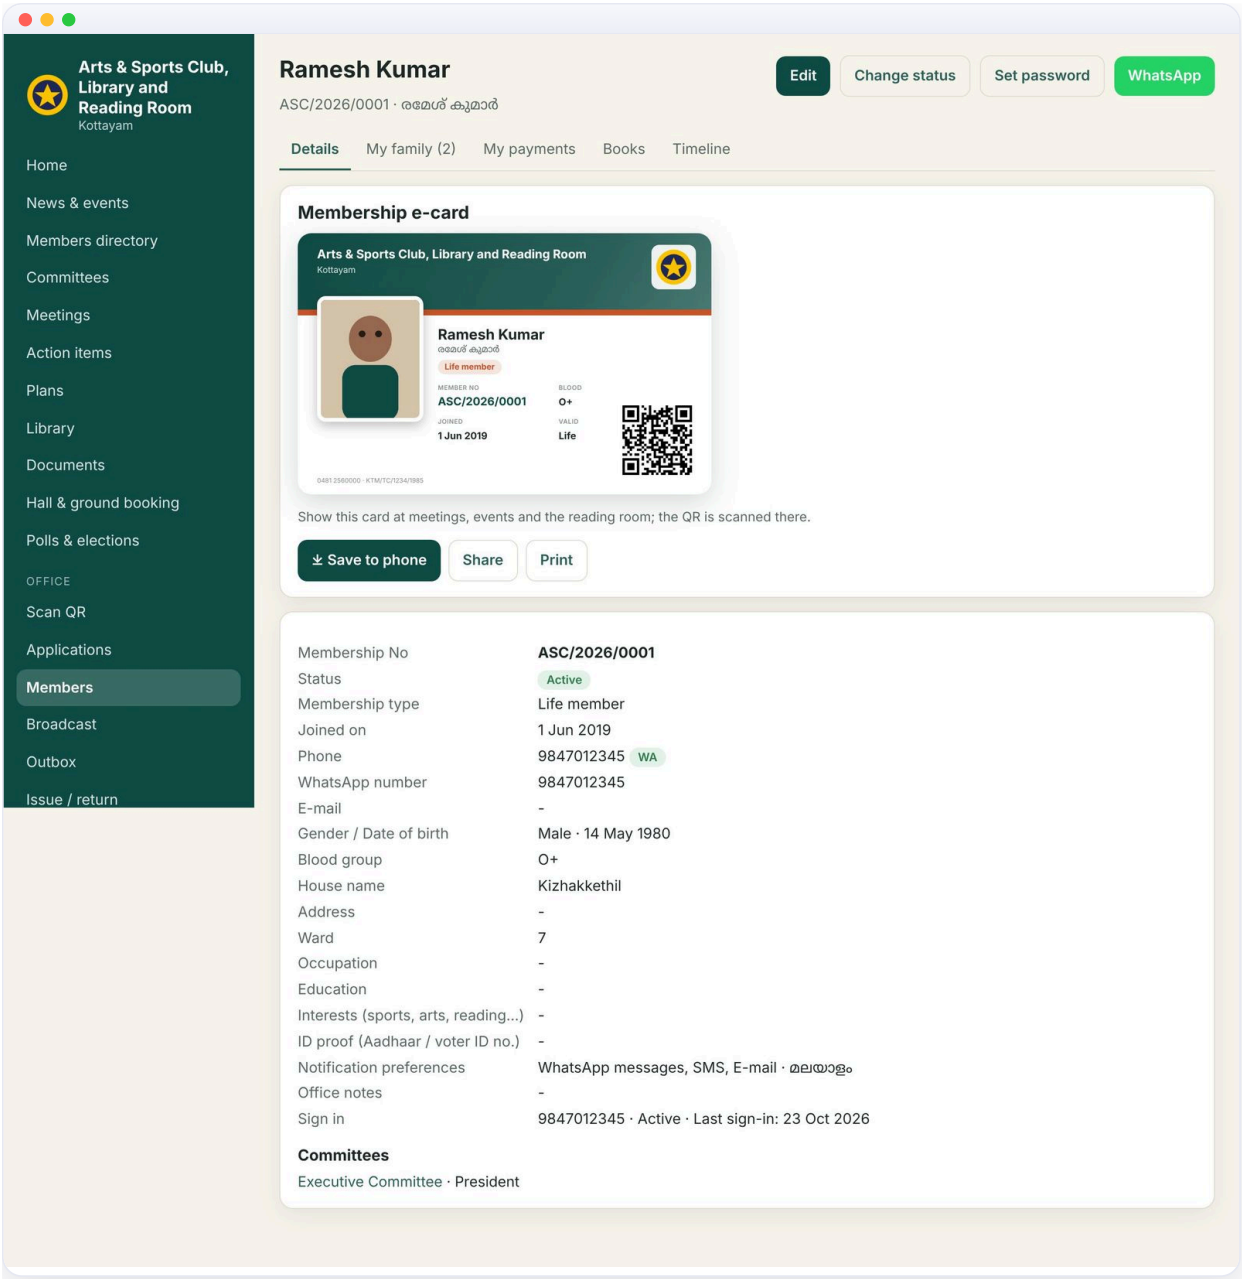
1. Reach the applicant before deciding, straight from the card.
2. Everything from the form, in both scripts.
3. Family members entered on the form, to be verified later.
4. Issues the next number and sends the welcome message with the sign-in.
5. Asks for a reason; the applicant receives it and may apply again.



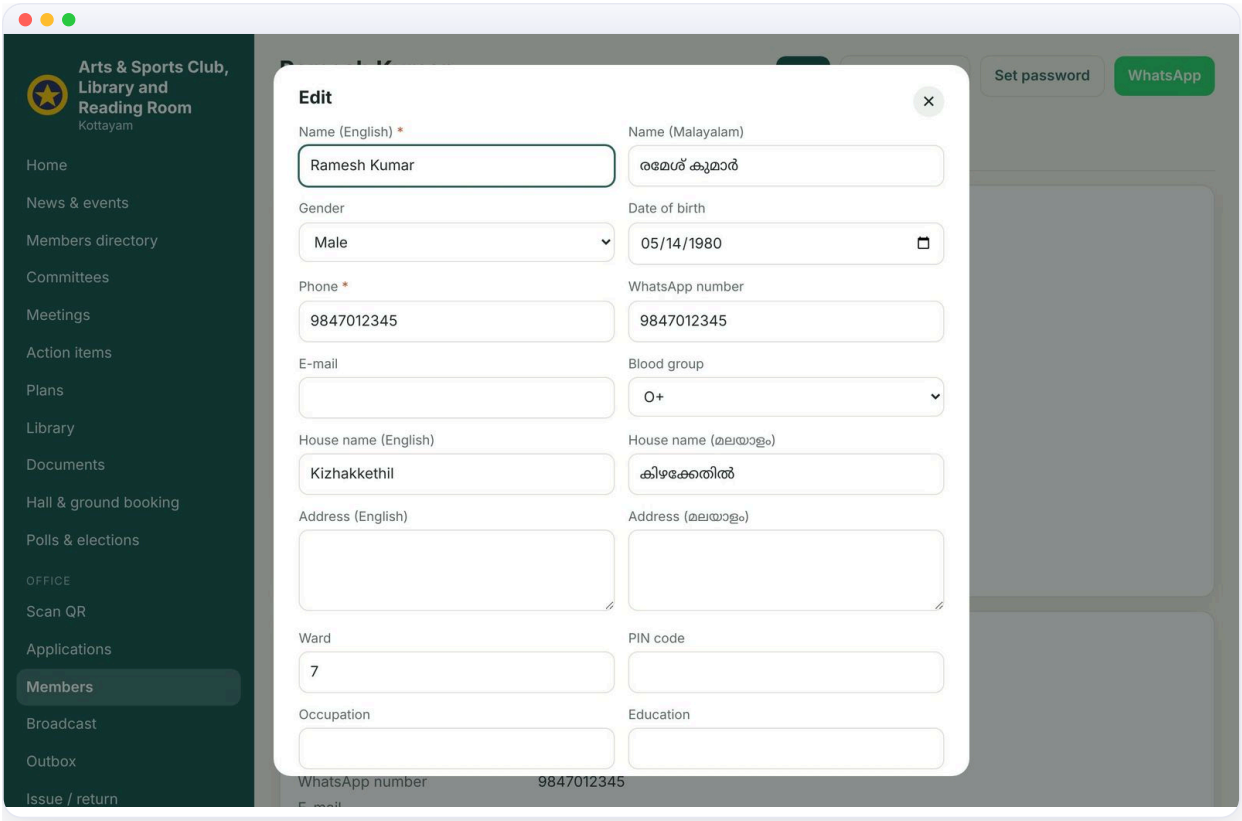
Approve

One click does four things: sets the membership type, issues the next number in the club's format, activates the member, and sends the welcome message with their sign-in.

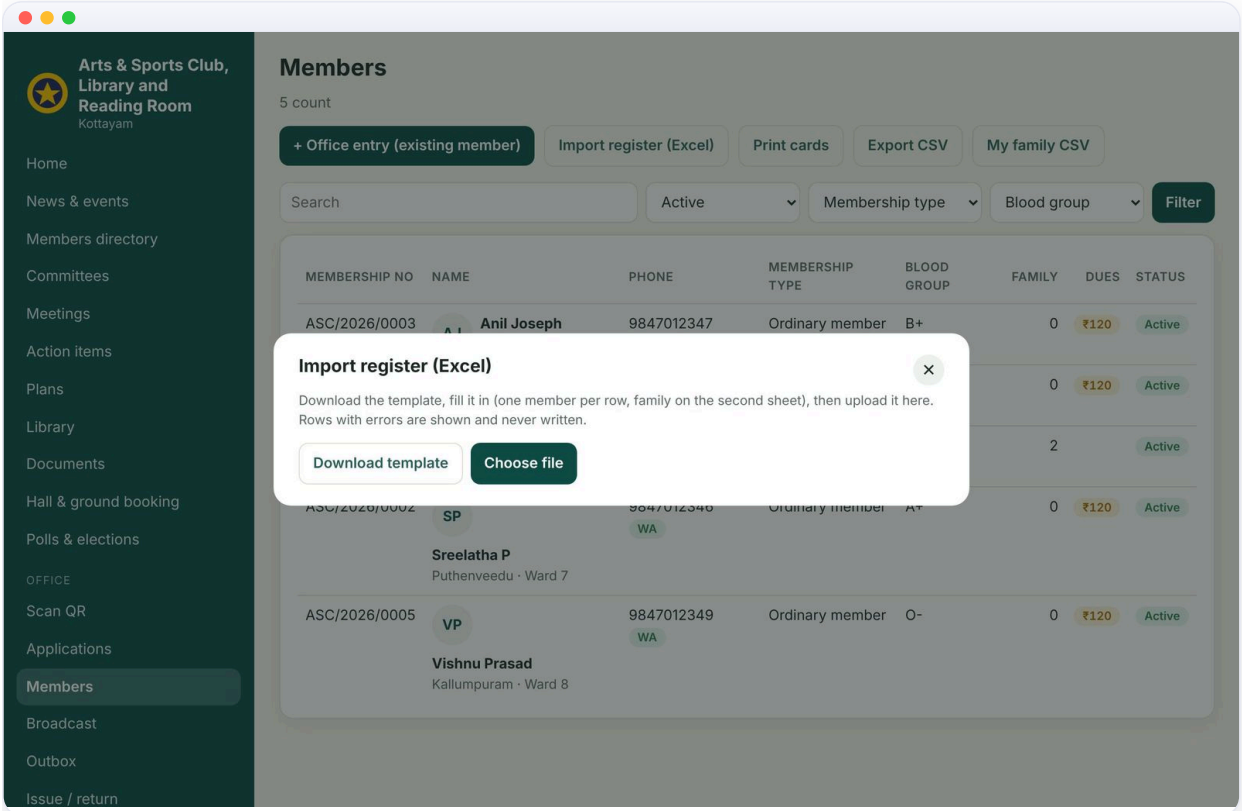
1. **Approve** sets the type (the applicant's choice can be changed), issues the number and sends the welcome message.
2. **Members** the register with search and filters (status, type, ward, blood group); export to CSV; print e-cards for a filter.
3. **Member page** tabs for details, family, payments, books and the timeline; buttons to edit, change status (active, inactive, expelled, deceased), set a password, and WhatsApp the member.
4. **Family** add or verify family members; each verified family member can be registered for events.
5. **Import register** download the Excel template, fill it (one row per member, number optional), upload; members get their numbers and can sign in with their phone and a first password you set.



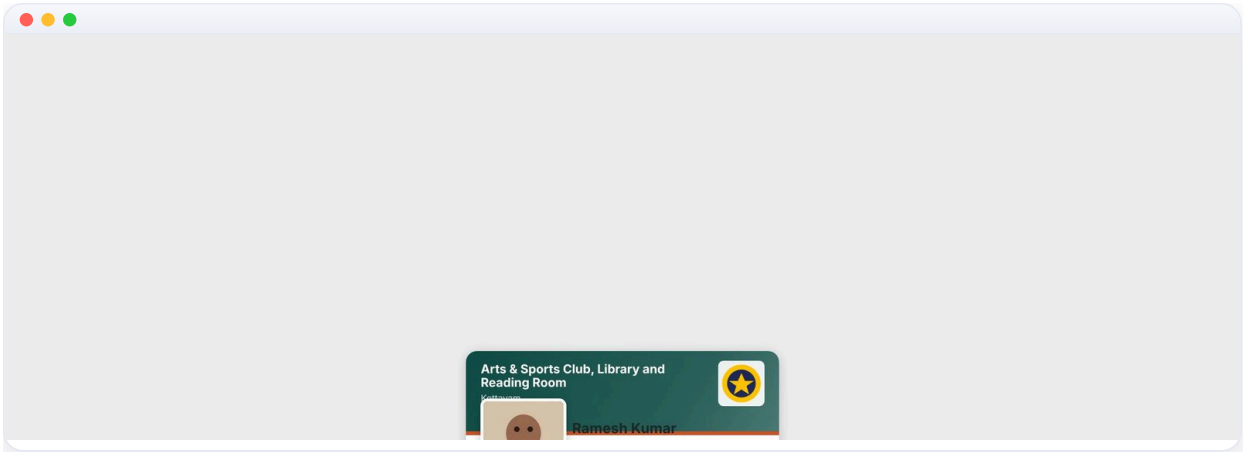
A member's page with the e-card, details, committees and the action buttons.



Editing a member: both scripts, contact, address, type, photo, notes for the office.



Import register: the Excel template and the upload; a preview reports problems before anything is written.



Print cards: credit-card size, two per row, with crop-friendly margins; one member or a whole filter.

⚠ Changing a member's status to *inactive* keeps every record; *expelled* and *deceased* also stop messages. Nothing is deleted.

MISSION
+30 XP

Mission 5 · The register

- [ ] Approve one application and watch the welcome message appear in the Outbox
- [ ] Edit a member's photo and open their e-card
- [ ] Download the import template and look at its columns

PART C · OFFICE

Publishing news, events and competitions

18

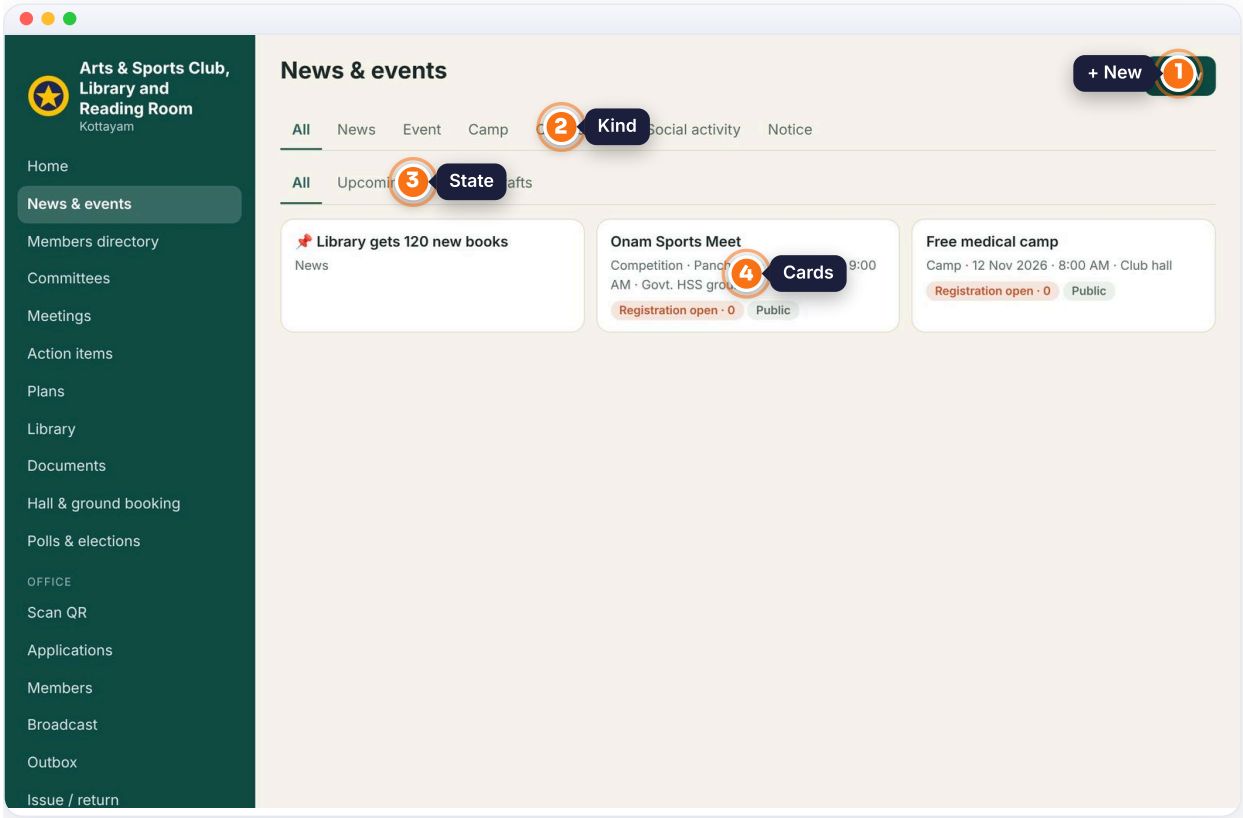
One post, every channel

Chapter 18 of 42

+10 XP

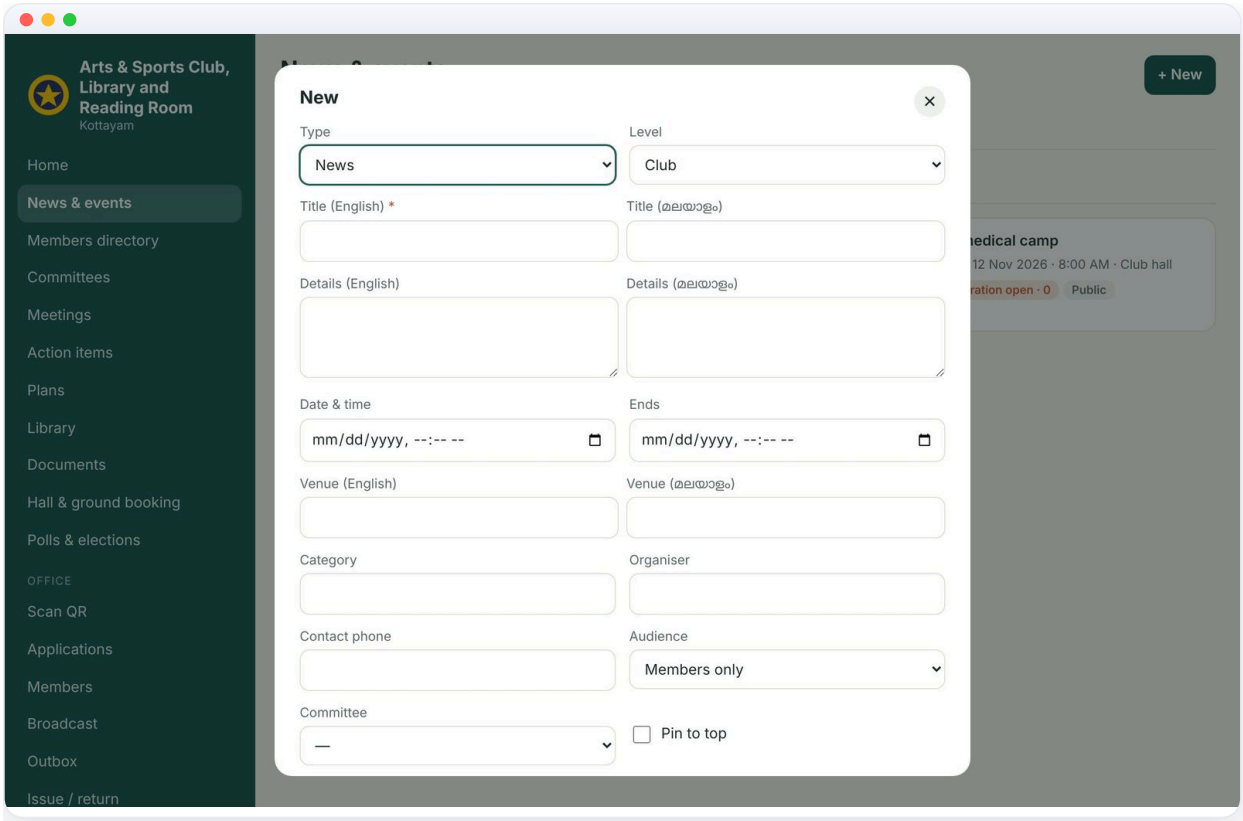
AT A GLANCE

- A post can be news, an event, a camp, a social activity or a competition, with dates, venue, fee and registration.
- Publish and notify sends it to the chosen audience by WhatsApp, SMS, e-mail and push in one click.
- Competitions carry items, teams, fixtures, judges, scores and a points table; results are published to everyone.



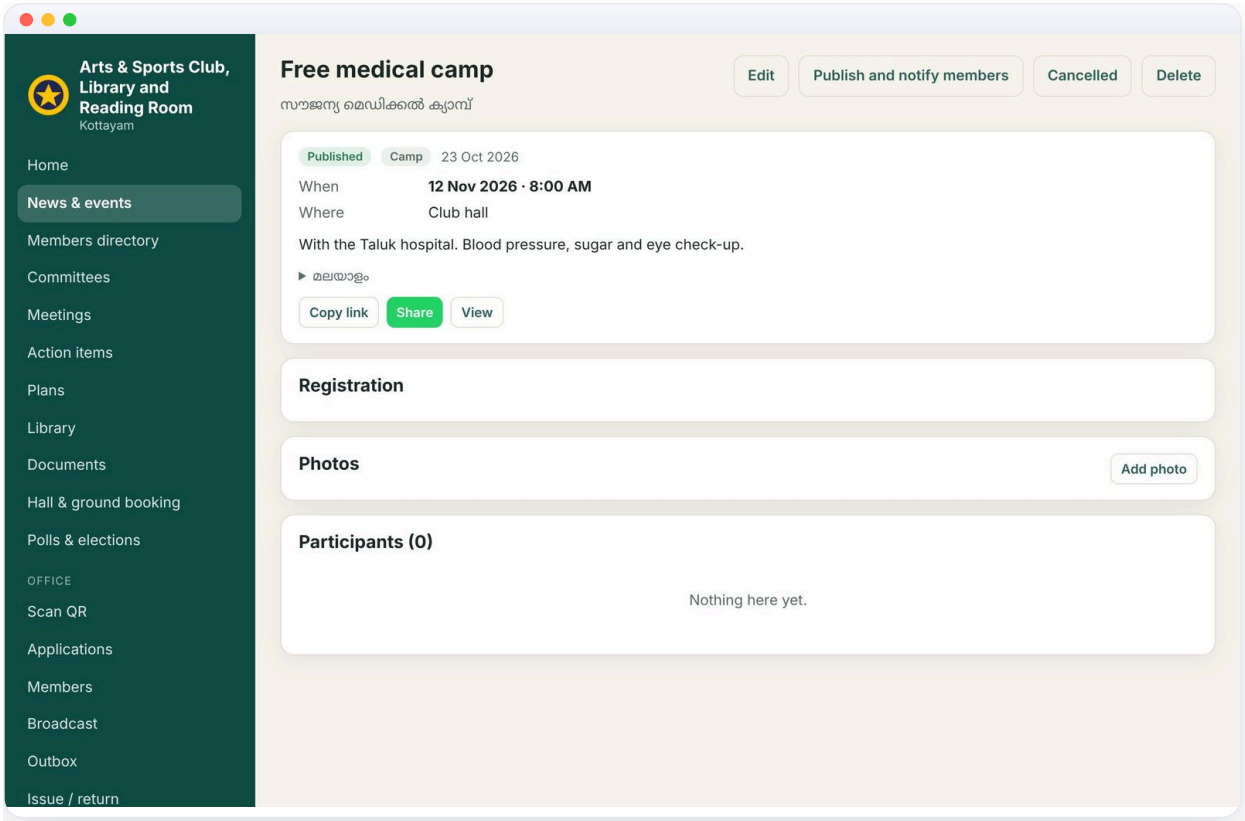
News & events for the office: drafts and published posts, with registrations and results.

1. Start a post: news, event, camp, competition, social activity or notice.
2. Filter by kind.
3. All, upcoming, past, drafts.
4. Each post with its registration count and whether it is public.

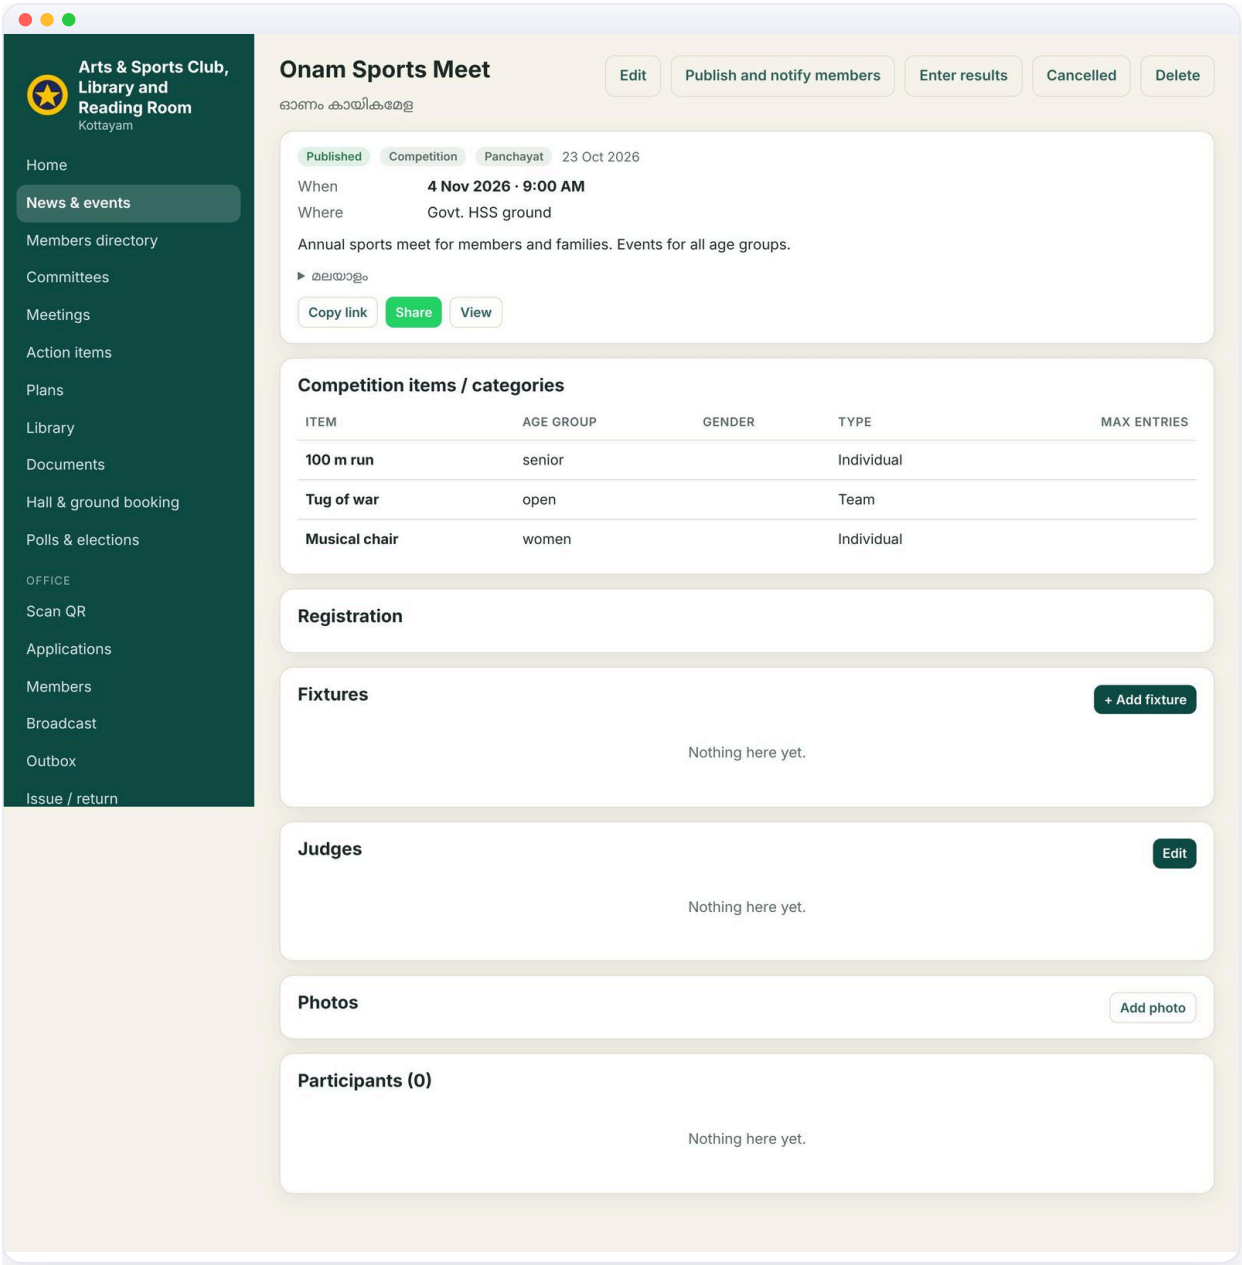


The post form: kind, title and body in both scripts, when and where, registration (limit, fee, family allowed), audience, cover photo, judges for competitions.

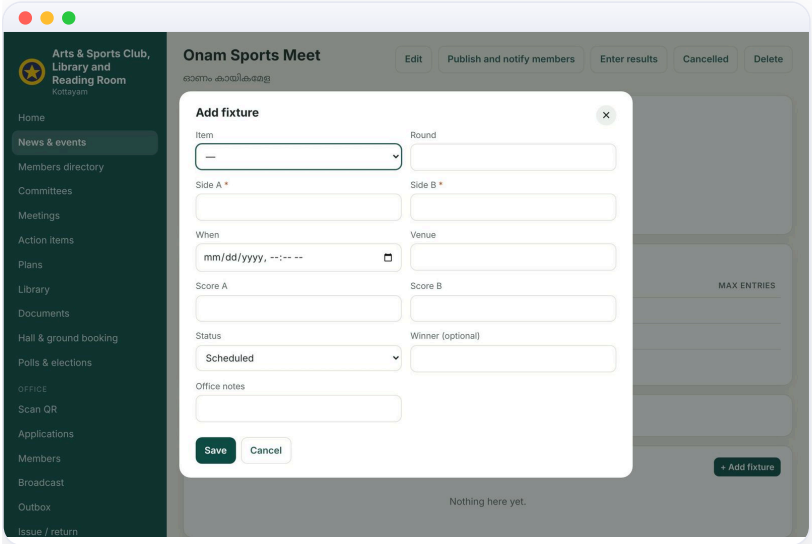
1. **New post (+)** choose the kind; fill the title and body in English and Malayalam (the member's language is used).
2. **Registration** tick *Registration open*, set a limit and a fee if any; family members may be allowed.
3. **Publish and notify** pick the audience (all members, a type, a ward, a committee, blood group…) and the channels; the outbox does the rest.
4. **Registrations** the list with participants, item and payment; mark attendance; export.
5. **Fixtures and judging** for competitions add fixtures (date, teams, venue), name judges from the members; judges score on their phones; the points table updates.
6. **Results** enter or publish results; members are notified and the public page shows them.



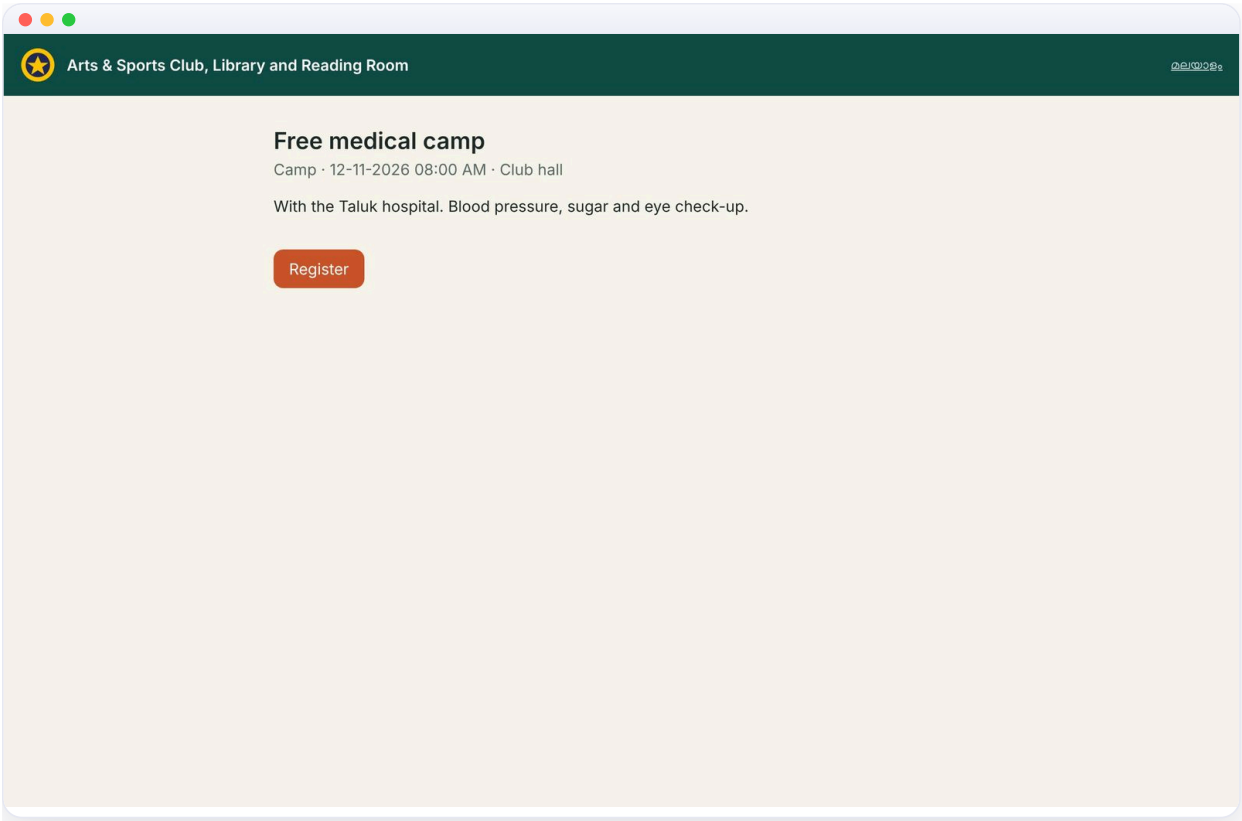
An event as the office sees it: registrations, attendance and the public link.



A competition: items, fixtures, judges, scores and the points table.



Adding a fixture.



The public page of an event, shareable to WhatsApp groups, with a Register button.

DID YOU KNOW?

Publish and notify writes one outbox row per member per channel. For 300 members on WhatsApp, SMS and app that is 900 rows, sent in the background while you carry on working.

KEEP WHATSAPP PRECIOUS

Publish news without notification for small updates; keep WhatsApp for things members must act on. Members notice the difference.

MISSION

Mission 6 · Publish +30 XP

- [ ] Create an event with registration open and a fee
- [ ] Publish and notify a small audience (one ward)
- [ ] Register a member for it and mark them attended

PART C · OFFICE

Committees, meetings, minutes, actions and plans

19

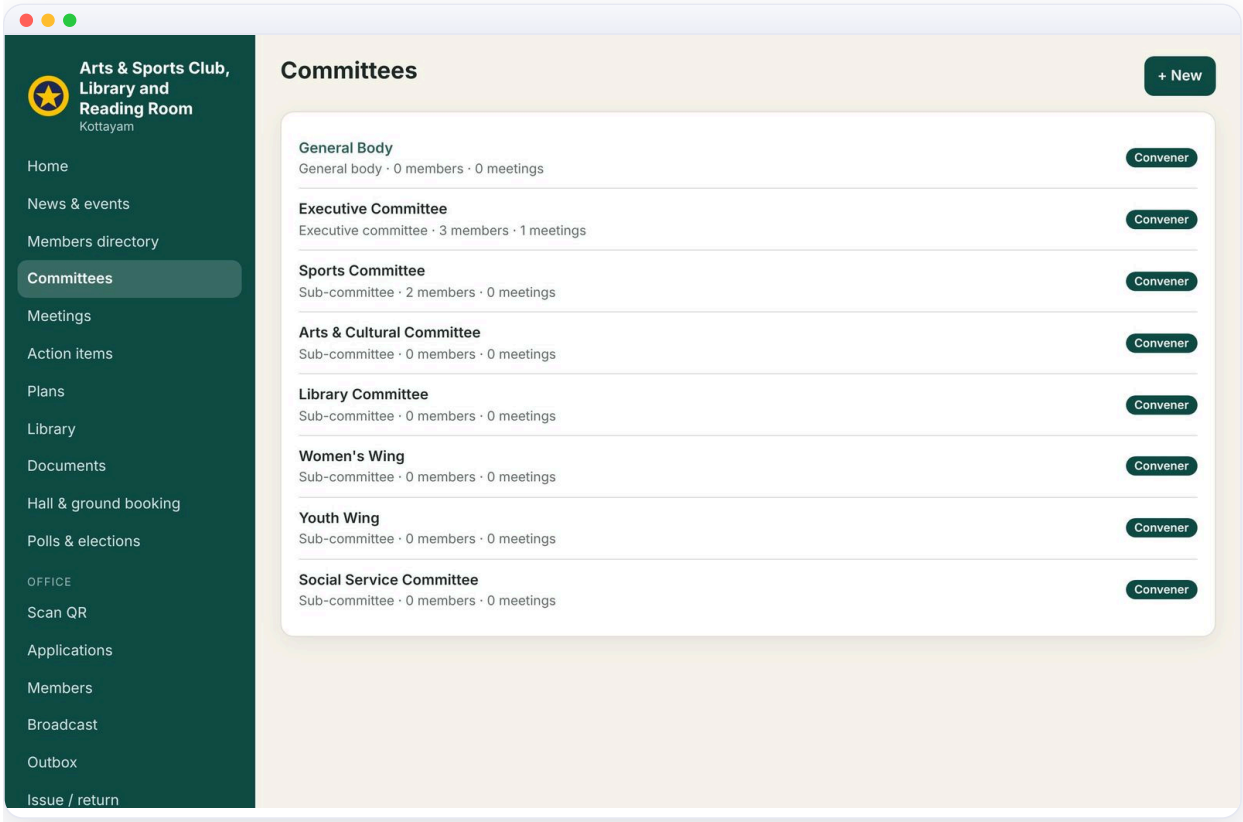
Governance without paper

Chapter 19 of 42

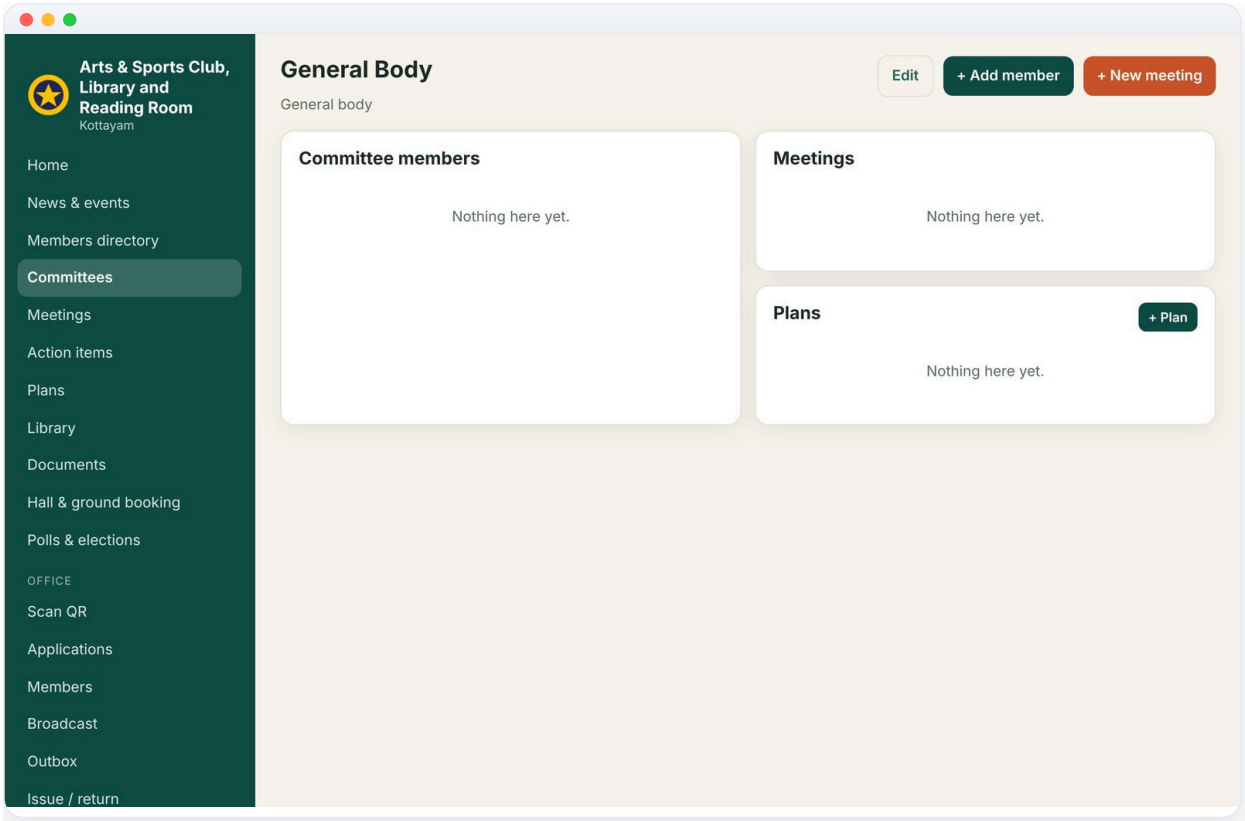
+10 XP

AT A GLANCE

- Committees hold members with designations; the executive committee's office bearers appear on the public website.
- A meeting has a notice, agenda, attendance, minutes (MoM) with decisions and resolution numbers, and action items.
- Plans are the year's programmes with owners, budgets and status.

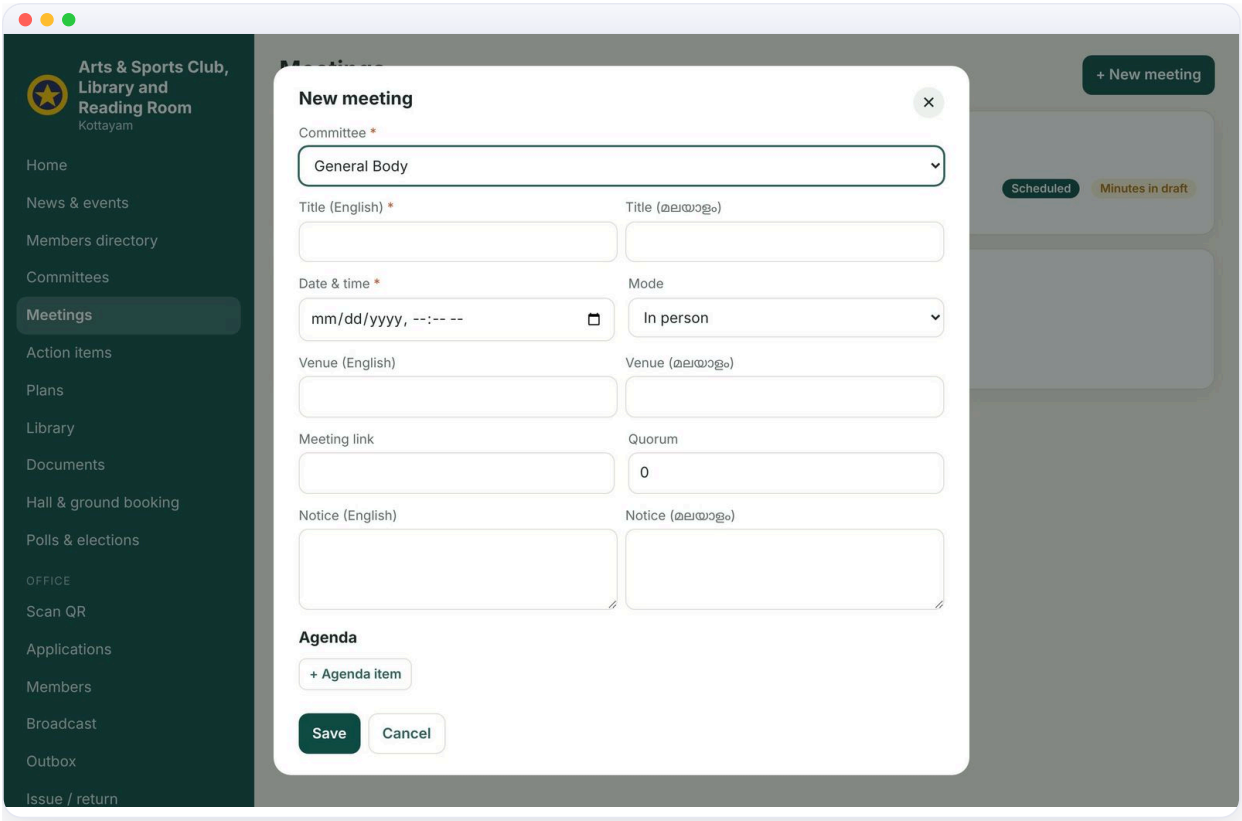


Committees: the executive committee and sub-committees, each with its members and conveners.

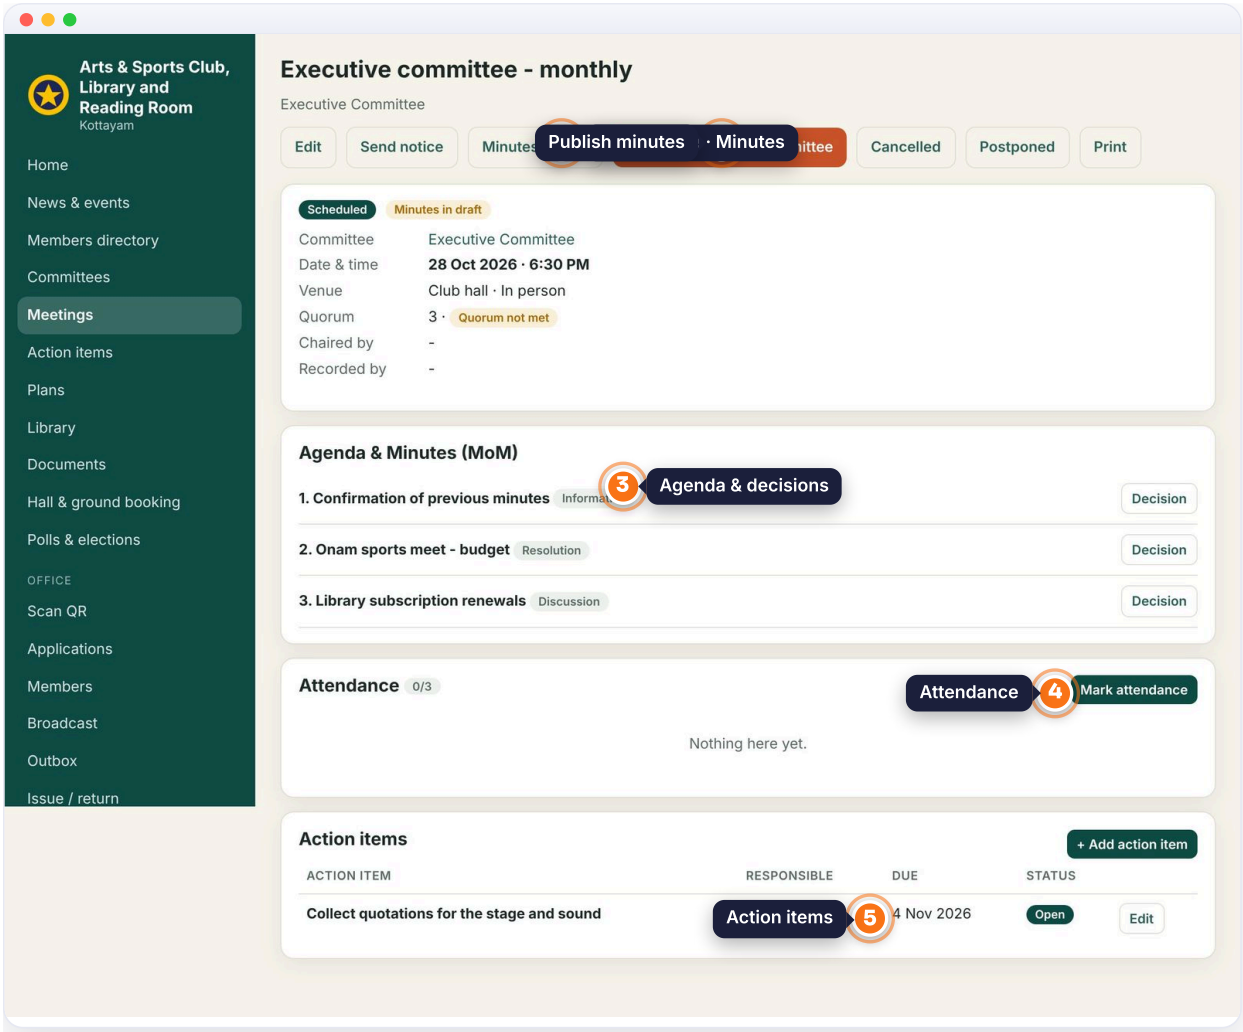


A committee's page: members with designations and terms, its meetings and plans.

1. **New meeting** committee, date and time, venue, mode (in person, online, hybrid), quorum; add agenda items with a type (information, discussion, resolution).
2. **Send notice** the notice goes to the committee members on their channels; general body meetings go to every member.
3. **Attendance** mark present / absent / apology; the quorum pill turns green.
4. **Minutes** write the decision under each agenda item; resolutions get a running number; record who chaired and who recorded.
5. **Publish minutes** to the committee (or to all members for a general body); members are notified and the PDF-style print is available.
6. **Action items** assign to a member with a due date; they are reminded, and the dashboard counts overdue ones.
7. **Plans** the year's programmes with owner, budget, dates and progress; linked to the meetings that approved them.

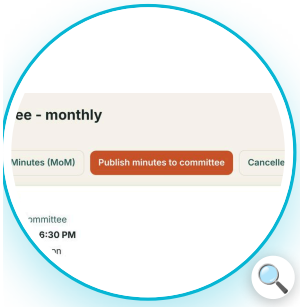


Scheduling a meeting with its agenda.



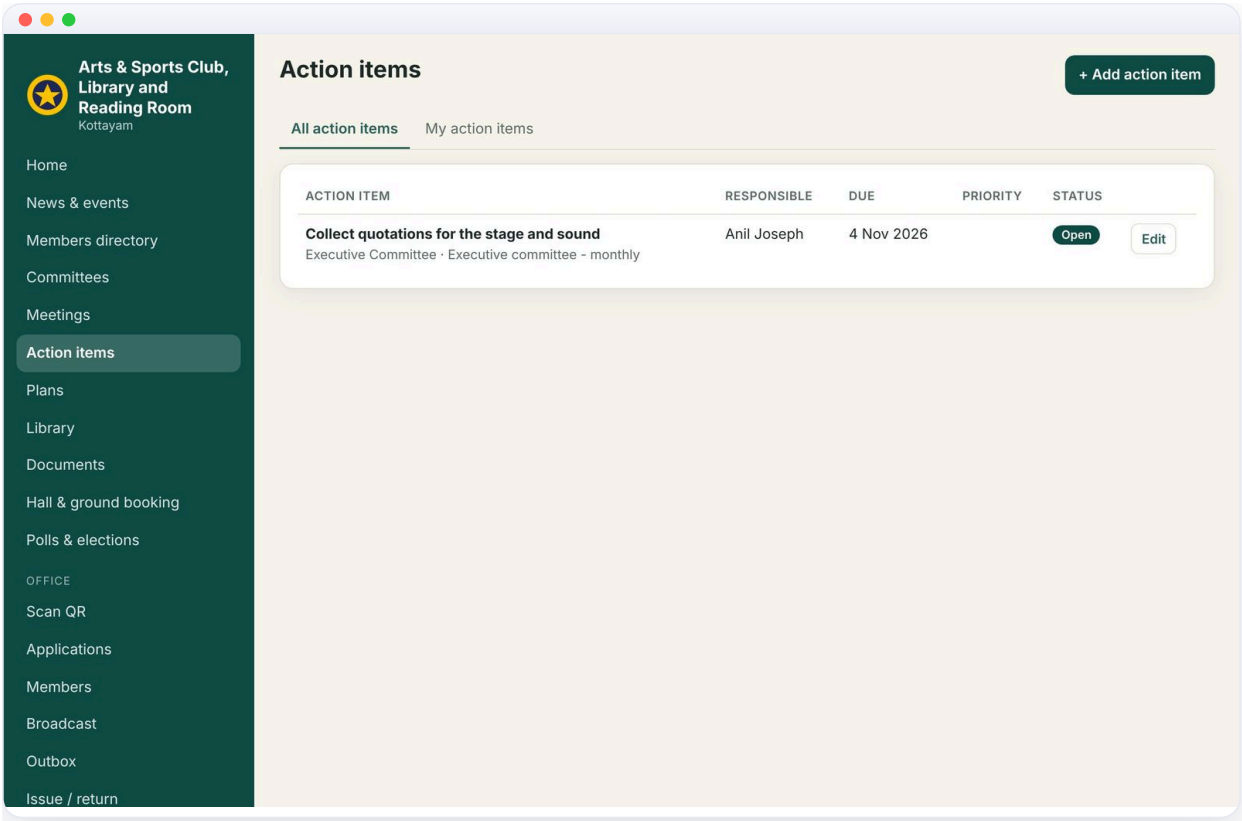
A meeting page: status, agenda with decisions, attendance and action items.

1. The meeting's tools, in the order you use them.
2. Sends the minutes to the committee; the status pill turns green.
3. One decision per item; resolutions get a running number.
4. Mark present / absent / apology; the quorum pill reacts.
5. Who does what by when; the dashboard counts overdue ones.

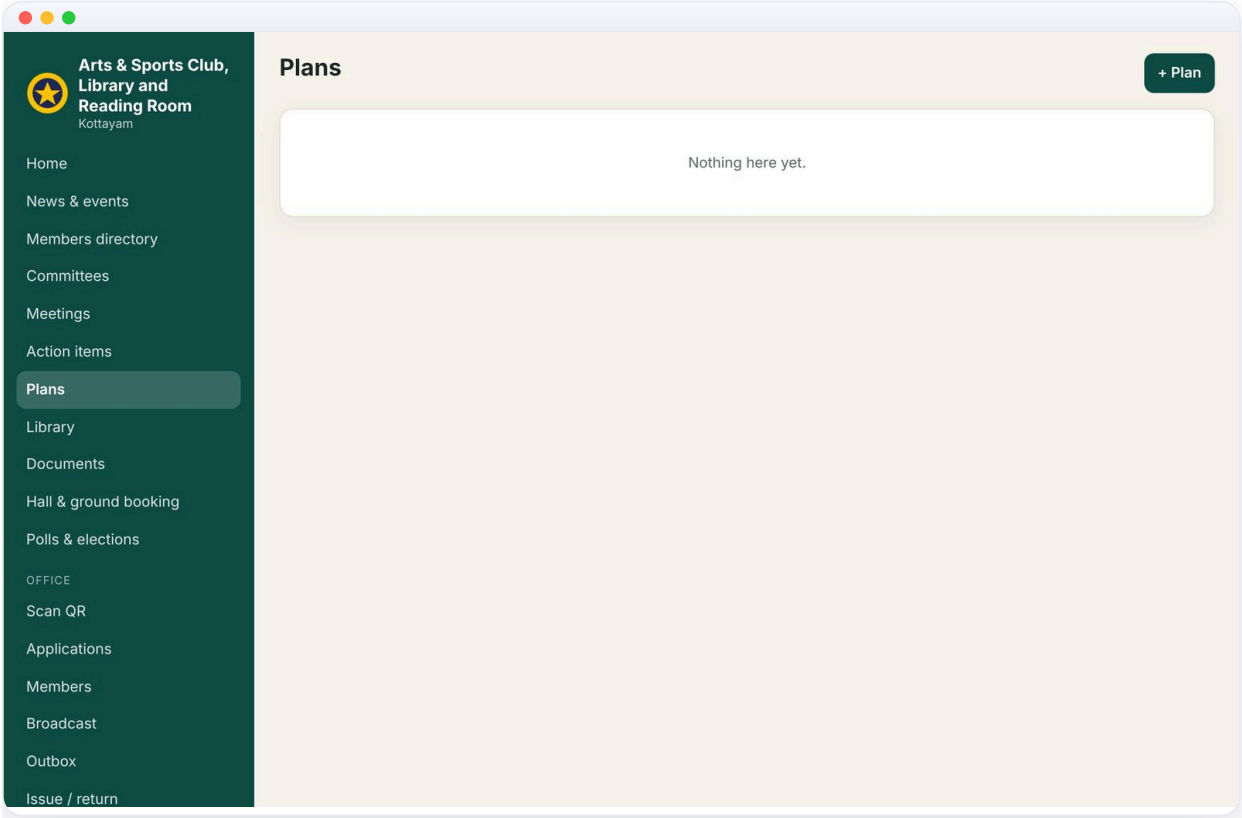


Publish minutes to committee

The one button that turns a draft into the official record: members of the committee are notified, the print view becomes available and action items start their reminders.



Action items across all meetings, with owner, due date and status.



Plans: programmes, owners, budgets and progress.

MISSION

+40 XP

Mission 7 · A meeting end to end

- [ ] Schedule a meeting with three agenda items and send the notice
- [ ] Mark attendance and write one decision per item
- [ ] Publish the minutes and assign one action item

PART C · OFFICE

The library desk

20

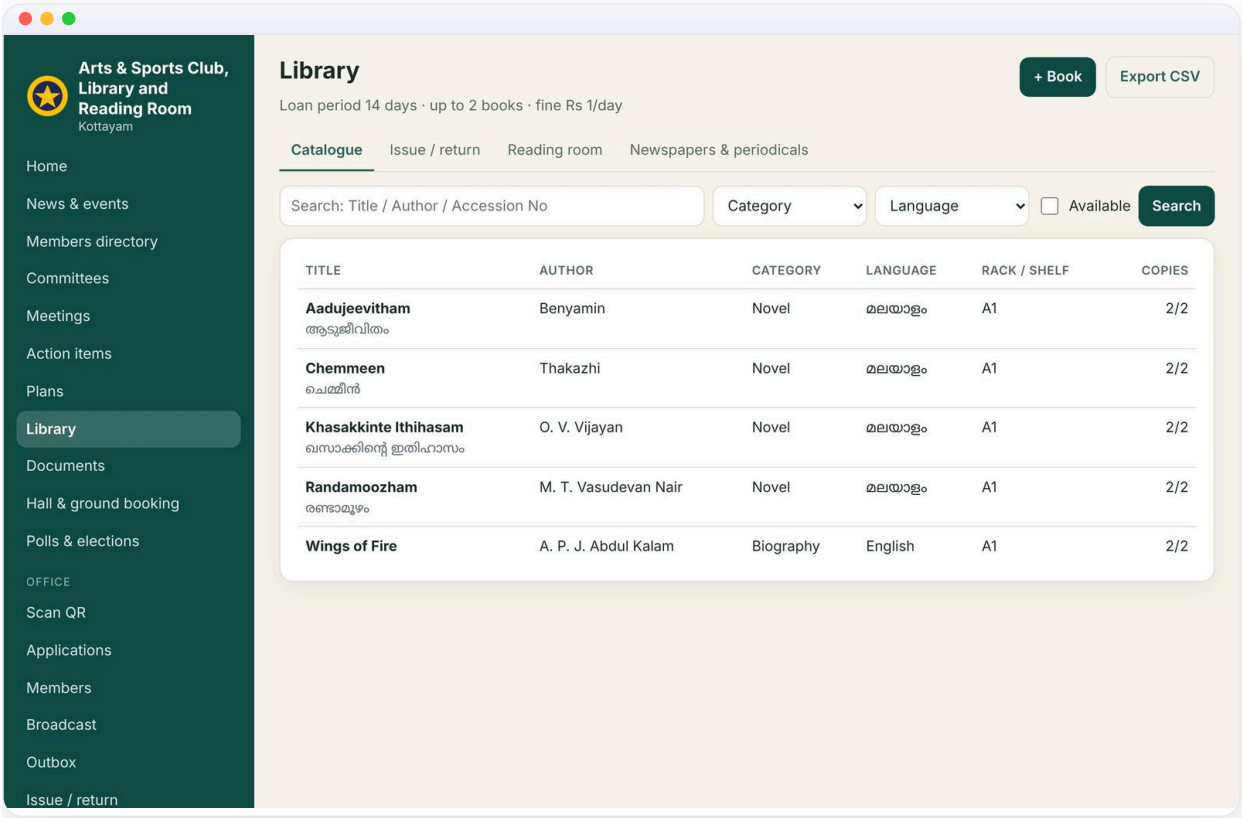
Catalogue, circulation, reading room, periodicals

Chapter 20 of 42

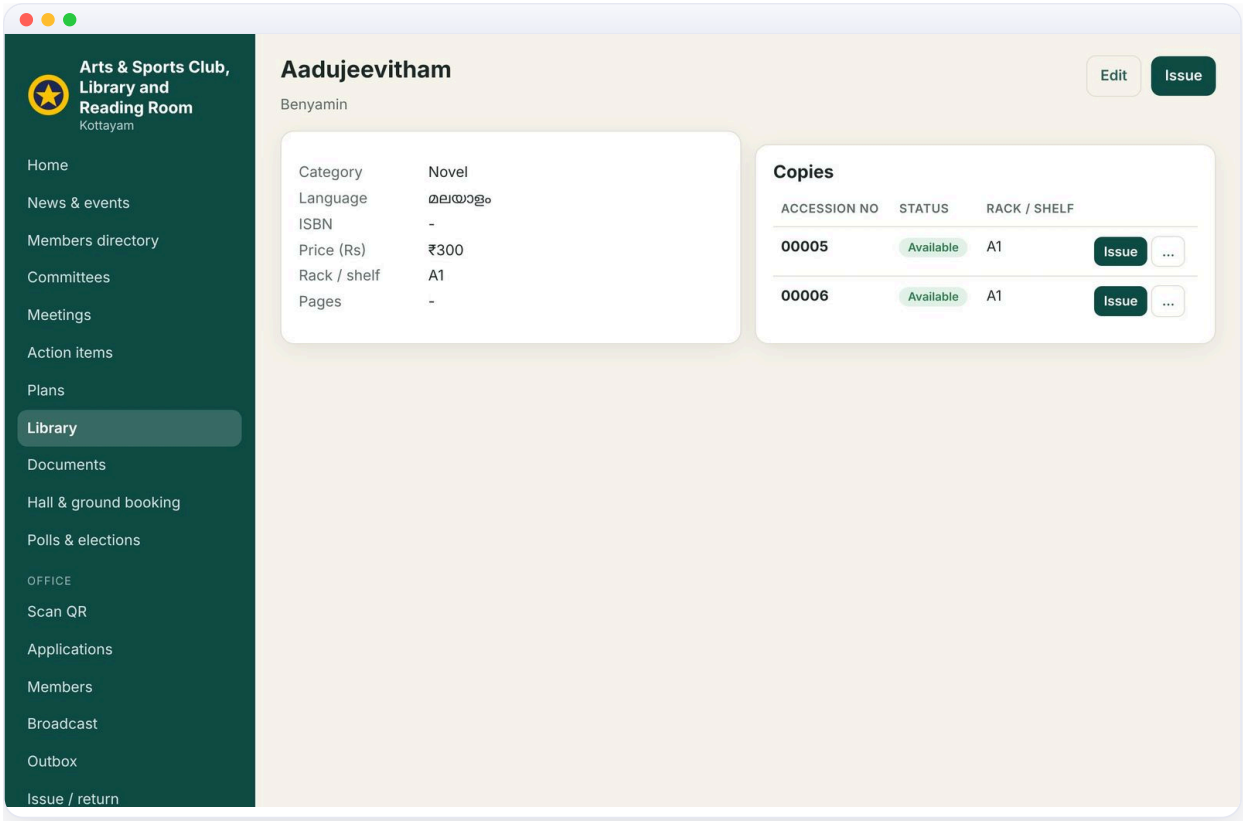
+10 XP

AT A GLANCE

- Books have an accession number each; copies are tracked separately.
- Issue, return and renew with the member's number or by scanning the e-card; fines are computed from Settings.
- The reading room register and the periodicals subscriptions live here too.

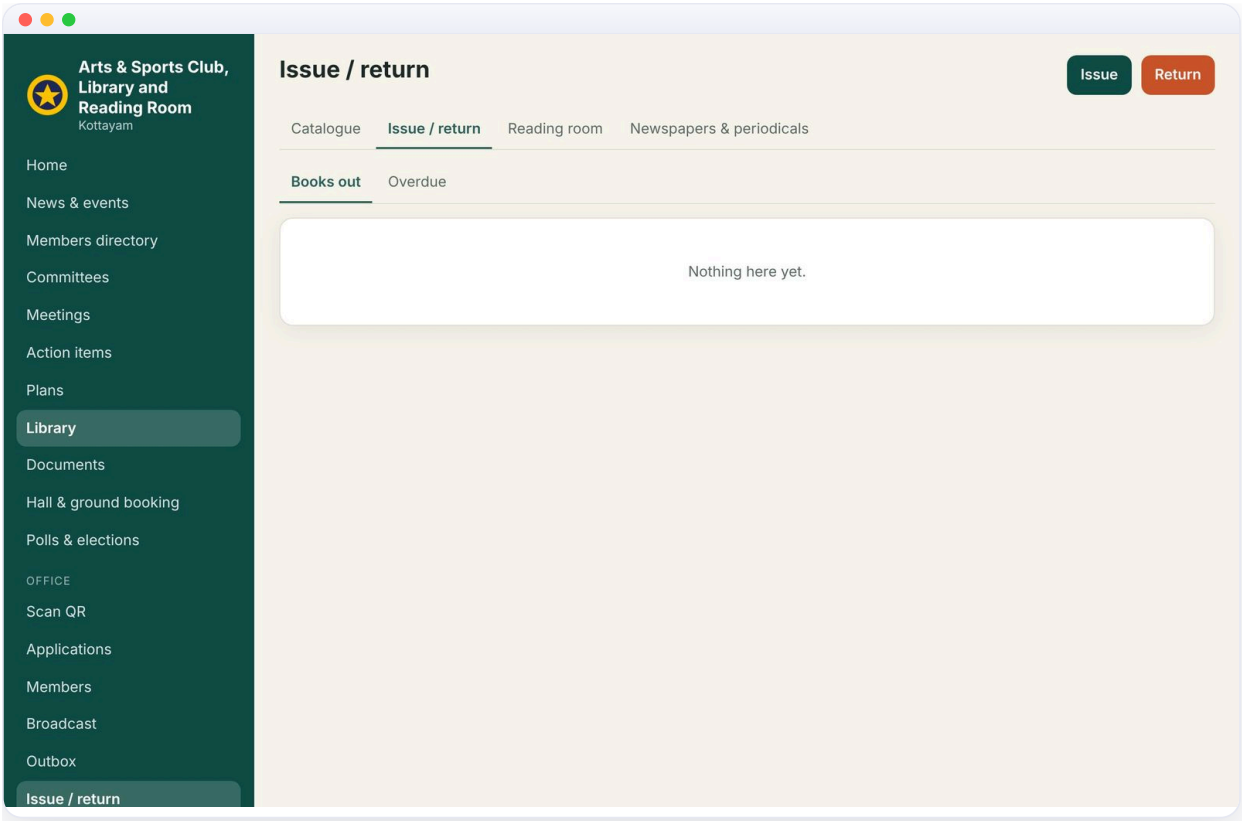


The catalogue for the librarian: add books, copies, categories; search; reservations waiting.

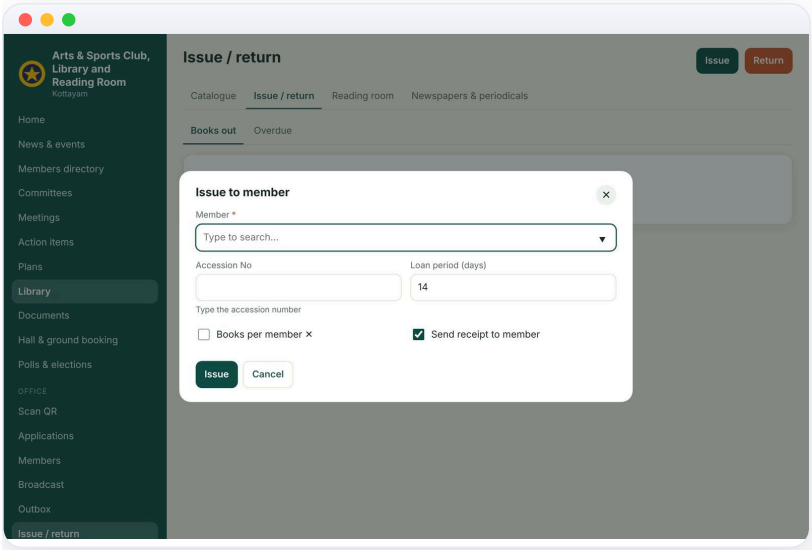


A book: copies with accession numbers and status, current loans, reservations and history.

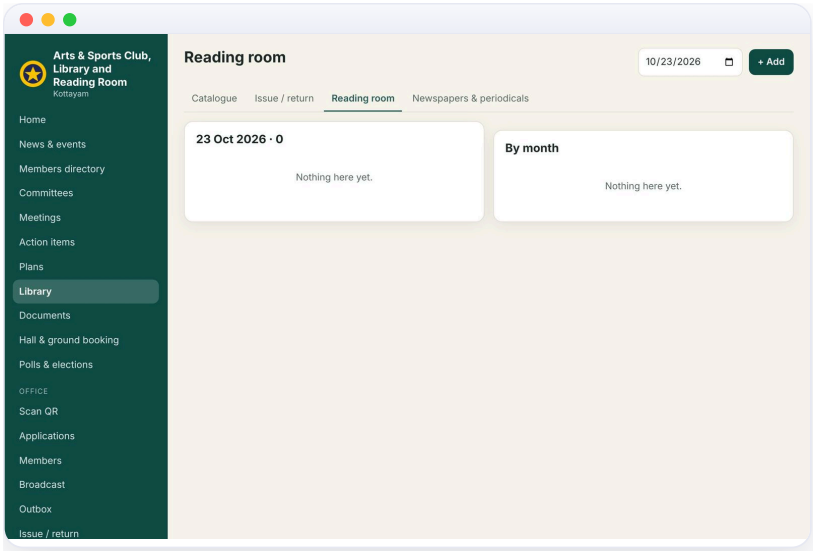
1. **Add book** title in both scripts, author, publisher, year, category, language, price; copies get accession numbers from the format in Settings.
2. **Issue / return** pick the member (or scan the QR), then the copy; due dates follow the loan period; *Return* computes any fine and records it under the member's dues.
3. **Renew** once online by the member, or at the desk; blocked when the book is reserved.
4. **Reservations** when a copy returns the first reserver is messaged and the copy is held.
5. **Reading room** a daily register of visitors; scanning the e-card records the visit.
6. **Newspapers & periodicals** subscriptions with vendor, period and cost; a renewal reminder before they lapse.



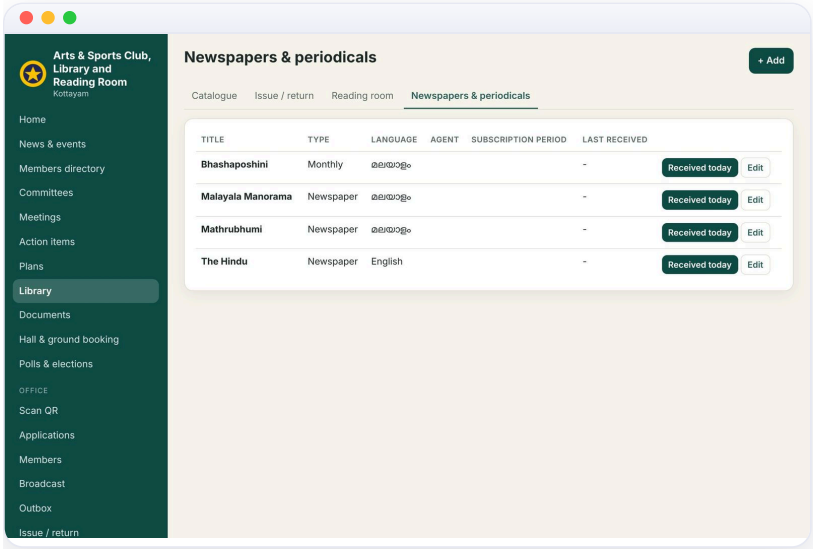
Issue / return: today's loans and returns, overdue items highlighted.



Issuing a book to a member.



The reading room register.



Newspapers and periodicals.

LIBRARIAN'S TIP

Print the accession numbers as labels from the catalogue; the issue desk then scans books as fast as e-cards.

MISSION
+30 XP

Mission 8 · The desk

- [ ] Add a book with two copies
- [ ] Issue one copy to a member and return it after the due date to see the fine
- [ ] Record a reading-room visit by scanning an e-card

PART C · OFFICE

Accounts, dues and payments

21

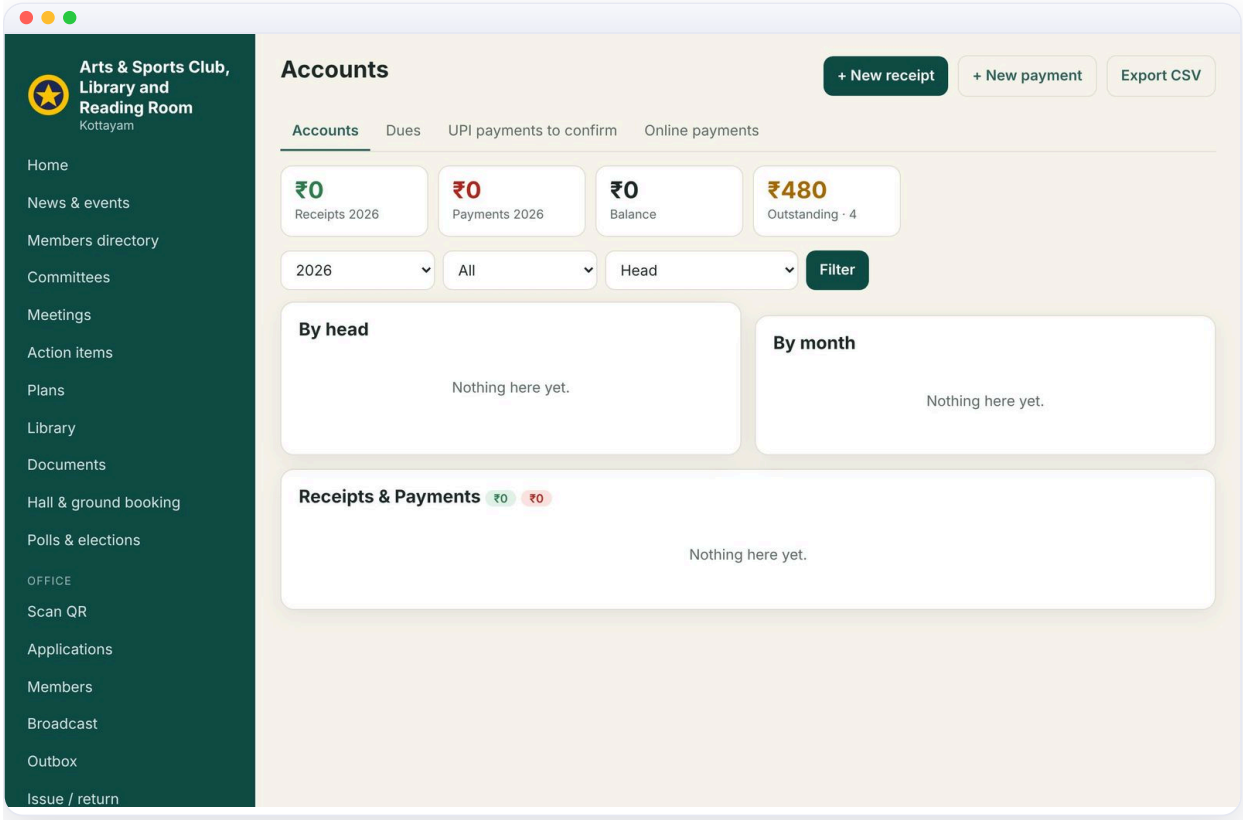
Receipts, vouchers, UPI and online

Chapter 21 of 42

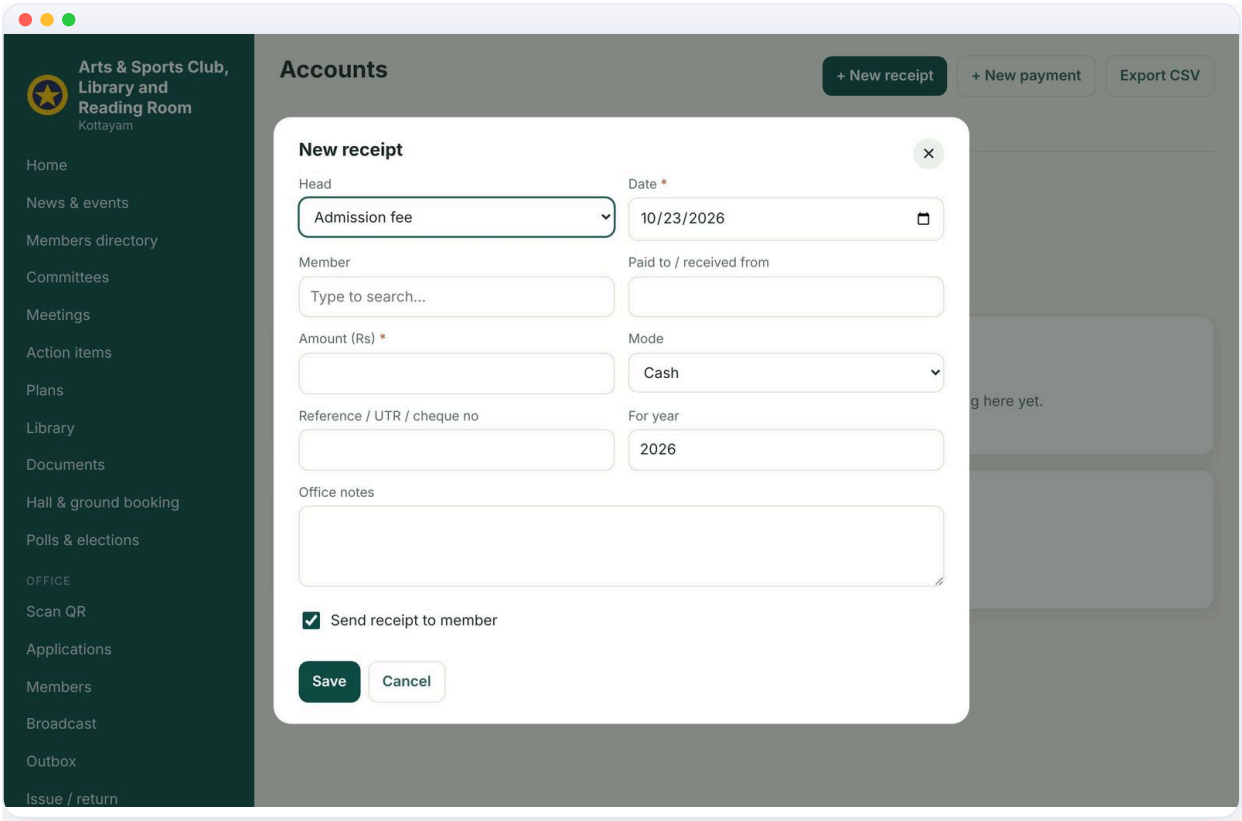
+10 XP

AT A GLANCE

- Every rupee in or out is a receipt or a voucher under a standard head (admission, subscription, donation, event fee, rent, salary…).
- Dues are computed from membership types and the subscription year; reminders go automatically.
- Members' UPI claims are confirmed by the treasurer; online payments through Razorpay settle themselves.

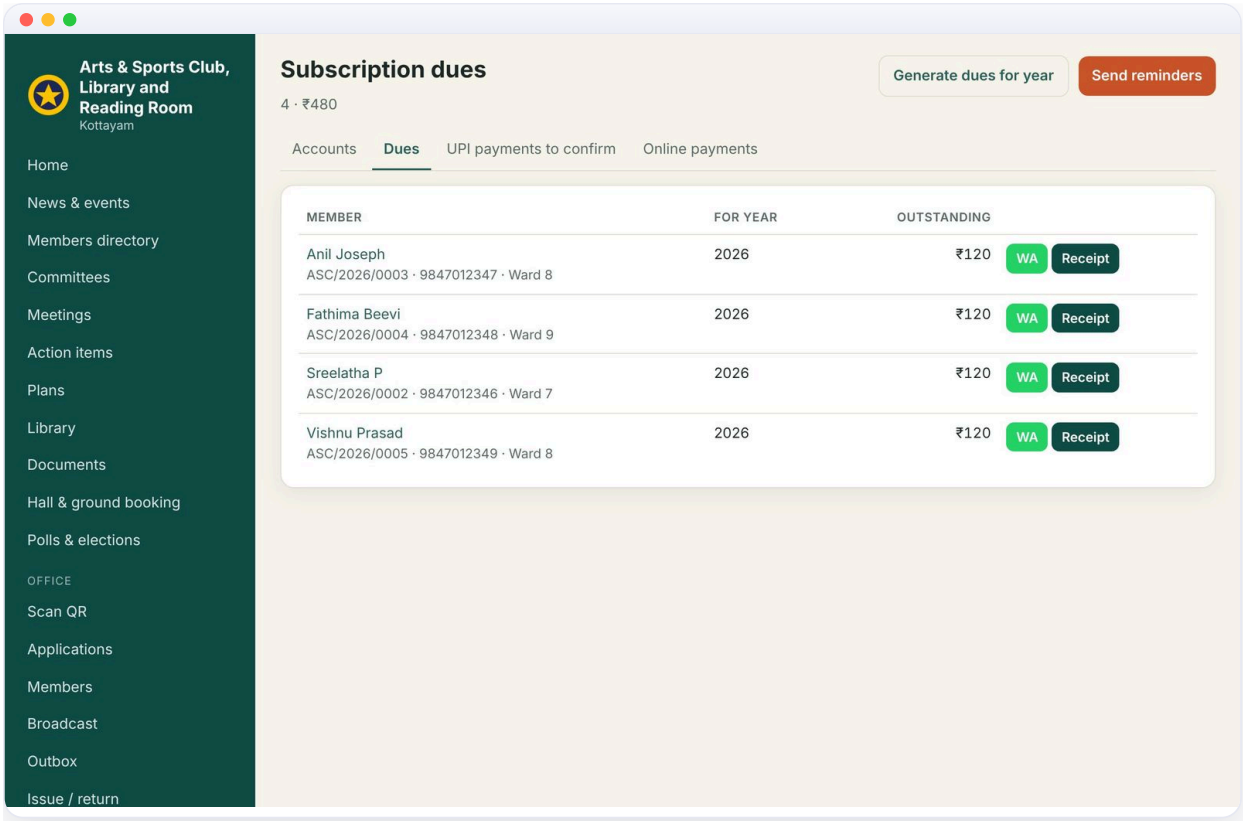


Accounts: the cash book with receipts and vouchers, filters by head and period, totals.

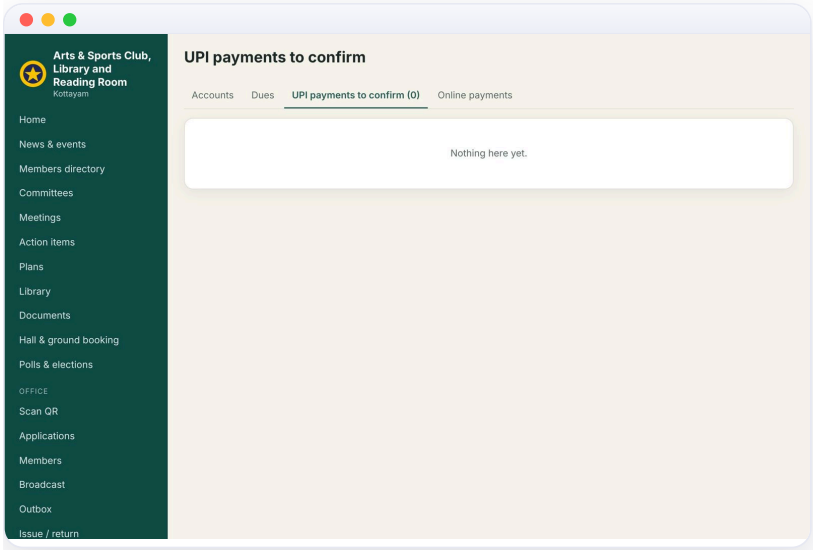


Recording a receipt or voucher: head, member (for receipts), amount, mode, reference, note. The receipt is messaged to the member.

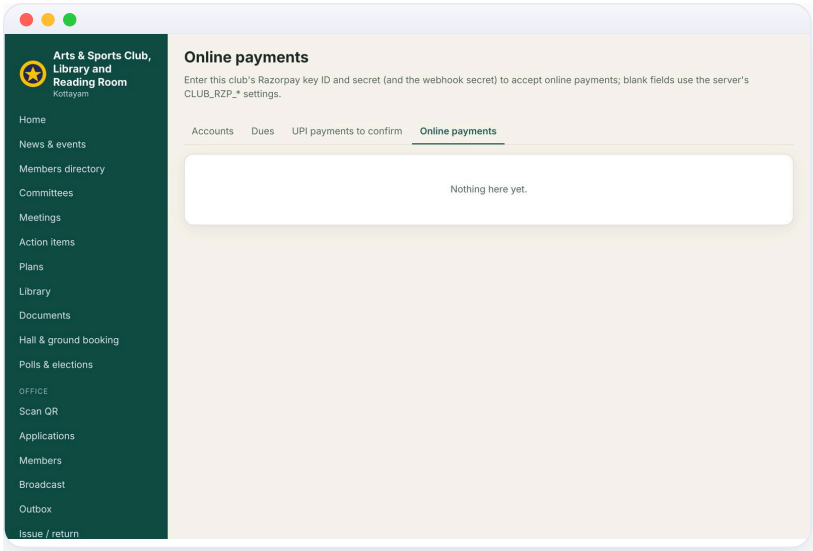
1. **Record** a receipt (money in) or a voucher (money out); choose the head; for a member's payment pick the member and the receipt goes to them.
2. **Dues** who owes what this year; send reminders to all or to one; record a payment straight from the row.
3. **UPI claims** members who paid by UPI and sent the UTR; check your bank app, then confirm (receipt issued) or reject (the member is told why).
4. **Online payments** orders and settlements from Razorpay, with the receipt each produced.
5. **Reports** the annual statement by head is in Reports → Annual report.



Dues: outstanding amounts by member, with reminders and quick recording.



UPI claims waiting for confirmation.



Online payments received through Razorpay.

⚠ Receipts cannot be deleted, only reversed with a voucher, so the cash book always matches what was messaged to members.

MISSION
+30 XP

Mission 9 · Money

- [ ] Record a subscription receipt and find the message in the Outbox
- [ ] Send a dues reminder to one member
- [ ] Confirm a UPI claim

PART C · OFFICE

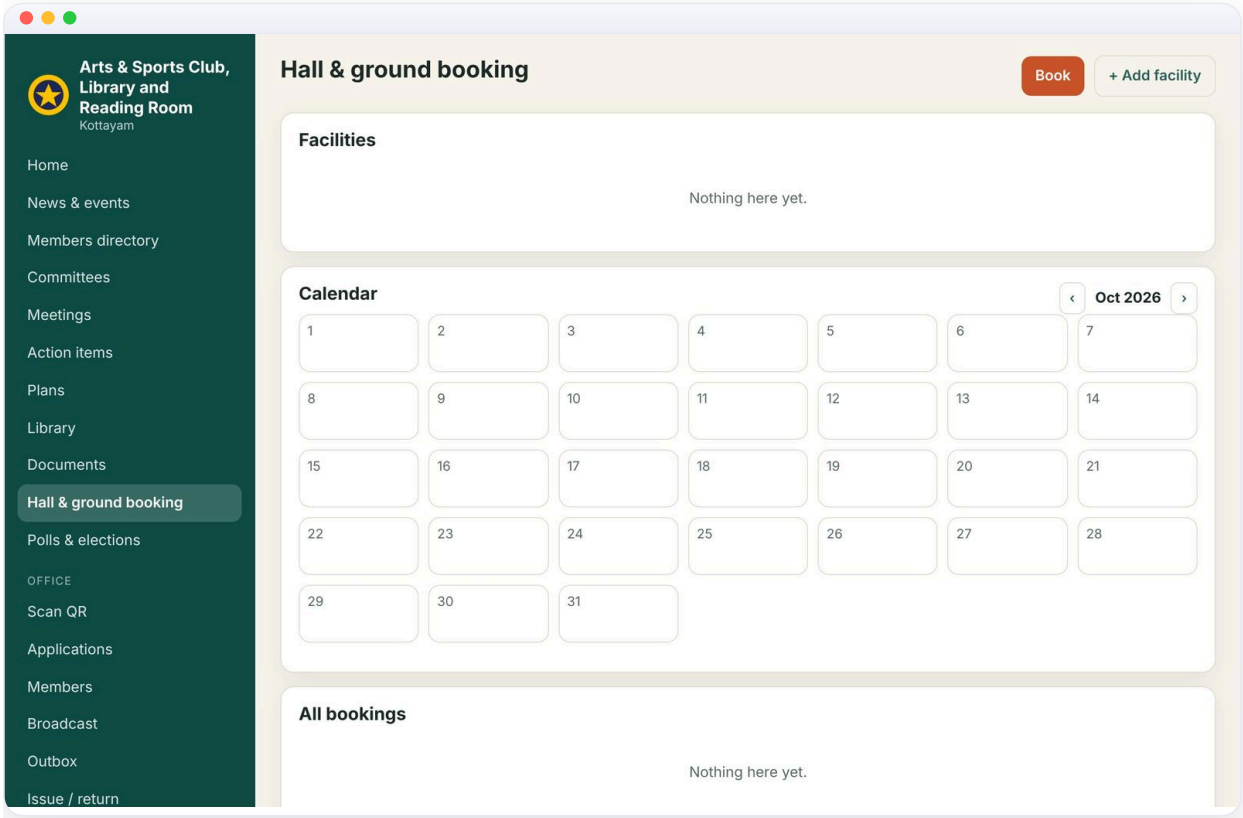
Facilities, assets and documents

22

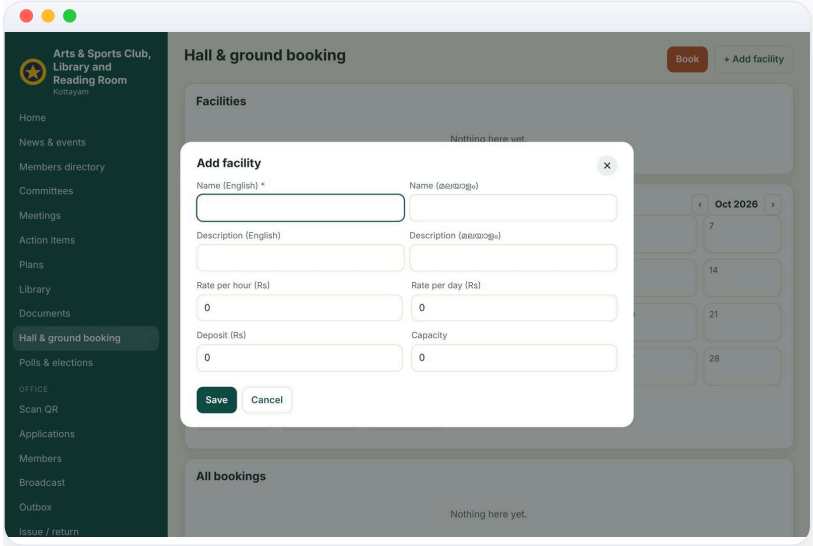
Halls, grounds, equipment, papers

Chapter 22 of 42

+10 XP



Hall & ground booking: the calendar, requests to confirm, rates per facility.

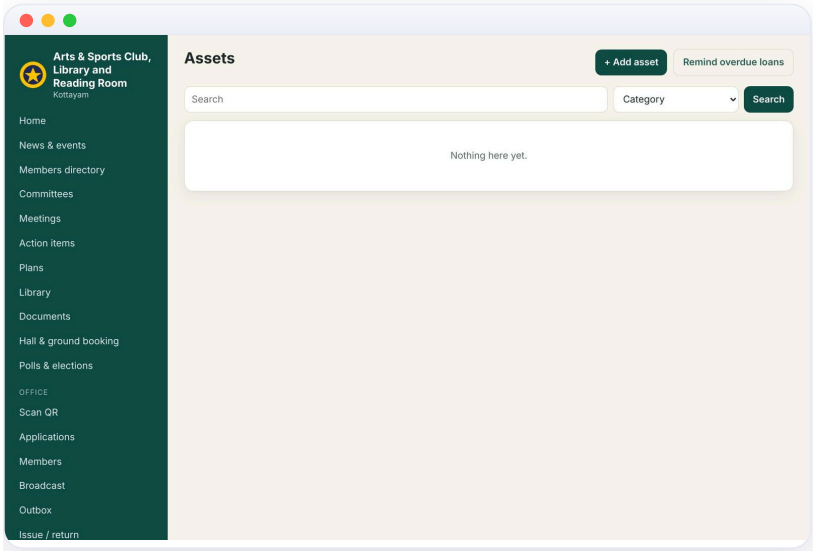


Adding a facility with its rate and rules.

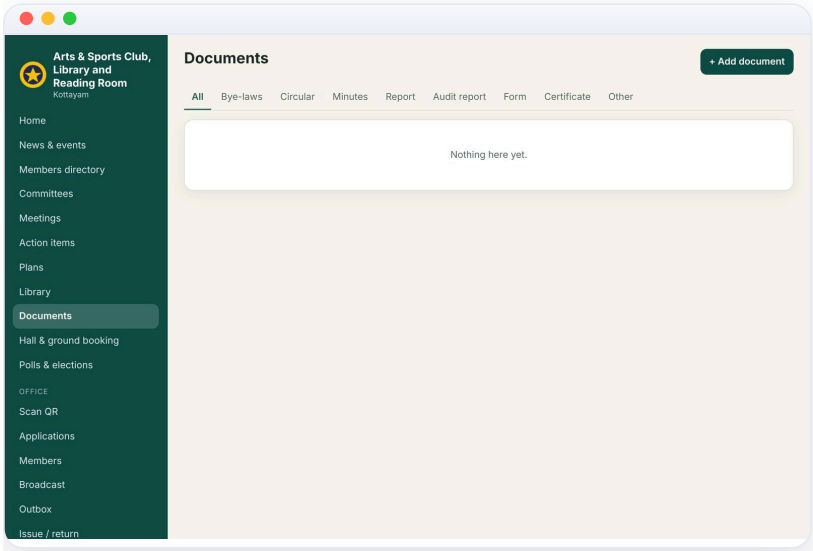
1. **Facilities** add the hall, ground, stage, sound system… with a rate (per hour or per day) and whether members may request online.
2. **Bookings** confirm or decline requests; a confirmed booking with a charge appears in the member's dues and the receipt is issued on payment.

3 **Assets** the asset register with categories, purchase details and value; lend an asset to a member and track its return.

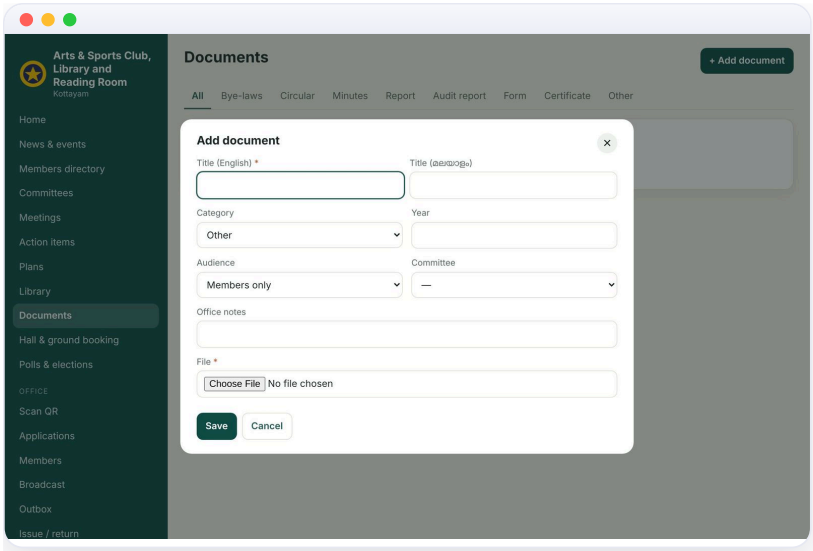
4 **Documents** upload bye-laws, circulars, certificates, minutes; choose the audience (public, members, committee, office).



Assets and lending.



Documents with audience control.



Adding a document.

PART C · OFFICE

Broadcasts and the outbox

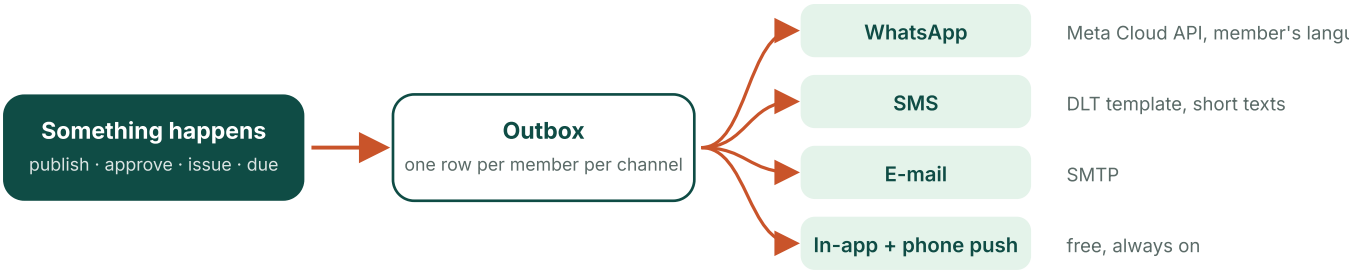
23

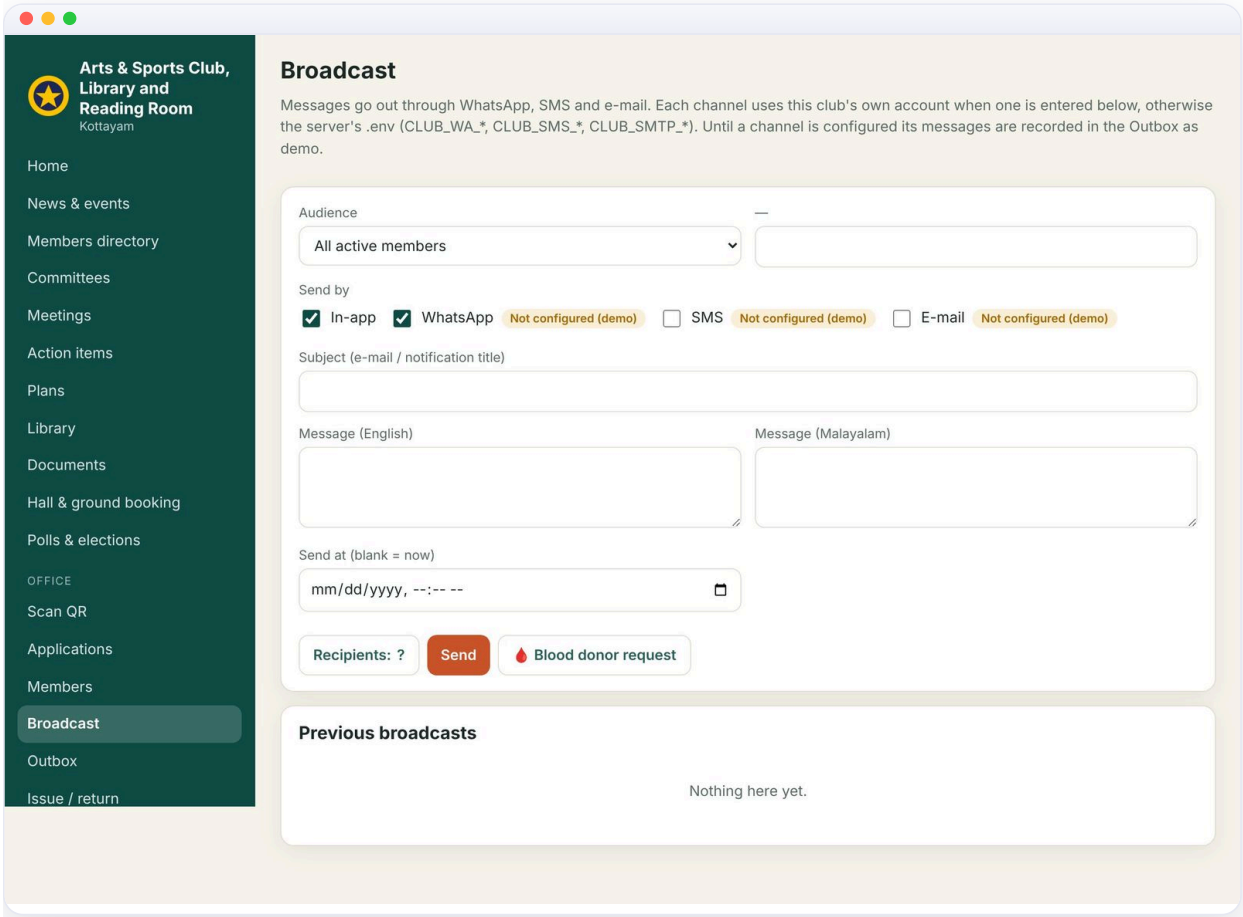
Reach everyone, see what was delivered

Chapter 23 of 42 +10 XP

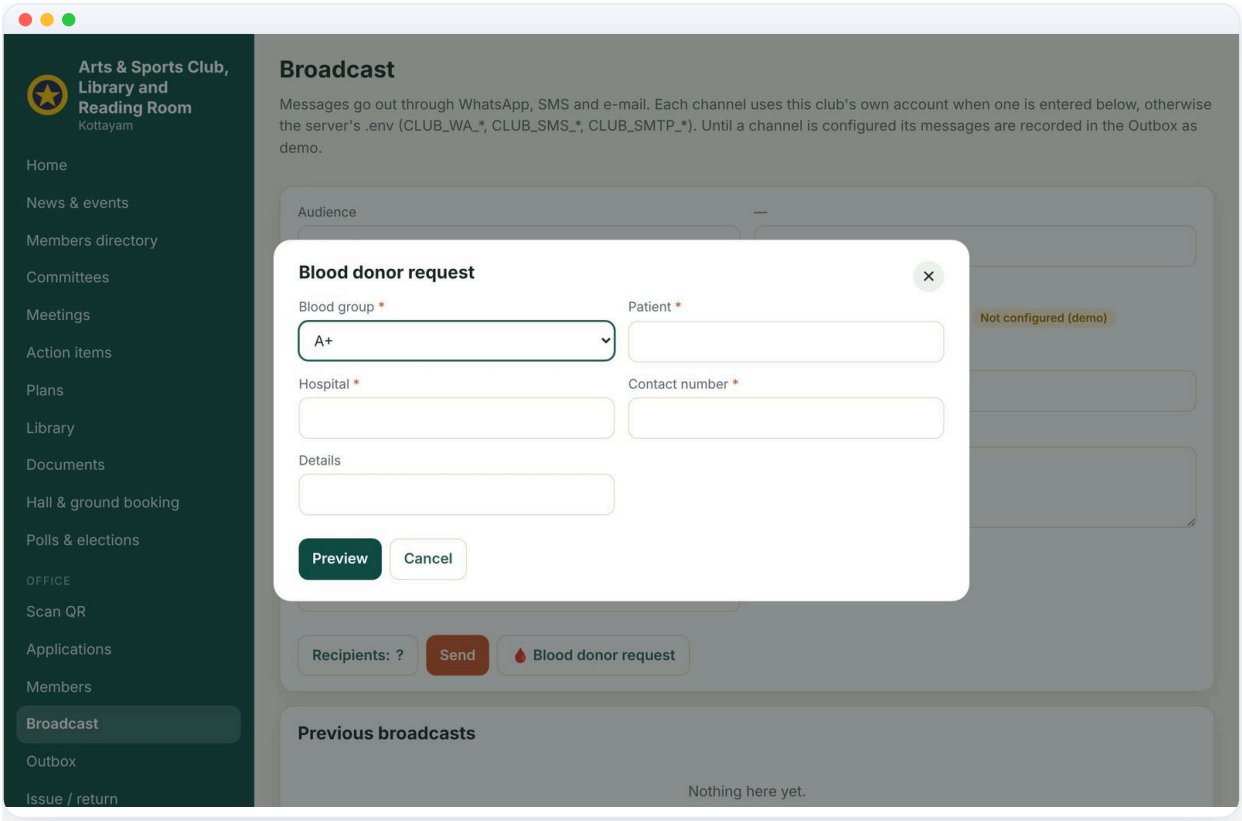
AT A GLANCE

- A broadcast is a message to an audience on the channels you pick, now or at a scheduled time.
- The outbox shows every message, its channel and delivery status; failed ones can be retried.
- Blood donor request finds members and family members by blood group.

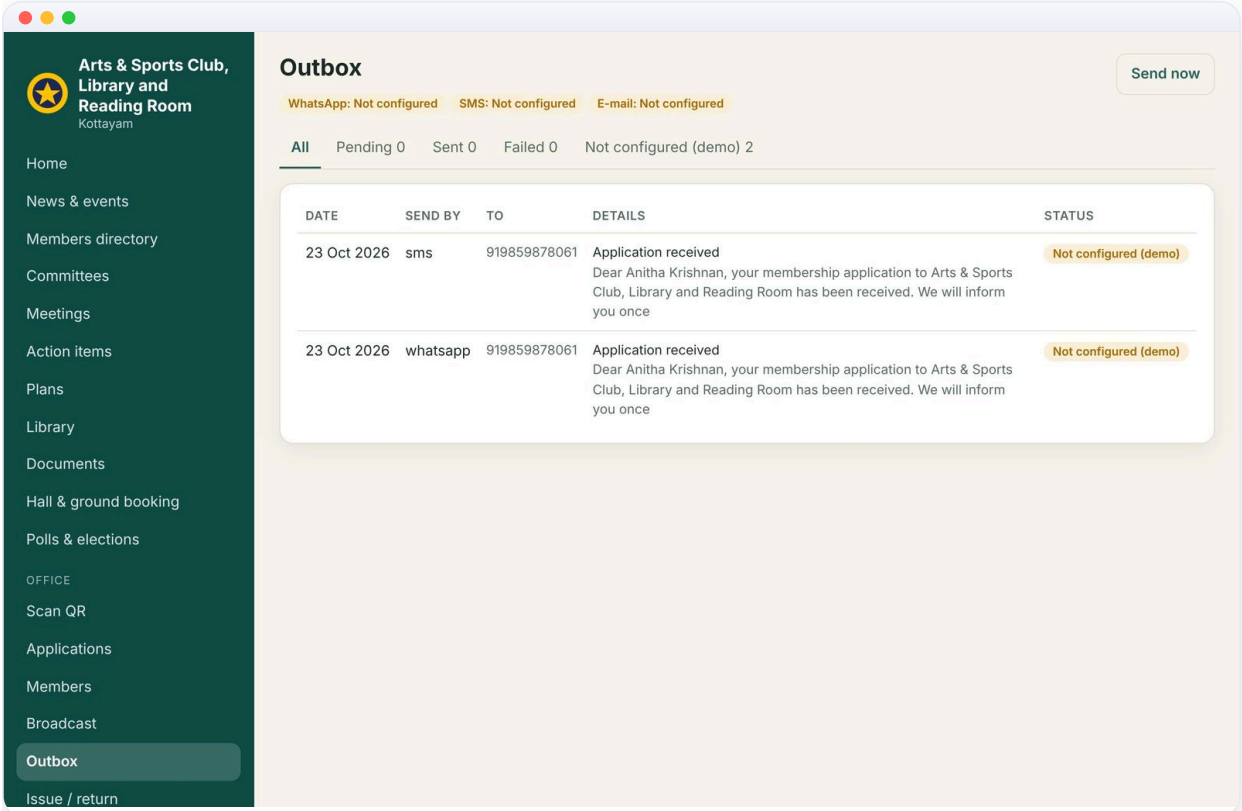




Broadcast: audience, channels, both languages, schedule.



Blood donor request: pick the group; donors and their family members are messaged at once.



The outbox: every message with channel, status and provider reference. *demo* means the channel is not configured yet.

1. **Compose** subject and text in both languages; members receive the one they chose.
2. **Audience** all, a membership type, a ward, a committee, a blood group, an event's participants.
3. **Channels** WhatsApp, SMS, e-mail, app; untick the costly ones for routine notes.

4. **Send now or schedule** a scheduled broadcast can be cancelled until it goes.
5. **Outbox** status per message; retry failed; see the provider's reference.

ℹ️ SMS in Malayalam counts 70 characters per segment, so the automatic SMS texts are short; WhatsApp and e-mail carry the full text.

DID YOU KNOW?

The outbox retries a failed message three times before marking it failed, and shows the provider's own error text so you can see whether a number was wrong or a template was rejected.

SCHEDULING

Schedule the Sunday broadcast on Saturday night. The Outbox shows it as scheduled and you can still cancel it in the morning.

PART C · OFFICE

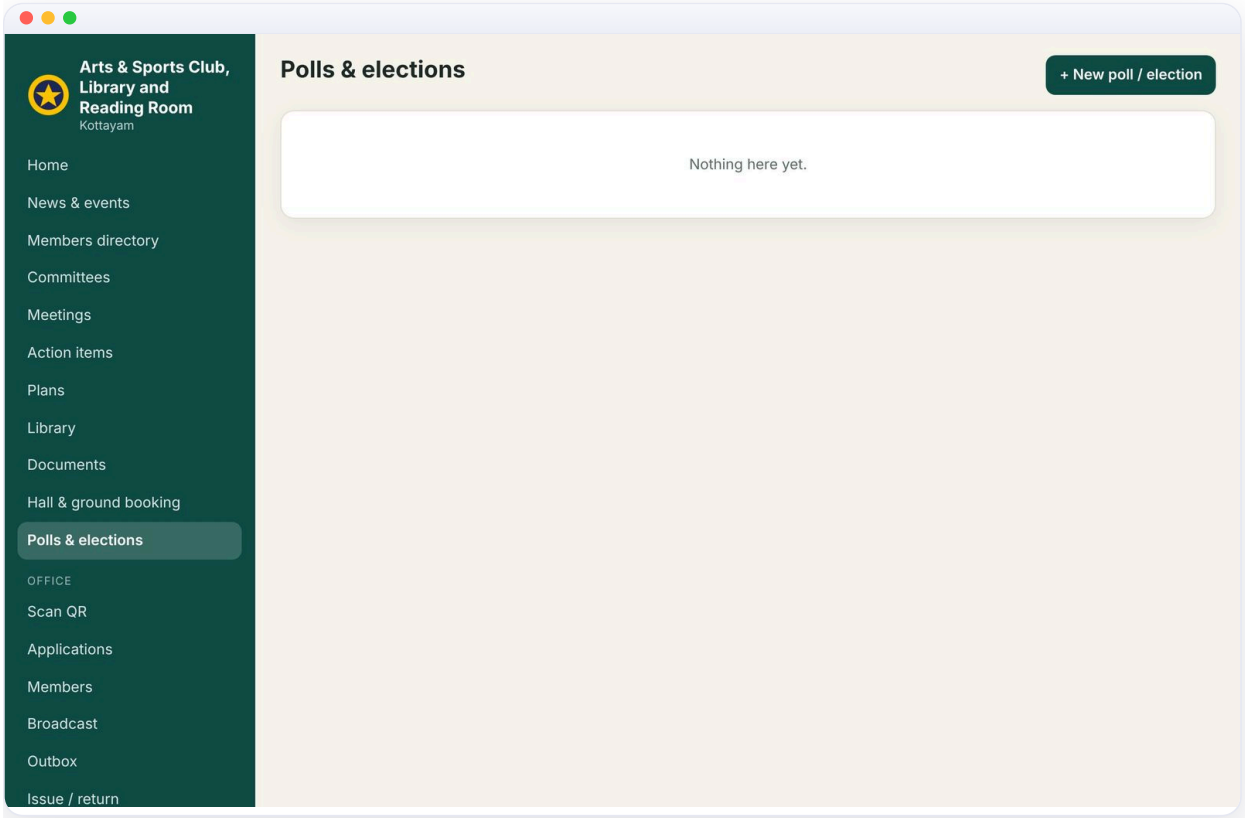
Polls and elections

24

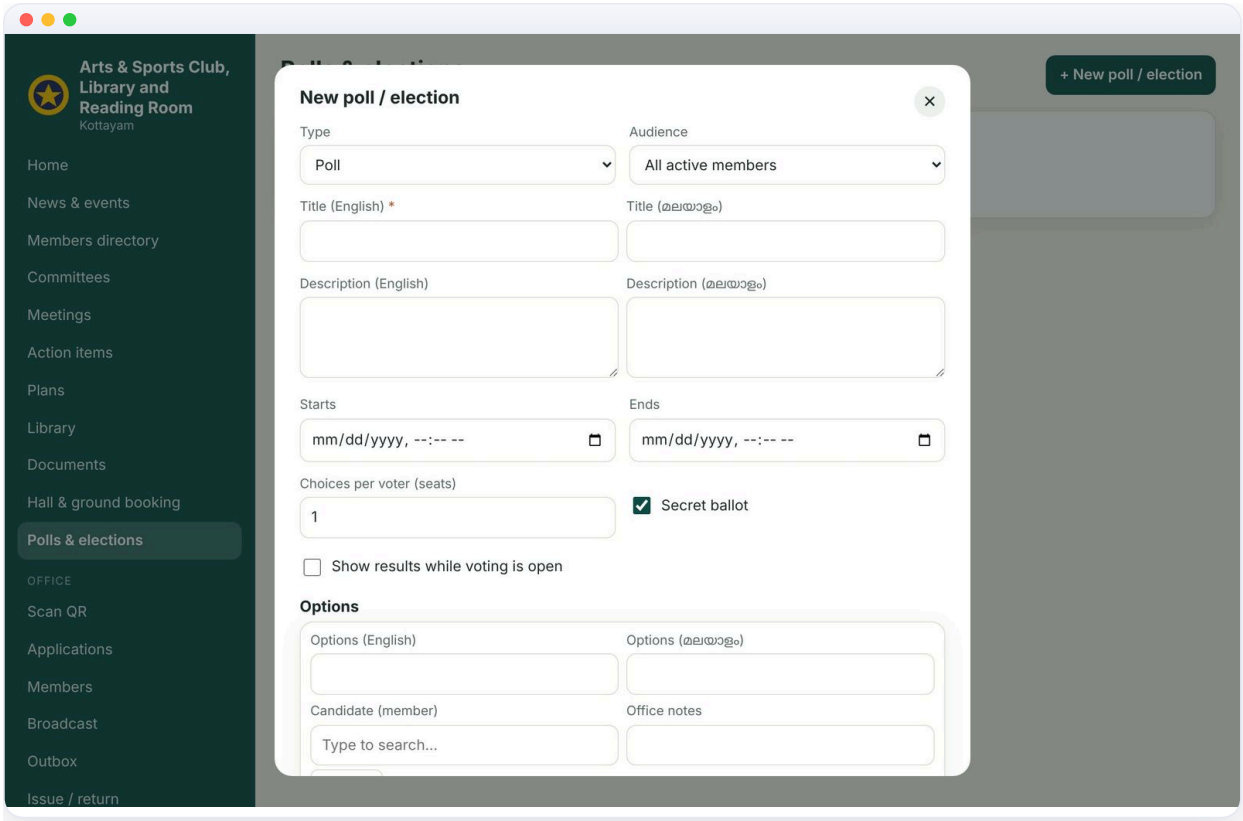
One member, one vote

Chapter 24 of 42

+10 XP



Polls & elections for the office: open, closed, results.



Creating a poll: question, options (or candidates), who may vote, secret or open, closing time.

1. **New poll** a question with options, or an election with posts and candidates; choose the electorate (all members, a type, a committee).
2. **Secret ballot** records that a member voted, never what they chose.
3. **Open** members are notified; the poll appears under Polls & elections.
4. **Close** automatically at the closing time; results are published and notified.

PART C · OFFICE

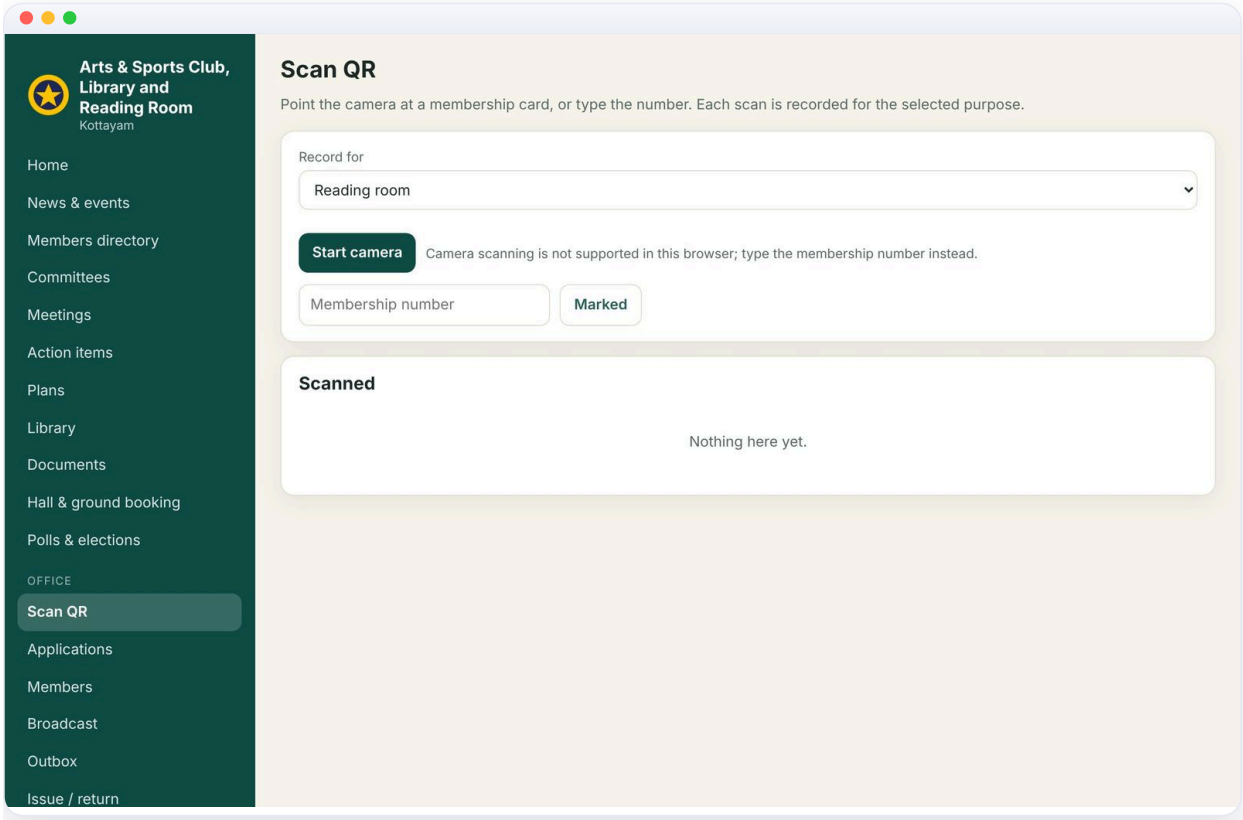
Scan QR at the door

25

Meetings, events, reading room

Chapter 25 of 42

+10 XP



Scan QR: point the laptop or phone camera at a member's e-card; the member is identified and marked present, registered or signed in to the reading room.

On a phone, Scan QR uses the back camera; the office bearer's phone becomes the attendance desk.

PART C · OFFICE

Reports, annual report, audit and backups

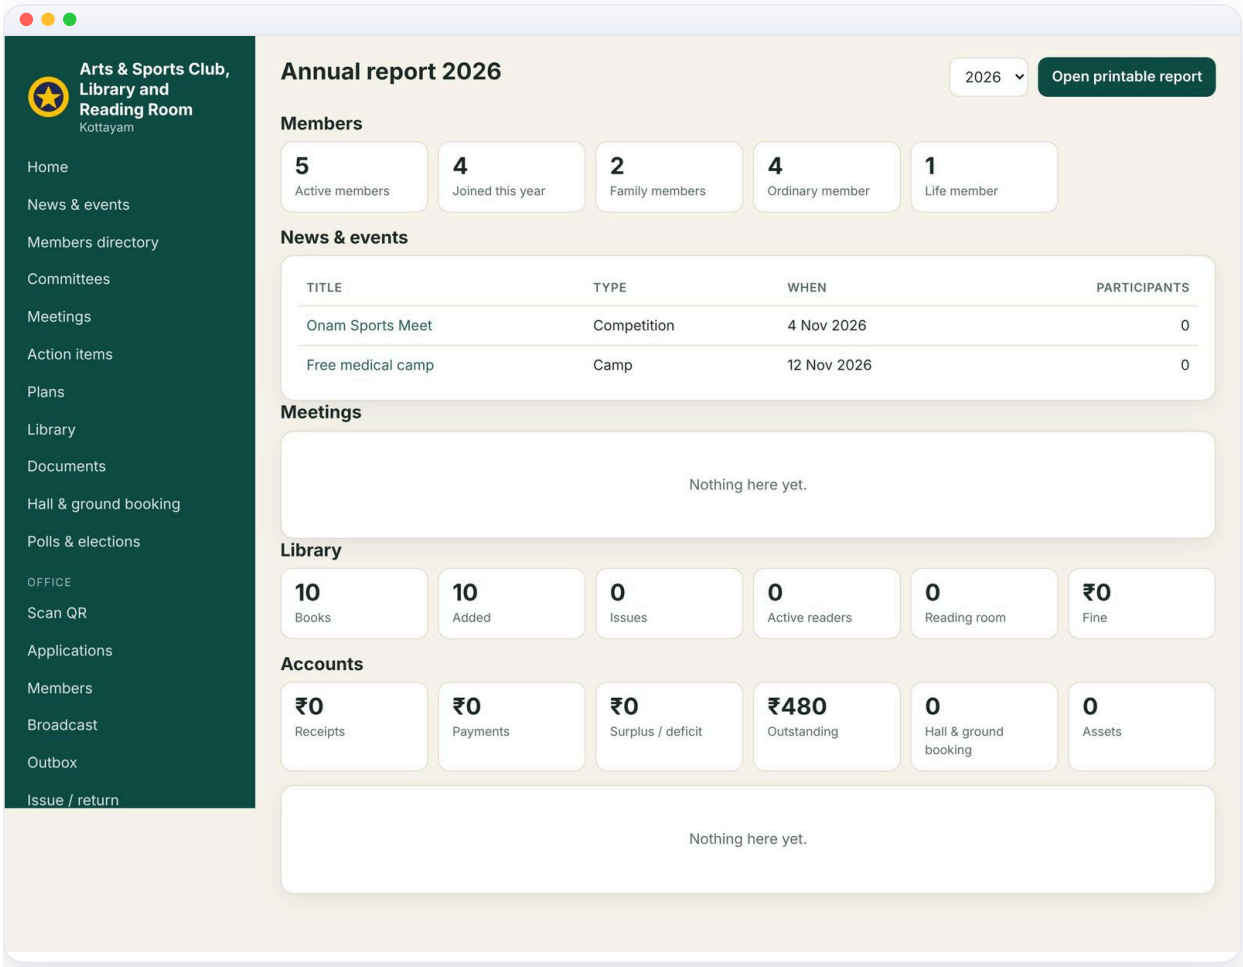
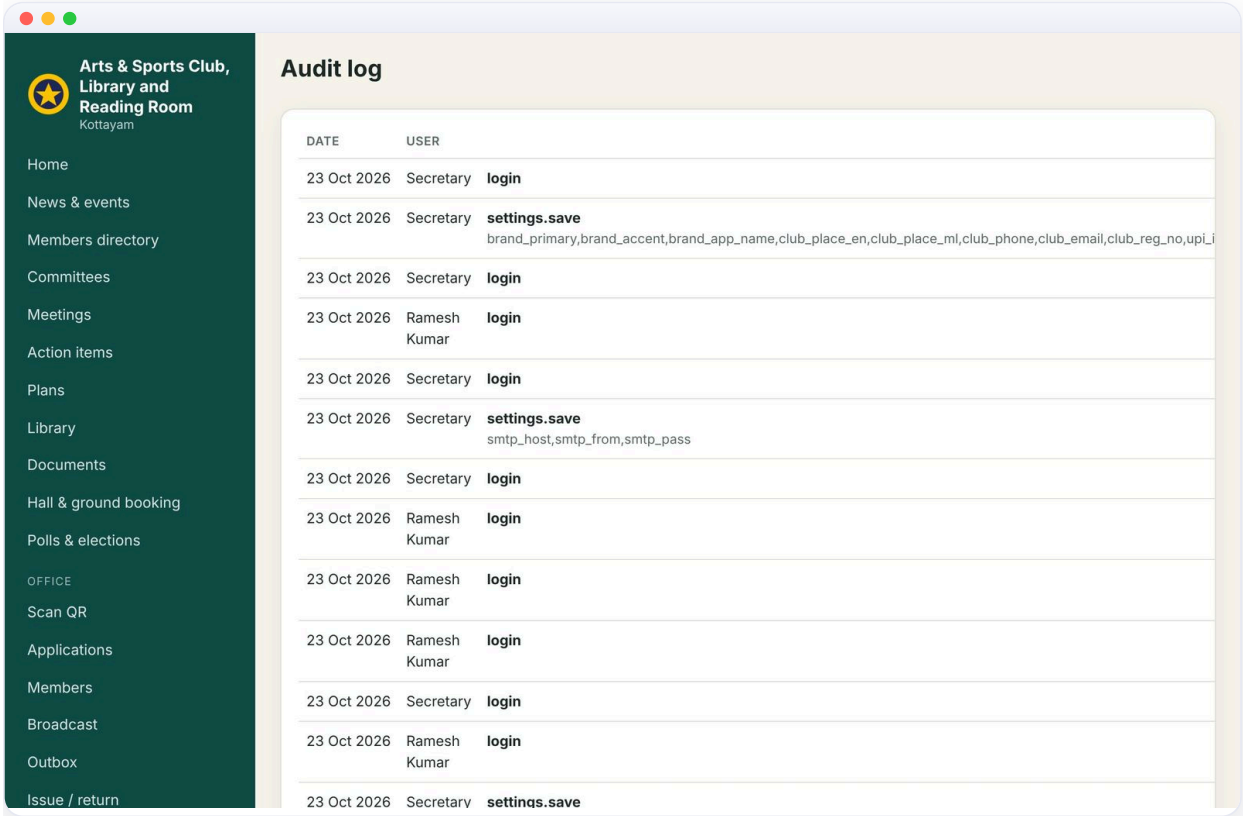
Reports: members by type, ward, gender, blood group, age band and joining year; events; library; accounts.



The annual report for the general body: office bearers, membership, events, meetings and resolutions, accounts by head, library; printable.



The audit log: who did what and when.

1. **Annual report** pick the year; print or save as PDF for the general body.
2. **Audit** every approval, publication, receipt, settings change and sign-in, with the user and time.
3. **Backups** Settings → Backups shows the nightly copies and lets you take one now; with Google Drive configured, copies go off-site.

PART C · OFFICE

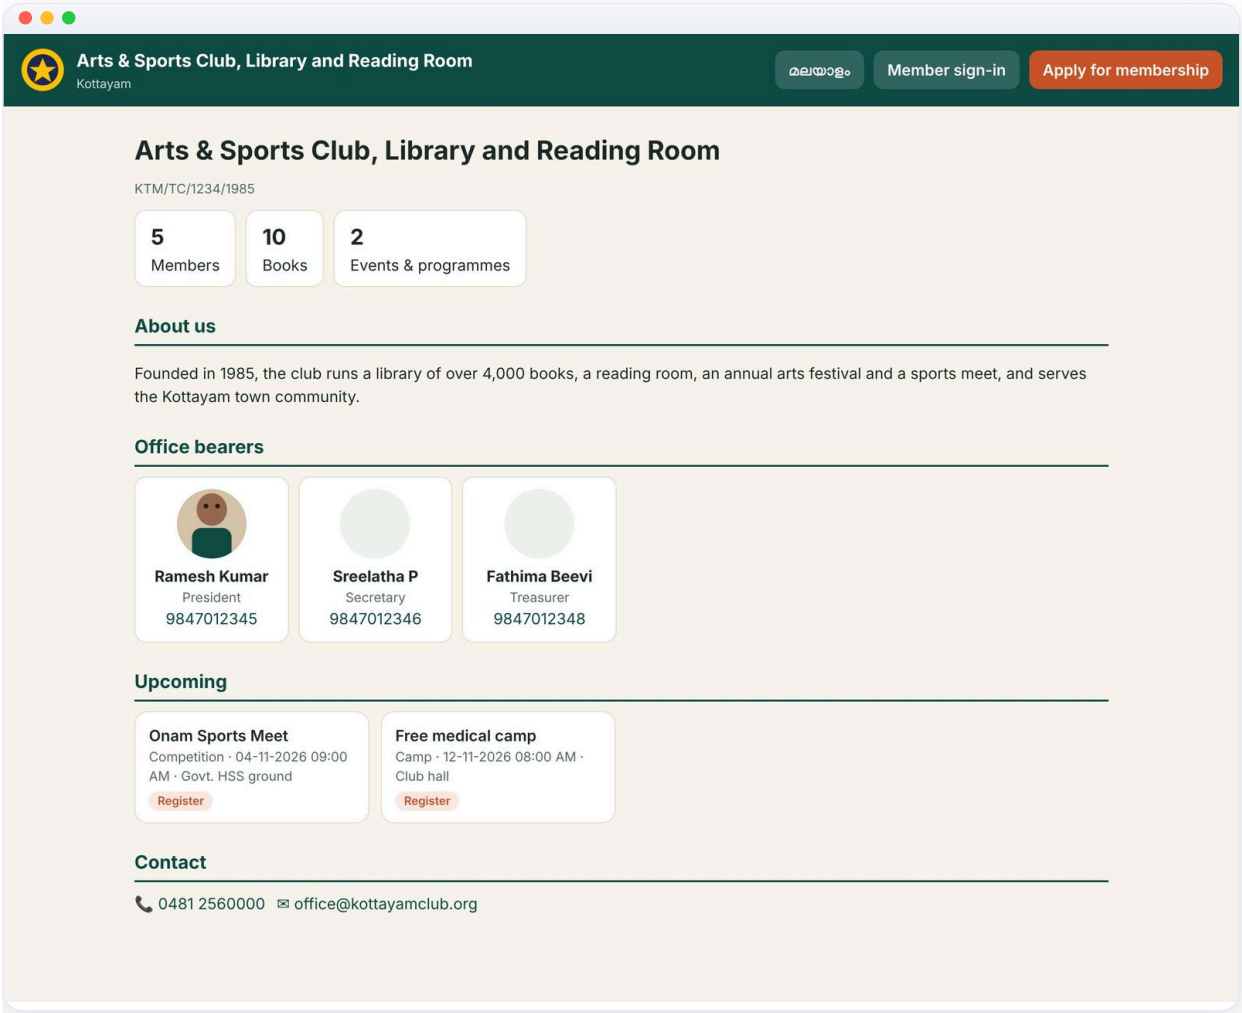
The public website and the in-app handbook

27

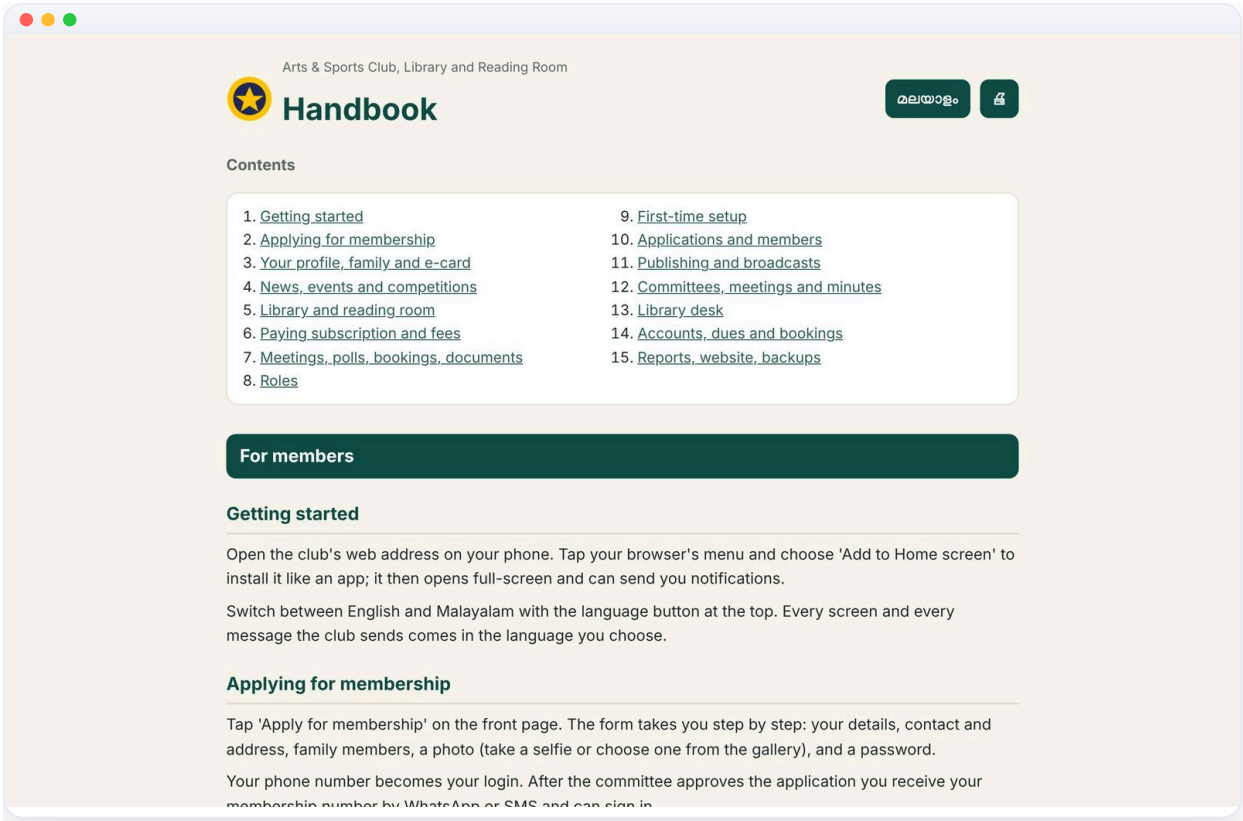
What the world sees

Chapter 27 of 42

+10 XP



The club's public website at /site: about, office bearers with photos, upcoming events, news, documents, photos, contact and social links; in both languages; shareable.



The in-app handbook at /help: the short bilingual guide members and office bearers can open from the menu.

PART C · OFFICE

Your ClubPro subscription

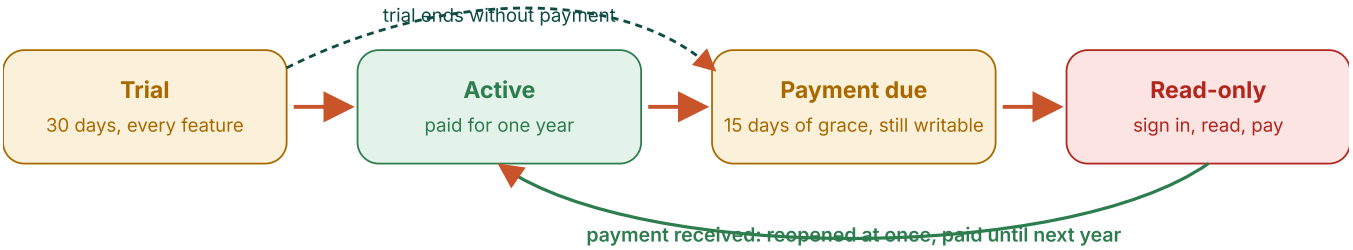
28

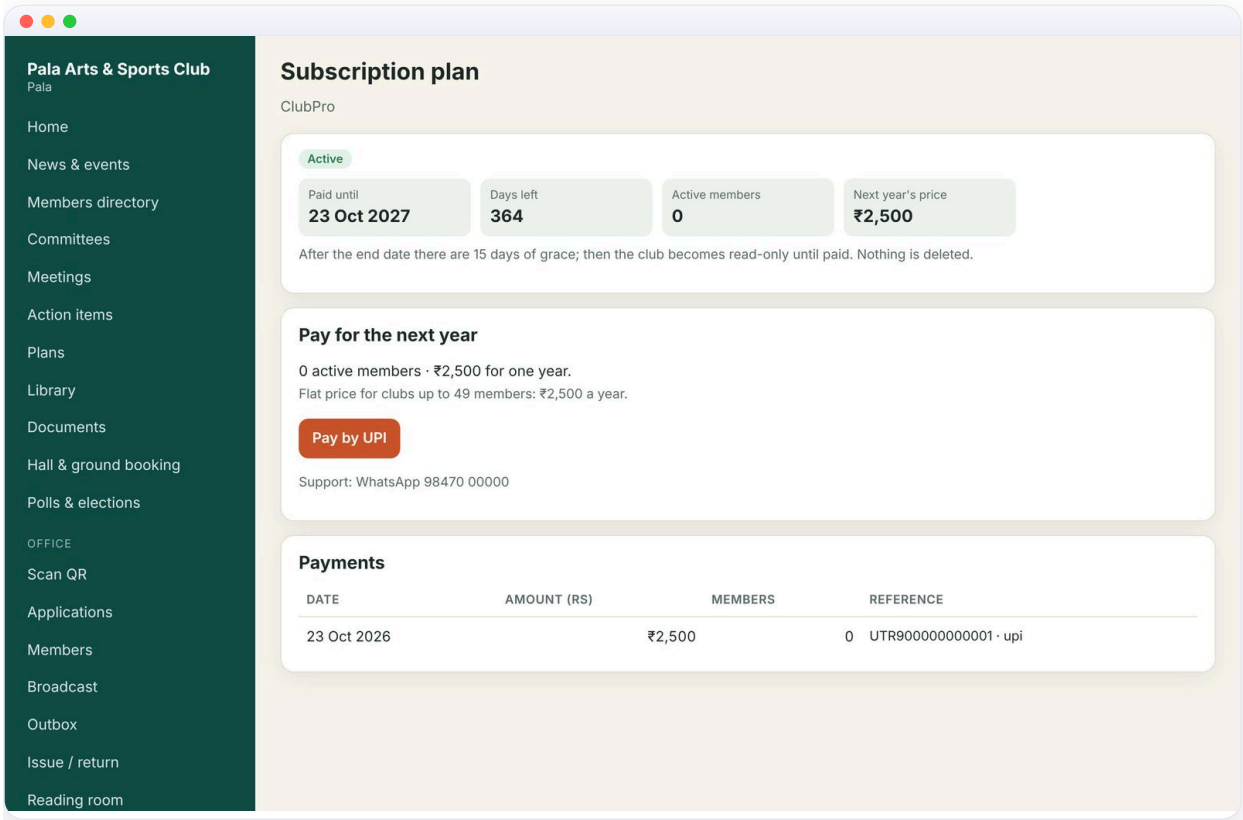
What the club pays, and what happens if it does not

Chapter 28 of 42 +10 XP

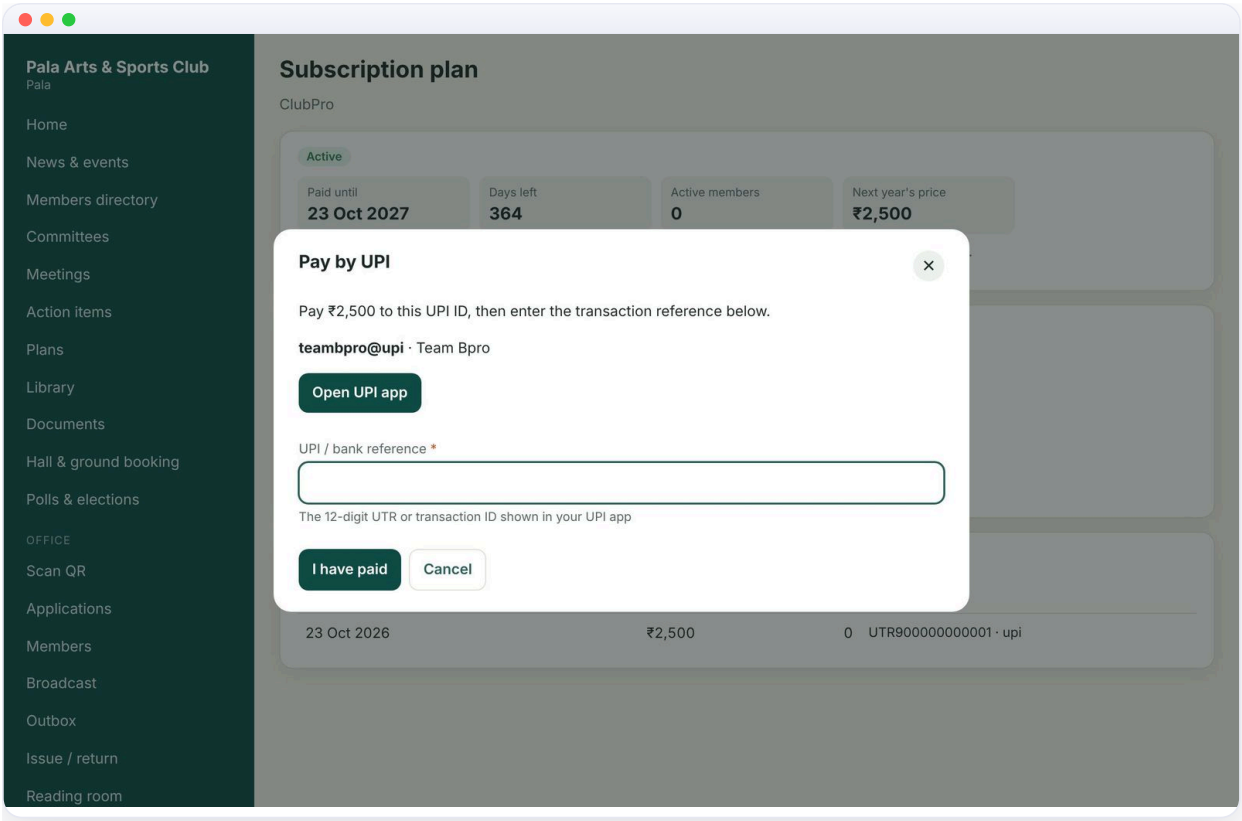
AT A GLANCE

- Office → Subscription plan shows the status, the end date, the active members and next year's price.
- Pay online (card / UPI) or by UPI with the transaction reference; the operator confirms it.
- After the end date there are 15 days of grace; then the club becomes read-only until paid. Nothing is deleted.





Subscription plan: status, dates, members, price, and the payment history.



Paying by UPI to the operator and sending the reference.

Active members	Price per year
up to 49	₹2,500 flat
50 to 99	₹120 per member (₹6,000 – ₹11,880)
100 and above	₹120 per member

ℹ️ The price is worked out from the live member count on the day you pay, so a growing club simply pays a little more at its next renewal. Office bearers are reminded 7 days before the end.

MISSION +20 XP

Mission 10 · Keep the lights on

- [ ] Open Subscription plan and note the end date
- [ ] Try Pay by UPI and read the reference form (cancel it)
- [ ] Set the support contact in your phone

🏅 Level 2 complete · Office bearer 📣 First broadcast 📝 Minutes published 🧾 First receipt

PART D

Operator's guide

For Team Bpro or anyone running ClubPro as a service: the server, the console, pricing, billing and channels.

- ★ One server, many clubs, each isolated
- ★ Clubs sign up by themselves and pay yearly
- ★ Operator keys, channels and backups

3 **Level 3 · Operator**
server, console, billing

PART D · OPERATOR

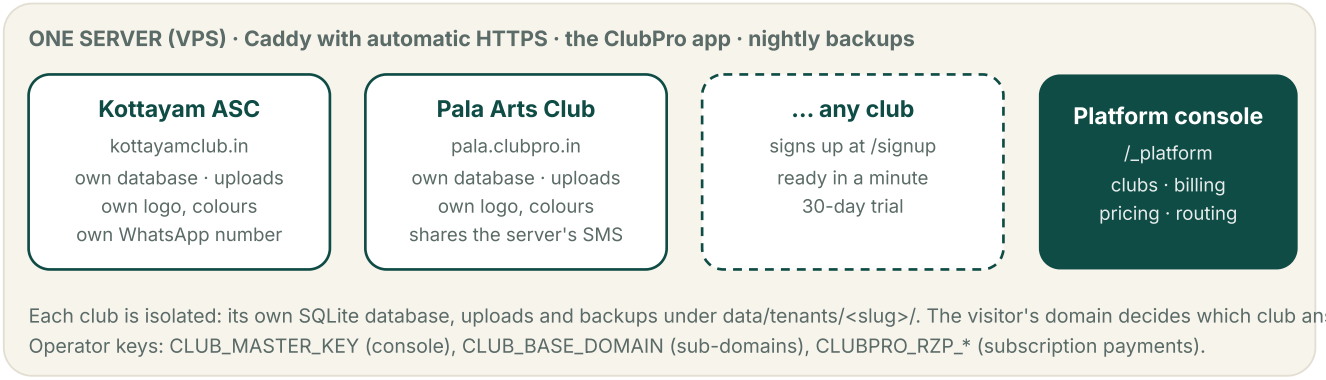
How the platform is built

29

One server, many clubs

Chapter 29 of 42

+10 XP



ClubPro is a single Python application (FastAPI) with one SQLite database per club, a browser app that installs on phones, and background workers for messages, daily jobs and backups. Caddy in front provides HTTPS for every club's domain automatically. The first club on a server is the *default* club and lives directly in the data folder; every further club lives under `data/tenants/<slug>/`. The visitor's domain picks the club; the operator's own pages (`/signup` , `/pricing` , `/_platform`) answer on any domain.

PART D · OPERATOR

Installing on a server

30

A VPS, a domain, fifteen minutes

Chapter 30 of 42

+10 XP

1. **Get a VPS** Ubuntu or Debian, 1 vCPU / 2 GB is enough for dozens of clubs. Shared web hosting cannot run it (it is Python, not PHP).
2. **Point DNS** an A record for the platform domain (e.g. clubpro.in) and a wildcard record (*.clubpro.in) at the server; clubs with their own domains point theirs the same way.
3. **Run the installer** `curl -fsSL https://raw.githubusercontent.com/BABUKOLLAM/bpro-club-manager/main/deploy/vps-install.sh | sudo bash -s -- clubpro.in admin@teambpro.in` installs Docker and Caddy, clones the app to /opt/club, writes .env and starts everything.
4. **Multi-club Caddy** replace the site file with `deploy/site-multi.caddy` so certificates are issued on demand for every registered domain.
5. **Set the operator keys** in /opt/club/.env: `CLUB_MASTER_KEY`, `CLUB_BASE_DOMAIN=clubpro.in`, `CLUBPRO_RZP_*`, and the server's SMS / WhatsApp / SMTP settings used for signup codes and as the default for clubs. Restart with `docker compose up -d`.
6. **Open the console** https://clubpro.in/_platform with the master key: set the product name, the footer credit, pricing, your UPI ID and support contact.

Re-running the installer command updates the app in place. Data, uploads and .env are kept.

OPERATOR'S RULE

Keep .env out of git and out of WhatsApp. It holds every key. Back it up with the server, nowhere else.

PART D · OPERATOR

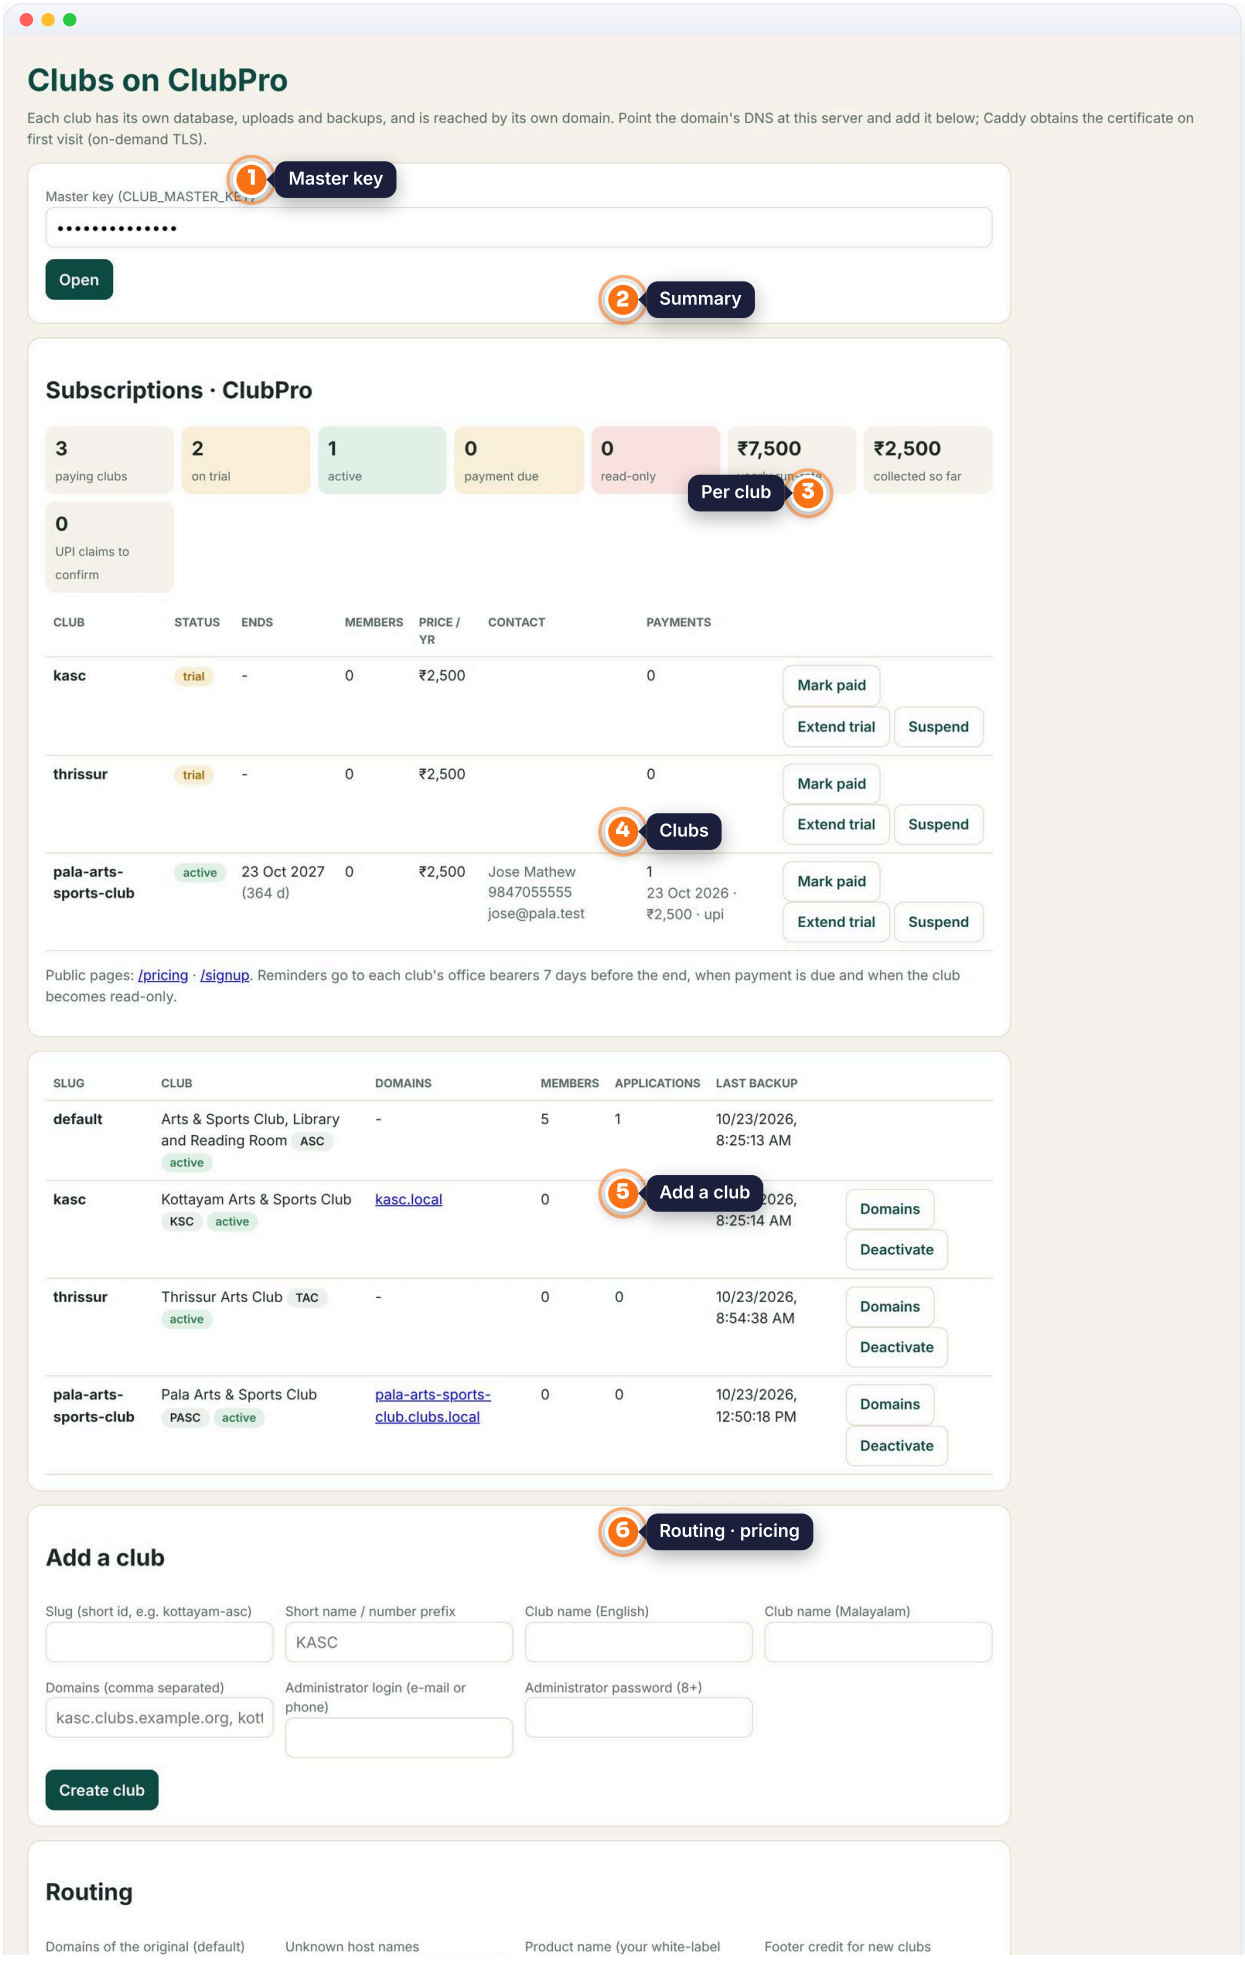
The platform console

31

Every club, every rupee

Chapter 31 of 42

+10 XP



Clubs on ClubPro
Each club has its own database, uploads and backups, and is reached by its own domain. Point the domain's DNS at this server and add it below; Caddy obtains the certificate on first visit (on-demand TLS).

The console: subscriptions summary, per-club status and actions, the club list, add a club, routing, pricing and the operator's UPI and support contact.

1. Open the console with CLUB_MASTER_KEY from .env.
2. Clubs by status, run-rate, collected, claims to confirm.
3. Mark paid, extend trial, suspend / reopen, confirm claims.
4. Sizes, domains, last backup, deactivate.
5. For clubs you onboard yourself.
6. Default club's domains, product name, powered-by, prices, UPI, support.

1. **Subscriptions** clubs by status, yearly run-rate, amount collected, trials ending this week, UPI claims to confirm.
2. **Per club** Mark paid (amount and reference), Extend trial, Suspend / Reopen, Confirm or Reject a UPI claim.
3. **Clubs** members, applications, last backup; edit domains; deactivate / activate.
4. **Add a club** for clubs you onboard yourself: slug, names, domains, first administrator.
5. **Routing** the default club's domains; whether unknown host names show the default club or *no club at this address*.
6. **Pricing** flat price and member limit, per-member price, trial and grace days, UPI ID and payee name, support contact.

PART D · OPERATOR

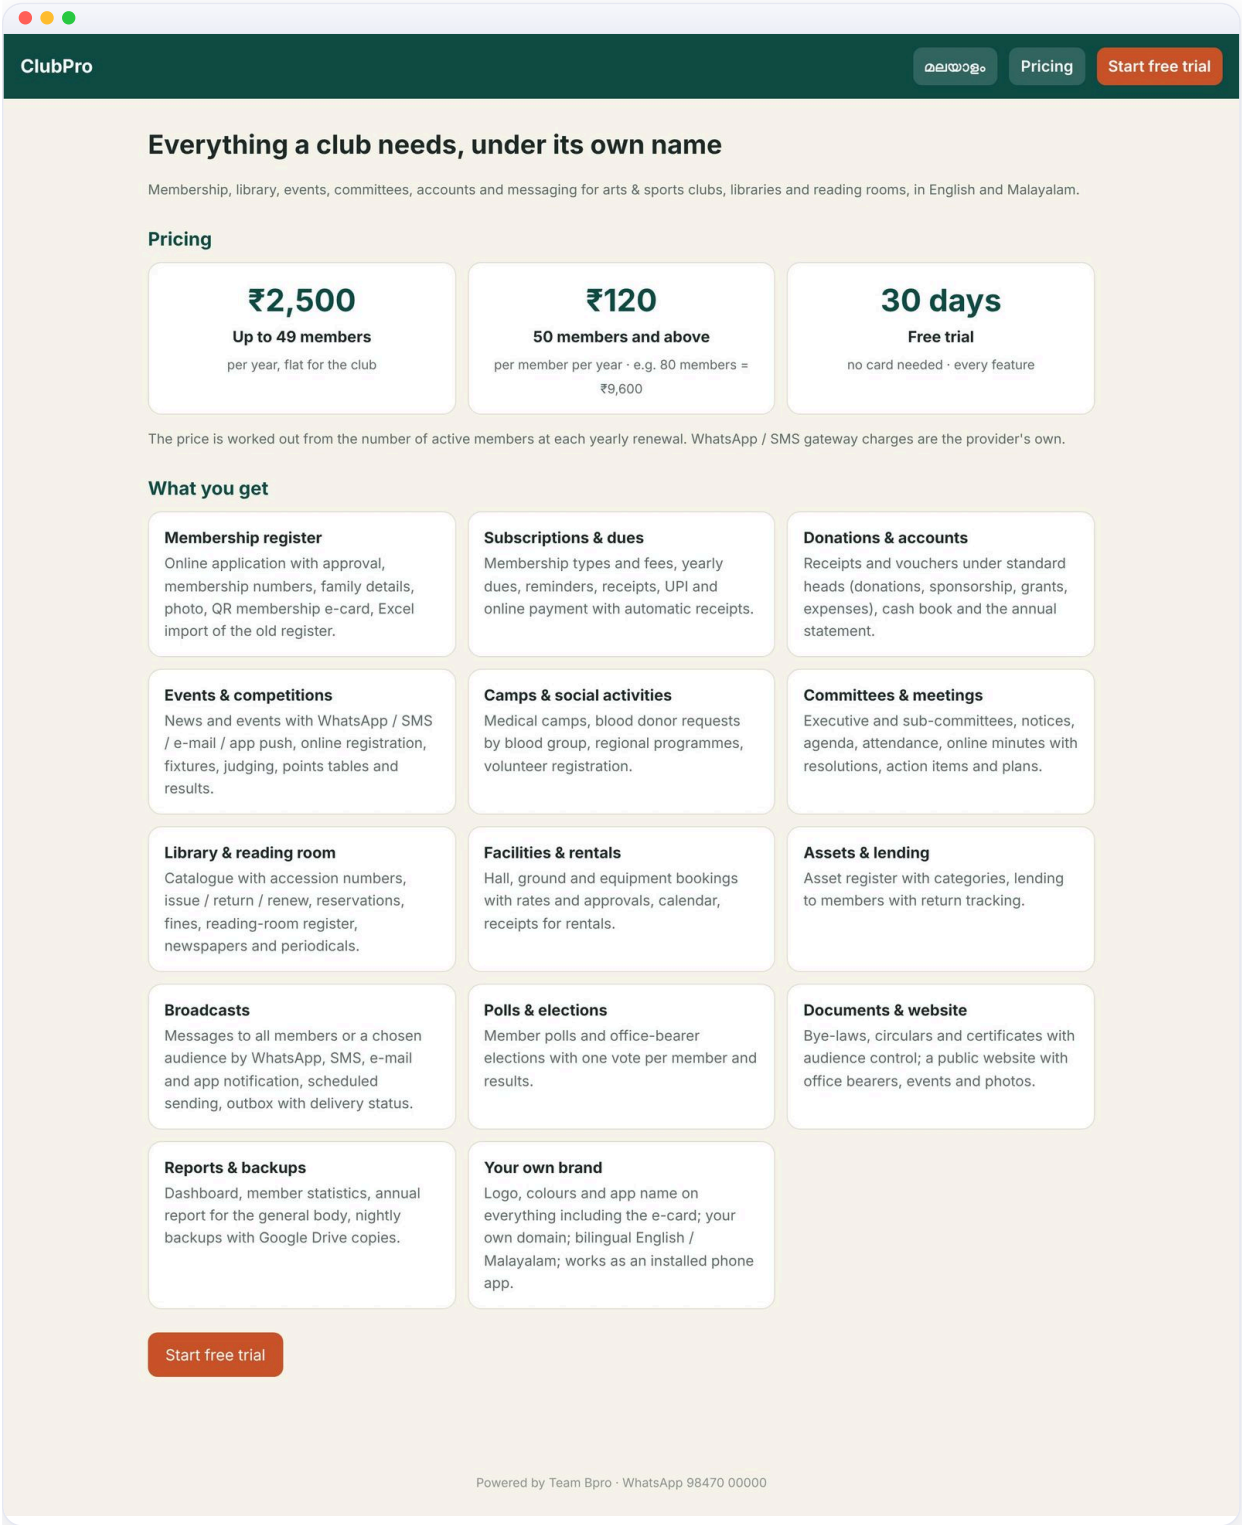
Clubs signing up by themselves

32

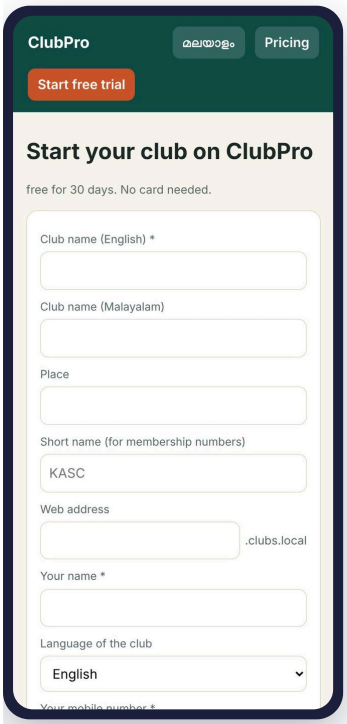
/signup and /pricing

Chapter 32 of 42

+10 XP



The pricing page: the rule, the trial, and every service in both languages.



The signup form on a phone: club, web address, secretary, mobile, password, consent.

Fill the form /signup → **Code by SMS** operator's channel → **Club created** <slug>.clubpro.in → **Trial** 30 days → **Pays** online or UPI

⚠ Signup codes go through the server's SMS or WhatsApp channel. If none is configured the club is created without a code — fine for a trial server, not for the public.

DID YOU KNOW?

A club that signs up at /signup is live in under a minute: its database is created, the first administrator is set, the default committees are seeded and the trial clock starts.

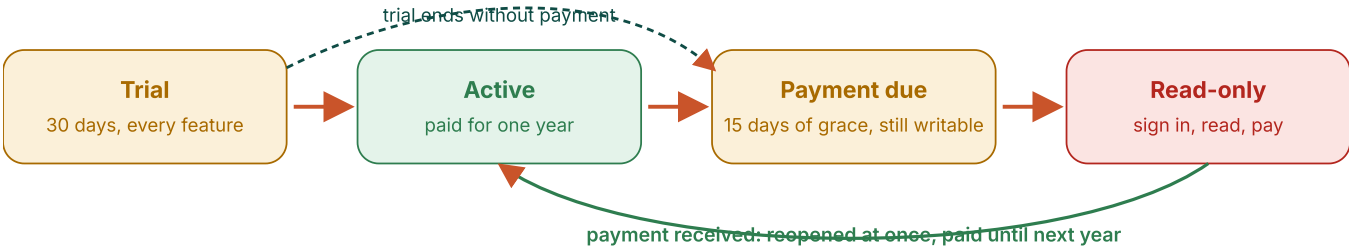
PART D · OPERATOR

Billing, reminders and suspension

33

Trial → active → due → read-only

Chapter 33 of 42 +10 XP



1. **Online** the club pays through your Razorpay account from its Subscription plan screen; the plan is extended by a year at once; the webhook is the safety net if the browser closes.
2. **UPI** the club pays to your UPI ID and sends the reference; it appears as a claim on the console; confirm after checking your bank.
3. **Manual** Mark paid for cash, cheque or bank transfer.
4. **Reminders** the daily job messages the club's office bearers 7 days before the end, when payment is due, and when the club becomes read-only.
5. **Read-only** sign-in, reading and paying keep working; every other change is refused with a clear message; nothing is deleted. Reopen from the console if needed.

PART D · OPERATOR

White label per club

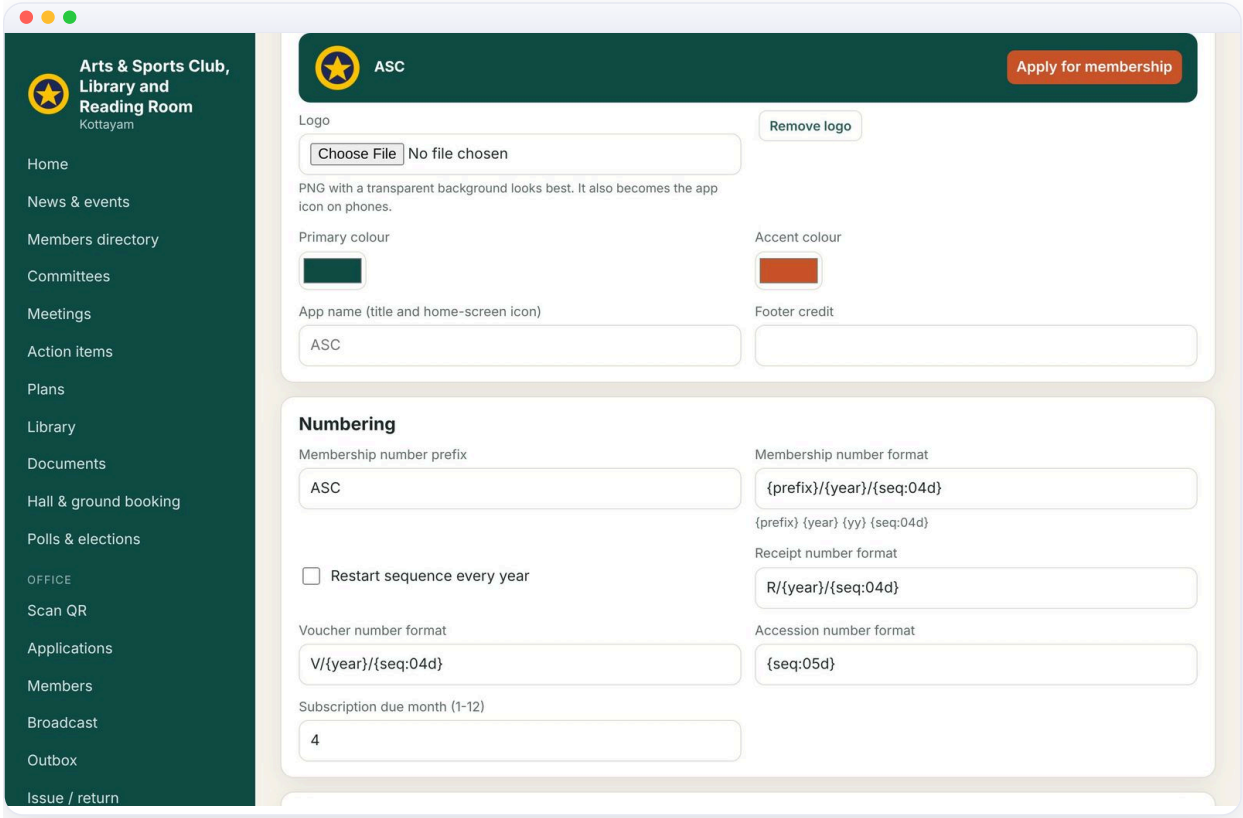
34

Their name, your product

Chapter 34 of 42

+10 XP

Each club sets its own logo, colours, app name and footer under Settings → Branding (chapter 16). The platform's product name and the "Powered by" footer that new clubs start with are set on the console. A club may also enter its own WhatsApp, SMS, SMTP and Razorpay accounts; blank fields inherit the server's. Secrets are stored per club and shown masked.



Branding settings as a club sees them.

PART D · OPERATOR

Message channels and payment gateways

35

What to set up where

Chapter 35 of 42

+10 XP

Channel	Provider	Set up	Notes
WhatsApp	Meta WhatsApp Cloud API	a Meta business app, a phone number ID and a permanent system-user token; an approved message template with one {{1}} parameter	needed to message members outside the 24-hour window; template approval takes a day or two
SMS	any HTTP gateway (Fast2SMS, Textlocal, MSG91…)	the gateway URL with placeholders {to} {text} {sender} {dlt} {key}; a DLT-registered template	Malayalam SMS is 70 characters per segment
E-mail	any SMTP account	host, port, user, password, from address	Gmail needs an app password
Push	built in	nothing	free; the app must be served over HTTPS
Members' online payment	Razorpay (club's account)	key ID, secret, webhook secret; webhook URL /api/payments/razorpay/webhook	per club under Settings or in the server's .env
Subscription payment	Razorpay (operator's account)	CLUBPRO_RZP_KEY_ID / SECRET / WEBHOOK_SECRET; webhook URL /api/saas/webhook	operator only

PART D · OPERATOR

Backups and safety

36

Sleep well

Chapter 36 of 42

+10 XP

1. **Nightly backups** every club's database and uploads are copied each night; the console shows the last backup per club.
2. **Google Drive** a service account and a shared folder push copies off the server; retention is per club.
3. **Protections** HttpOnly cookies, a header on every change (no cross-site actions), scrypt passwords, one-time codes that expire, rate limits on public endpoints, re-encoded uploads, security headers and a content policy on every page.
4. **Updates** re-run the installer; the schema upgrades itself; restart with docker compose.
5. **Data requests** a club's data is one folder; export or delete it as a unit when a club leaves.

MISSION

+40 XP

Mission 11 · Operator

- [ ] Create a club from the console and sign in to it
- [ ] Set pricing, UPI ID and support contact
- [ ] Sign a club up through /signup on your phone
- [ ] Mark a trial club paid and watch its status

A committee convener (convener, secretary or chair of a committee) can also schedule that committee's meetings, mark attendance and write and publish its minutes.

PART E · REFERENCE

Numbering formats

38

Chapter 38 of 42

+10 XP

Placeholder	Means	Example
{prefix}	the short name from Settings	KASC
{year}	four-digit year	2026
{yy}	two-digit year	26
{seq:04d}	running number, zero-padded to 4	0042
{seq}	running number	42

Defaults: membership `{prefix}/{year}/{seq:04d}`, receipt `R/{year}/{seq:04d}`, voucher `V/{year}/{seq:04d}`, accession `{seq:05d}`. The sequence can restart every year.

PART E · REFERENCE

Automatic messages

39

What the app sends on its own

Chapter 39 of 42

+10 XP

Template	When
`application_received`	to the applicant when the form is sent
`application_approved / rejected`	the number and sign-in, or the reason
`news / event`	on publish, to the audience
`event_reminder`	the day before an event the member registered for
`registration_confirmed`	on registering
`results`	when results are published
`meeting_notice / mom_published / action_assigned`	committee notices, minutes, action items
`book_issued / book_due / book_overdue / reservation_ready`	the library
`receipt / subscription_due / payment_claimed / payment_rejected / payment_success`	accounts
`booking_confirmed / booking_cancelled / asset_due`	facilities and assets
`blood_request`	to donors of a blood group
`poll_open / poll_results`	polls
`birthday`	on the member's birthday
`password_reset`	the one-time code
`saas_ending / saas_overdue / saas_suspended`	to office bearers about the club's subscription

Every template exists in English and Malayalam in `app/i18n.py` ; the member's language decides.

Frequently asked questions

42

Chapter 42 of 42

+10 XP

A member changed their phone number. How do they sign in?

The office edits the phone on the member's page (Office → Members). The new number is the login from then on; set a password for them if needed.

Messages show as *demo* in the outbox.

No channel is configured yet. Enter the club's own WhatsApp / SMS / e-mail account under Settings → Communication, or ask the operator to configure the server's. In-app notifications work regardless.

Can two clubs share one phone number for WhatsApp?

Yes: leave the club's WhatsApp fields blank and the server's number is used. A club that enters its own number uses that instead.

We already have 400 members in Excel.

Office → Members → Import register: download the template, paste your rows, upload. Existing numbers are kept; missing ones are issued.

Can a member belong to two clubs?

Yes. Each club is separate; the member signs in to each at its own address, with the same phone number.

What if we stop paying ClubPro?

After the end date and 15 days of grace the club becomes read-only: everyone can still sign in, read and export; nothing is deleted. Paying reopens it at once.

Is our data safe?

Each club has its own database on the server with nightly backups, optionally copied to Google Drive. Passwords are hashed; every change is logged; uploads are re-encoded; public endpoints are rate-limited.

Can we use our own domain?

Yes: point the domain at the server and add it on the platform console (or ask the operator). The certificate is issued automatically on the first visit.

How do we get help?

ClubPro

Everything a club needs, under its own name.
